REVONOC HORSE BRUSH ASSORTMENTS.

No. 25 REVONOC—Assortment contains three brushes especially designed for the care of the horse's body, mane and tail, legs and hoofs, in compact and attractive form, satin finish solid wood backs, size 4¼x9¼ in., stock cut 1½ in. long, oval face, embossed harness leather straps, w't per doz. 35 lbs.....per dozen asst. **JFJE** $11.00

Assortment Consists of the Following.

No. 509H REVONOC Body Brush—Is of palmico fibre, a combination of palmetto, tampico and bassine, which makes a very pliable though tough and serviceable stock, especially desirable for cleaning the horse's body after currying, leaving the hide in smooth, healthy condition.

No. 519H REVONOC Mane and Tail Brush—Is of what is termed a "marble or union fibre" because of its marble color and is produced from palmyra, bassine and tampico. The bassine and tampico being uniformly distributed throughout the entire brush giving it the desired stiffness for use on the mane and tail.

No. 513H REVONOC Hoof and Leg Brush—Is of a combination of palmyra and bassine, making a very stiff stock which can be used effectively in cleaning the mud from the legs and hoofs.

ONE ASSORTMENT IN AN ATTRACTIVELY LABELED BOX, SUITABLE FOR COUNTER DISPLAY: FOUR DOZEN ASSORTMENTS IN A CASE.

For complete description, see below.

CRUSO LEATHER BACK HORSE BRUSH ASSORTMENTS.

Best Quality Selected Jaumave Fibre, Leather Hand Strap, Stock Trimmed 1 Inch in Length.

No. 504H—Cruso, assortment contains six 9x4½ in. leather back brushes, having a retail value of 25c, 35c and 50c, w't per doz. assts. 45 lbs., per dozen assortments .....**ADEJ** $26.40

Assortment Consists of the Following.

Two No. 22 Cruso brushes made from mixed red and white jaumave fibre, light yellow leather back, grain russet leather hand strap, retail value at $0.25 .....$0.50

Two No. 23 Cruso brushes made from red and white jaumave fibre center, outside row black, light red leather back, russet leather hand strap, retail value at $0.35 .....$0.70

Two No. 21 Cruso brushes made from all black jaumave fibre, black leather back, black grain leather hand strap, retail value at $0.50 .....$1.00

Retail value, each assortment $2.20

The jaumave fibre used in making these brushes is in appearance not unlike white bristle or horse hair. It has, however, a stiff quality not found in animal bristles or hair and makes a splendid fibre for horse brushes to retail at prices mentioned.

EACH ASSORTMENT IN ATTRACTIVELY LABELED BOX; ONE DOZEN ASSORTMENTS IN A CASE.

No. 909—7x12 in., w't per 9 lbs., per dozen .....JHBJ $13.70

BRIDGE NECK.

No. 80—Cyclone, w't per doz. 30 lbs., per dozen .....DBJ $7.00

The padded plate rests on the horse's neck, surrounding the sore while the elevated bar holds the collar clear of the afflicted parts.

No. 50—Oscillating, size 2, w't per doz. 8½ lbs. .....per dozen DHJ $8.00

The pad is made of the highest grade of sole leather and is so shaped as to adjust itself to the neck, having an open space in the center, thus leaving the afflicted part free. The metal plate is elevated and secured on each side to an under plate permitting the necessary swinging motion. Any movement of the collar affects only the metal top.

No. 70—Sun, w't per doz. 33 lbs., per dozen .....JGHE $13.10

The padded plates at either end of the connecting bar rest on the neck and shoulder of the horse and are so attached to the bar to permit a swinging motion which allows the pads to adjust to any position without interfering with the collar.

No. 90—Wabash, w't per doz. 28 lbs., per dozen .....JGBJ $12.00

The advantages of the Wabash are many. It is convenient to put on the horse. Is quickly attached by straps or chains to the hame staples and is left attached to the harness. By using the "Wabash" a sore necked horse can be worked every day.

SHAPED DEER SKIN TOP COLLAR.

High Grade Deer Skin with Sole Leather Caps.

No. 904—Factory No. 4—Size 5½x5½ in., w't per doz. 3¼ lbs., per dozen .....JFFJ $11.00

No. 905—Factory No. 5—Size 5½x6¼ in., w't per doz. 6 lbs., per dozen .....JGBJ $12.00

No. 906—Factory No. 6—Size 6x6½ in., w't per doz. 7 lbs., per dozen .....JGHJ $13.00

These pads are made from high grade oak sole leather and lined with the best quality of deer skin; virtually two pads in one for the reason that when the deer skin surface is worn away there is still a first-clas Curtis leather pad.

SURE CURE NECK.

No. 75—Sachse, length 5½ in., open space 7 in., japanned steel top, wool stuffed pads, leather lined, w't per doz. 48 lbs., per dozen AHJJ $30.00

Made with a stationary bridge upon which the collar rests, so that it cannot come in contact with the sore part. The front part of the pad works on a pivot, consequently the horse can move its head up and down with ease.

Another important feature—open section is covered with wire cloth—a protection against flies.

CART SADDLE.

No. 500—All white drill, composite stuffing, size 19x22 in., w't per doz. 34 lbs. .....per dozen **DBE** $7.70

Cruso Perforated.

No. 1310—Cruso, 10 in. draft, seal brown, special perforated "Cruso" fabric, four hooks, sizes 17 to 24 in., w't per doz. 17½ lbs. .....per dozen **DBJ** $7.00

The special perforated "Cruso" fabric is something entirely new and contains every quality necessary to make a most satisfactory sweat pad. The threads of the wool of which it is composed are carried through burlap center by slender wire needles, thus perforating the fabric forming tunnels through which the moisture travels to the outer side.

The difficulty with most of the ordinary pads is that, while they protect the animal from direct wearing contact, the added thickness and warmth causes the horse to sweat profusely underneath the pad, and containing no absorptive properties the surface next to the horse's hide soon becomes soaked with sweat, with no means of escape.

This moisture heats the flesh and often causes serious irritation. The "Cruso" fabric allows perfect ventilation and overcomes this difficulty, keeping the shoulders free from moisture and as a result in a healthy condition. Flexible, durable and sanitary.

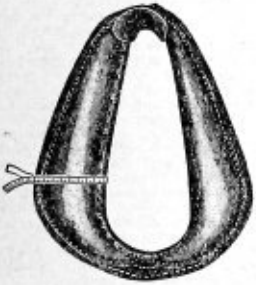
Ventiplex.

No. 310—Gray Ventiplex fabric, four hooks, 10 in. draft, sizes 17 to 24 in., w't per doz. 16 lbs., per dozen .....**DIE** $9.00

Ventiplex is a new moisture-absorbing fabric especially adapted for making sweat pads, being woven in such a way that the moisture as fast as it forms is carried from the under surface of the fabric to the outer side where coming in contact with the atmosphere it evaporates, keeping the pad dry and comfortable at all times.



TWO DOZEN IN A SACK.

HORSE COLLARS.

The Correct Way to Measure Length of Collars.

When ordering collars, always give sizes wanted, measuring inside of rim from throat to top.

To find the size of the "draft" of a horse collar, measure at the widest point the circumference of either side with a tape line tightly drawn.

No. 16—Black split leather back and rim, imitation baker cloth face, about 14½ in. draft, 16 to 22 in., w't per doz. 65 lbs.....per dozen **JIBJ** $16.70

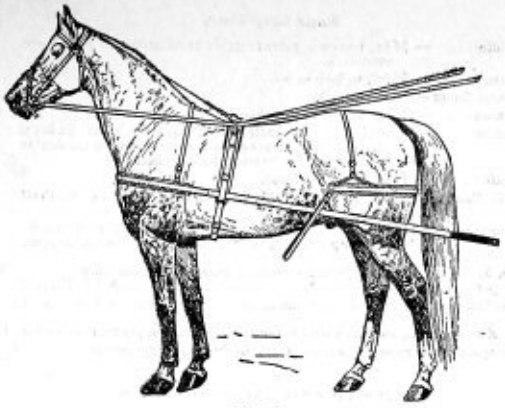
SINGLE BUGGY HARNESS.



DOUBLE TEAM HARNESS.

WE MAKE IT EASY FOR THE DEALER.

The illustration shown above makes the trade name for the different parts on single and double harness very clear to the dealer. Harness is a line which the hardware dealer will find practical and easy, and one which will aid him largely in increasing his profit account. Our line is very extensive, including everything in the line of Harness and Saddlery Hardware.

HARNESS.

VENTIPLEX.

Ventiplex Fabric is an entirely new material used in the manufacture of Sweat Pads, Housings and Saddle Blankets. It is not a felt, it consists of several layers of Wool, Hair and India Fibre, so interlaced as to permit free circulation of air, thus permitting moisture to go easily from the inner side to the outer side, thereby healing Gall Sores, etc.

Other great features of Ventiplex are that they can be cleansed with soap and water, thereby making them perfectly sanitary. Their wearing qualities are the best and will always hold their shape.

REVONOC LIVE STOCK SPRAY.

A Scientifically Prepared Spray.

Insecticide—Disinfectant—Healing—Deodorant.

Disinfecting and Deodorizing a Chicken Coop.

REVONOC Live Stock Spray is a liquid preparation to protect cattle and horses from the torture of flies. It is a disinfectant and germicide.

There is nothing that worries a cow and retards the flow of milk so much as to be pestered and tortured with flies on hot summer days, and especially so at milking time. There is nothing quite so trying as to milk a cow when bothered with flies.

It is a well known and generally recognized fact that cows protected from flies give more milk and require less feed to keep up milk and fat.

REVONOC Live Stock Spray means a greater flow of milk, less sickness among cattle and greater comfort to both man and beast.

A Deodorant.

It does not simply replace one odor with another, but destroys the odors of decomposition by arresting the process and reducing the products to harmless and odorless compounds.

Contains No Coal Tar.

REVONOC Live Stock Spray contains no coal tar products or kerosene. Sprays made with these ingredients evaporate quickly and as they keep off the flies for only a short time, are really more expensive in the long run, as it is necessary to spray oftener.

Coal tar derivatives—largely carbolic acid—gum the hair and are poisonous, when licked off the body by the stock. Kerosene is irritating to skin and often causes the hair to come out.

REVONOC Live Stock Spray is not only a powerful insecticide, but has great disinfectant, healing and deodorant properties as well. The dealer handling a spray possessing so many uses, has a decided advantage from the selling stand-point over his competitors carrying an ordinary spray.

REVONOC **Live Stock Spray**, 1 gallon lithographed cans, packed 1 doz. in a case, gross w't 130 lbs.,
per dozen ..... **J I J J** $15.00

A lithographed store sign and other attractive advertising matter inclosed in each case.

ECONOMIC VALUE

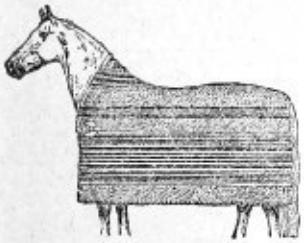
The proper use of REVONOC *Live Stock Spray will prove to be of economic value as well as humane.*

One gallon will care for twenty head of cattle for a month, a cost of about five cents a head. As a cow that is free from the fly pest will yield about 20% more than one that is so annoyed, it is a simple mathematical fact that the spray will pay for itself over and over again by the increased flow and betterment of the condition of the cattle.

Spraying a Cow with REVONOC Live Stock Spray.

REVONOC SPRAYERS.

No. 25H REVONOC—Plain tin, black wood handle, size of cylinders 18x1¼ in., size of reservoir 4¼x4 in., funnel end, capacity 1 qt., length over all 26 in., w't per doz. 16 lbs., per doz. **D C J** $7.80



No. 30 REVONOC—IX tin, painted red, otherwise same as No. 25H REVONOC, per dozen ..... **D I J** $7.20

Made with exceptionally large air chamber. The conical end extends through the reservoir making the Sprayer very strong and compact. The funnel protects the discharge tube. This Sprayer produces a powerful, fine mist spray in any direction desired. Made special for spraying REVONOC *Live Stock Spray.*

THIS PRODUCT IS GUARANTEED UNDER THE U. S. INSECTICIDE ACT OF 1910.

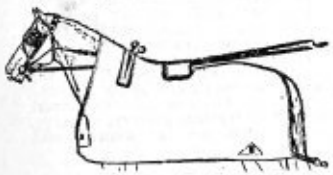
ROBES, OVERCOATS AND HORSE COVERS.

AUTOMOBILE ROBES.

Spring Belt.

No. 3595H—Heavy rubber drill face, blue kersey lined, leather soled shoes, w't 6½ lbs.,....each **EIJ** $9.80



No. 3596H—Extra quality heavy rubber face, green plush lined, leather shoes, w't 8 lbs. .....each **JGGJ** $12.80

No. 3597H—"Combination Robe," fine black plush velour face, lined with same material, rubber interlined, lined, leather shoes, w't 9½ lbs., each .....**AJHJ** $18.00

No. 3598H—Extra quality brown corduroy face, black plush lined, leather shoes, w't 8 lbs. ...each **JIJJ** $15.00

The Spring Belt in the above robes is made of fine tempered steel and applied to the upper edge of robe and made to shape itself to the body and hold the robe firmly in place. The divided foot pockets or "shoes" are adapted for use in automobiles, the separation enabling the operator to reach any two pedals at the same time. The feet are thus in separate partitions and completely covered all around, the robe falling together at the back when the spring belt is closed around the body.

WATERPROOF HORSE COVERS, OVER HAME.

KIDNEY COVERS, STORM SHIELDS AND DUST HOODS.

KIDNEY COVERS WATERPROOF.

No. 5050—Heavy black oiled drill, extra quality navy blue wool lined, complete with saddle and trace straps, w't per doz. 27 lbs., per doz. **BAFJ** $36.00

HIP.

No. 5055—Heavy black oiled drill, fancy striped flannel lined with leather housings over back pad or saddle, trace leathers, w't per doz. 31 lbs., per dozen .....**BDJJ** $40.00

STORM SHIELDS.

No. 90—Heavy special waterproof material, plaid fleece lining with metal line pockets, will fit any ordinary size piano box buggy, w't per doz. about 50 lbs., per dozen **CJGJ** $51.30

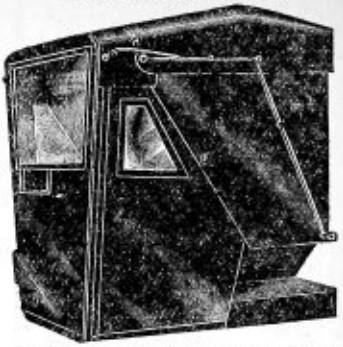
Material used in making this front is guaranteed not to crack or peel off. Securely fastened by means of straps and buckles and when once attached there is no chance of it coming loose. 12 in. metal line pockets covered with a broad flap to prevent the entrance of cold or rain. The hooks that fasten to the dash are fastened to a coil spring which gives to the adjustment and has longer life than the rubber cord ordinarily used in a front of this character.

STORM APRONS.

No. 46—22 oz. black rubber drill, 50x54 in., with line pockets, w't per doz. 24 lbs. ...per dozen **JICE** $15.60

No. 47—22 oz. black rubber drill, 50x60 in., with line pockets, w't per doz. 30 lbs....per dozen **AJIJ** $18.20

Are easily adjusted to any size buggy dash by the two steel clamps fastened to the apron, which fit over the dash like a clothes pin and holds the apron securely in place.



No. 48—22 oz. black rubber drill, 50x72 in., with line pocket, w't per doz. 36 lbs. ...per dozen **ABEJ** $20.80

Made expressly for and will fit any phaeton dash, is adjusted by two steel clamps, the sides of apron extend well down over the feet.

No. 85—Heavy Canton flannel, with line pocket, one side coated with a black oiled waterproof material, fleece lined, 50x60 in., w't per doz. 36 lbs., per dozen .....**AHGJ** $31.20

VESTIBULE SHIELDS.

Fremont—38 in., steel frame covered with black rubber material, colored lining, heavy celluloid window securely sewed with heavy binding, celluloid windows also in side curtains, w't per doz. about 140 lbs., per dozen .....**JHHIJ** $148.20

This shield has an adjustment of 4 in., the side curtain rolls on a metal roller with an extra heavy spring which makes the curtain rigid at all times. It is the lightest vestibule shield on the market. Easy to attach and detach, simple in construction and will give entire satisfaction.

WAGON APRONS.

No. 80—Heavy brown oiled duck, with line pocket, 54x72 in., w't per doz. 32 lbs.....per dozen **BAFJ** $36.00

At the bottom of the apron are two straps and buckles so that the apron can be fastened to any foot board. At the top are three straps and snaps, and the apron can be hung to suit the driver. Suitable for express, grocery, laundry, transfer wagons and all wagons with tops.

ADJUSTABLE DUST HOODS.

No. 6—22 oz. black rubber drill, will fit any piano box buggy top, w't per doz. 21 lbs....per dozen **AACJ** $18.80

Is put on the top when thrown back, and protects the inside lining of the top from dust or mud. It fits any buggy and can be put on or taken off in a few seconds. When adjusted there is no wrinkling nor puckering.

No. 42½—Wrought brass bells, nickel plated, graduated cup patterns, japanned iron strap, w't per pr. 3 lbs. per pair .....**AEJ** $2.50
ONE PAIR IN A BOX.

ETCHING CUTLERY.

ETCHING DEPARTMENT.

The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they had been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that a sufficient (not a large) quantity is ordered each time to warrant it, and that the goods are such that we as a firm would care to affix our guaranty.

We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

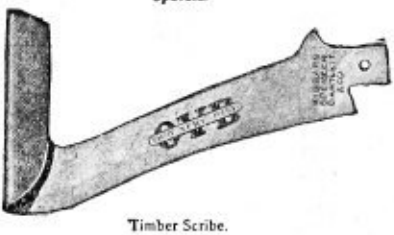
Harrison Patent Punch Blade.

Corn.



Eraser.

Screw Driver.

Spatula.

Timber Scribe.

Cotton Samplers.

We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in OVD pocket knives. Slight variations are made to adapt them to the different knives to which they form a part. All are made from Wardlow's Celebrated English crucible steel. Each blade is forged in the most approved manner by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a process which insures uniform hardness through the metal. All blades bearing the OVD trademark are carefully ground, finished and crocus polished on both sides. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaw and neither too hard or too soft.

In material, workmanship and design, the OVD pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of one factory which has in its employ, men who have served thirty, forty and fifty years in their service.

H.S.B.B. POCKET KNIVES.

With Harrison Patent Punch Blade.

Made by American Workmen. Blades are finest English Crucible Steel, HAND TEMPERED. Sharpened ready for use. In whetting hold at an angle of 15 degrees on an OIL STONE, not a grindstone.

Showing work done by Harrison Patent Punch Blade.

All the pocket knives on this page are supplied with a Harrison patent punch blade as illustrated above. It is the only knife ever made that will cut perfectly round and smooth holes in leather. Will cut holes of any size up to ½ inch in diameter, and can be used to enlarge holes already made. Much more convenient to use than a punch, being always at hand, and making just the right size hole wanted every time.

Invaluable for Belting, Etc. An invaluable tool for repairing belting, for mending harness or making buckle holes. The curving upper face of the punch extending slightly over the end of the knife, making it easy to open, even if the user has on gloves. It is very strong, and will hold a sharp cutting edge a long time without re-sharpening. This is the only punch manufactured that will cut a perfectly round, smooth hole of any desired size without damaging the leather.

The Very Best Quality. Both the patented punch blade, and the other blades are hand forged from the finest grade of crucible steel, highly tempered and warranted free from flaws. These knives are positively without equal for practicability.

HALF DOZEN IN A BOX.

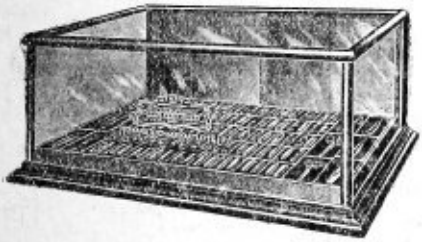
IMPROVED CUTLERY SHOW CASES.

FLOOR DISPLAY CASES.

Our No. 900 show cases are made of selected white oak thoroughly hand made and of natural oak finish, highly hand polished, the top is ½ in. bevel French plate glass laid in plush on green felt cushions, selected double strength glass front and ends and glass sliding dust proof doors in the back that move on ball bearings and steel track.

The inside has 10 in. and 14 in. paneled oak shelves, the front edges of which are fitted with an oak lip extending ¼ in. above the shelf proper to prevent the goods from being pushed off the shelves, these shelves are supported by adjustable nickel plated brackets, cloth lined paneled bottom.

One of the latest improvements in these cases are the steel strength mitered joints, which means that the mitred joints in our cases are reinforced with steel, making the weakest part the strongest—this is a most important point to be considered.



Made either knockdown or set up and of standard measurements, 42 in. high, and 26 in. wide outside dimensions.

No. 900—5 ft. long, free of charge with $300.00 worth of cutlery, shipping w't 285 lbs., value of case★.....$35.00

A FULL COMPLEMENT OF SILK PLUSH TOP CUTLERY BOXES GOES WITH EACH CASE GRATIS.

WHERE A CUSTOMER CANNOT BUY THE FULL AMOUNT OF CUTLERY AT ONE PURCHASE, but desires a Cutlery Show Case, we send same and CHARGE TO HIS ACCOUNT at prices noted, AND ON THE BOTTOM OF THE BILL WE PRINT THE FOLLOWING CONTRACT.

CONTRACT—We desire to make plain that in sending the above case and charging it to your account **IT MUST BE PAID FOR** at the maturity of this bill. We will credit your account with the above charge for Cutlery Case when you have purchased $.....—**The required amount is inserted here**—worth of Pocket Cutlery, Table Cutlery, Butcher's Cutlery, Razors, and Safety Razors, Razor Strops, Lather Brushes, Spatulas, Painter's Cutlery, Hones, Silver Metal Goods, Flat Ware, Scissors and Shears, Toilet and Horse Clippers,—not including Power Clippers,—Carvers, Manicure Goods, Combs, Key Rings and Key Chains, provided said purchases are made within one year from date of this invoice. **Not more than one show case to be furnished on these terms.**

COUNTER DISPLAY CASES.

Free of Charge with $100.00 Worth of Cutlery.

No. 0301—Oak, combination case, 40½ in. long, 27¼ in. wide, 17 in. high, contains boxes for 45 patterns of pocket knives, 6 patterns of scissors and shears and 6 pattern of razors, finished in oak with inside silk plush trimmings, w't crated 100 lbs., value of case★.....$12.00

Free of Charge with $200.00 Worth of Cutlery.

No. 0401—Oak, large pocket knife case, 54 in. long, 27¼ in. wide, 17 in. high, contains boxes for 95 patterns of pocket knives, finished in oak with inside silk plush trimmings, w't crated 150 lbs., value of case★.....$16.00

These cases are a great improvement over most cutlery cases made, and are both handsome and convenient. The case has a 2½ in. green silk plush covered base running around inside at bottom, and each case is furnished with individual silk plush top boxes for pocket knives, razors and shears. These boxes are made to hold one dozen of each article, with a handsome plush top on which to exhibit the samples. The case is of best material and workmanship, lettered as per illustration. The sliding mirror doors do away with the drawer and swinging doors as used in the old style cases, which proved very inconvenient, especially where the space behind the counter was limited. The price of the show case is not figured or added to cost of goods at all. We place the best price on our cutlery at which we can sell the goods separately, and the case we furnish with the idea of giving our customers a case which will prove a useful ornament to their stores and valuable in assisting them in selling goods and keeping the stock in good order and complete.

A FULL COMPLEMENT OF SILK PLUSH TOP CUTLERY BOXES GOES WITH EACH CASE GRATIS.

Cork balls are very much in demand for displaying pocket knives, scissors, etc., in show window. Each ball has a small hole through center for attaching cord, and when suspended from window and covered with pocket knives with blades all opened, it makes a very attractive affair and attracts attention. The ball can be used indefinitely, and we do not know of anything in the way of window display that will give such long and excellent service for the money.

TABLE KNIVES AND FORKS.

A careful examination of these goods will prove they have no equal.

Handles.—They are made from first grade, high priced materials—not cheap imitation wood manipulated to appear like the real article. Black handles are genuine imported ebony, red handles are finest Panama cocobolo, white handles are extra quality hard bone. As a consequence they hold their finish and their attractive, wholesome appearance, instead of becoming discolored and soaked with grease after being used a short time.

The handles are long and more symmetrical than other makes, they are more dainty in appearance, fit the hand better and "hang" as perfectly as highest grade goods should, instead of having a clumsy ill-balanced feeling. The forks are models for shape of bend, workmanship and finish, and their temper is unequalled, as can be shown by jamming the fork tines into wood and twisting them.

Bolster.—The metal used in the bolsters is high grade, absolutely without adulteration by lead or spelter, consequently it holds its original finish and does not become dull and cheapen the appearance of the goods. All metal designs are anchored through the handle. Warping and consequent cracking of handles is impossible. The metal work fits the handle with absolute accuracy, there are no cracks or open joints of any kind where dirt or grease can work in and spoil the appearance.

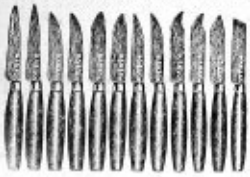
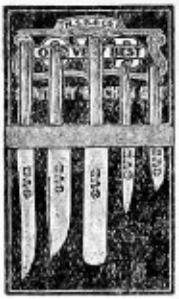
PARING KNIFE ASSORTMENTS AND KITCHEN SETS.

KITCHEN SETS.



No. 1165 —Consisting of 8 in. bread knife, 7½ in. lunch knife, 6 in. pastry knife, 5¼ in. household knife, 3 in. paring knife and 12 ½in. pot fork, all blades and tines of the very finest material and handsomely finished, handles all polished cocobolo and secured by polished brass rivets, per set .....ADE $2.40
ONE SET ON HEAVY CARDBOARD EASEL DISPLAY IN A BOX.

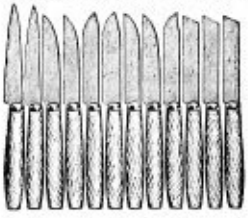
PARING KNIFE ASSORTMENT.



No. 700 —Consisting of 1 dozen knives, 3¼ in. solid aluminum handles, polished steel blades assorted 3 to 3½ in.,
per assortment .....ADE $2.40
The blades on these knives are made of special steel honed to a fine edge by hand. The handles are solid aluminum cast around the blades and are practically indestructible and very sanitary as there are no crevises nor holes for dirt and grease to lodge in.
ONE DOZEN ON EASEL DISPLAY STAND.

No. 706 Assortment—Consisting of one dozen paring knives, with enameled hardwood handles and steel blades, of assorted kinds and lengths,
per assortment .....JGJ $1.20
ONE ASSORTMENT IN A BOX.

SANITARY KITCHEN SETS.



No. 1912 —Set consisting of 7 in. lunch knife, 6½ in. butcher knife, 7 in. kitchen spatula or pastry knife, 4 in. household or kitchen knife, and 3 in. paring knife, all blades of the very finest material, handsomely finished, handles of solid aluminum, highly polished....per set AIJ $3.20

Each handle is securely anchored to the blades, making it impossible for it to come loose.

The aluminum sanitary handles make this the cleanest and most sanitary kitchen set on the market. All of the above are mounted on a handsome steel rack lithographed in colors. It is intended that this rack be screwed up over the sink or in a convenient place in the kitchen so that the knives will always be easily found and near at hand.

KNIFE SHARPENERS.

A combined Sharpener and Knife Rest for Table and Kitchen Use.

No. 6—Elyria, nickel plated steel frame, 2 tool steel tempered serrated rollers, length 4 in.....per dozen **BDJ** $4.00

This is an improvement in steel sharpening devices, in that there are seventeen instead of two cutting edges; the result being very rapid work without stripping the edge of the knife to a perceptible degree. It will put a fine cutting edge on a knife by simply drawing the blade across the rollers two or three times. It is particularly adapted for kitchen and table knives.

ONE DOZEN IN A BOX.

"OH, SO EASY" KNIFE SHARPENERS.

No. 7—Full length 7 in., two rigid steel discs secured to a steel shaft, nickel plated, 4½ in. rubber handle, per dozen .....**CFJ** $6.00

Retails for 35 cents.

Can be used by the most inexperienced. As very few people know how to use steel properly, the advantage of the "Oh, So Easy" Knife Sharpener is apparent.

ONE DOZEN IN A COUNTER DISPLAY CARTON.

BAND.

No. 2—Meriden, cocobolo handle, sickle edge, 5 in. blade, per doz. **EDJ** $9.00

KRAEMER LIGHTERS.

No. 100—Solid brass, full nickel plated, per dozen .....**DHJ** $8.00

The Kraemer Lighter—"The light that lights." Made in America by American workmen for American people. Can easily be taken apart. The above lighter is operated automatically. Pressure of a button on the front of the case releases the cover which sets off the flint spark, igniting the wick. The latter is saturated with benzine, which gets its supply from a reservoir in the bottom of the lighter. This reservoir can be replenished from time to time, the capacity being about seventy drops. The reservoir is lined with cotton which absorbs the benzine.

The Kraemer Lighter will last for years and is fully guaranteed.

ONE IN A PASTEBOARD BOX.

SPARKERS.

Extra Sparkers for Kraemer Vest Pocket Lighters..per dozen **CE** $0.60

These sparkers are very easily inserted in the lighter by raising up the spring clamp that extends over the channel directly above the ratchet wheel that has indentations or teeth on it.

IN BULK.

STEWART CLIPPING MACHINES AND ATTACHMENTS.

Entire Page AJ%.

NO. 1 STEWART BALL BEARING, ENCLOSED TYPE CLIPPING MACHINE FOR HORSES, MULES AND COWS.

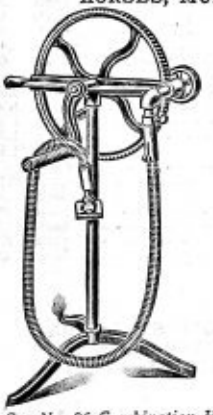
No. 1.

The gearing is all enclosed in a dust and dirt proof case and runs in oil constantly.

It has a solid tripod base, a strong upright and its gears are all cut from solid steel made file hard.

A slow turning of the handle is transformed by the ingenious mechanism of the gears to a tremendous speed in the knife.

It turns so easily that it is mere play to run it.



The entire machine is sturdy, compact and perfect in every detail of material and workmanship.

The price puts it within reach of every farmer and horse owner.

No. 1—Ball bearing, complete with 6 ft. of flexible shaft and Stewart clipping knife and handle, shipping w't 36 lbs., each $7.50

No. 18—Combination machine for clipping horses, mules and cows, and shearing sheep and goats, consists of No. 1 Stewart ball bearing clipping machine and Shearing attachment, shipping w't 52 lbs. .....each $15.25

NO. 2 CHICAGO CLIPPING MACHINE FOR HORSES, MULES AND COWS.

Stewart Patent.

A big, strong machine and a special favorite with liverymen, blacksmiths, and all who have much clipping to do. 18 inch large gear, is carefully machined all over, the teeth are cut from solid metal and engage with perfect precision in the teeth of the hardened steel pinion. Wearing parts are all hardened tool steel, shaft revolves with great speed and completely equalizes the motion. Easily turned with either hand. Light running and noiseless, will clip a horse in 30 minutes. Rigid tripod base and strong tubular upright.

No. 2—Equipped with 6½ ft. highest grade flexible shaft and Stewart one nut clipping knife and handle, w't boxed 75 lbs. .....each $10.75

See No. 06 Combination Horse Clipping and Sheep Shearing Machine listed on page 1696B.

CHICAGO VETERINARY POWER FLOATS.

These floats keep the teeth of horses in good condition. Half the food will do more good if the teeth are in good condition to chew it properly. Can be attached very easily to any of our hand power horse clipping machines.

Chicago veterinary power float including one rasp, each $4.25

Extra rasps .....each .50

PACKED IN CARDBOARD BOXES. W'T 2 LBS.

REPAIRS FOR STEWART HAND-POWER HORSE CLIPPING MACHINES ARE LISTED ON PAGE 1696A.

STEWART ELECTRIC HORSE CLIPPING MACHINES.

No. 850.

Each of these machines is equipped with a high grade motor suspended in a trunion yoke. The flexible shaft is 7½ ft. long and connected directly with the armature shaft of the motor. Motors are perfectly made and are self-oiling.

To start the machine merely unscrew an ordinary electric lamp globe from the socket and screw in its place the plug already connected to cord on the motor. Anyone can make connections and the machine can be started or stopped by merely turning an ordinary switch the same as for an electric lamp.

Nos. 400 and 600.

When not in use the machine can be hung up out of the way. These machines run without noise and the cost of operating is only about one cent per hour. No mechanical knowledge is required to run them.

No. 400—Direct current, 110 volt electric horse clipper complete with Stewart patent knife and handle .....each $50.00

No. 600—Direct current, 220 volt electric horse clipper complete .....each $50.00

No. 850—Alternating current electric clipper, 104—115 volts, single phase, 60 cycles, complete .....each $75.00

Note—Alternating clippers will not operate on direct current circuits and vice versa.

SHEEP AND GOAT SHEARING ATTACHMENTS.

For Use on Stewart No. 1 or 2 Chicago Horse Clipping Machines.

Attachment consists of complete No. 5 Stewart Shear head, four sets of shearing knives, the solid core, universal jointed shafts and cogs as shown here.

No. 77—Sheep shearing attachment, w't 20 lbs., complete .....each $7.75

Parts and prices thereon for this attachment are the same as for the corresponding parts of the No. 8 shearing machine. See page 1698.

No. 95—Ball bearing, for use on Nos. 1 and 1902 horse clipping machines or on any hand power Stewart sheep shearing machines, consists of solid core shearing shaft fitted with ball bearings, No. 7 Stewart ball bearing shear and 4 sets of combs and cutters, w't 20 lbs., complete, each $9.50

In ordering ball bearing sheep shearing machine attachments mention number of machine and when it was purchased.

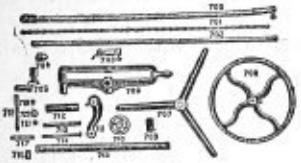
STEWART HORSE CLIPPING KNIVES AND PARTS OF SAME.

Complete.

Stewart One Nut Tension, Dust Proof Pattern, Balance Pressure.

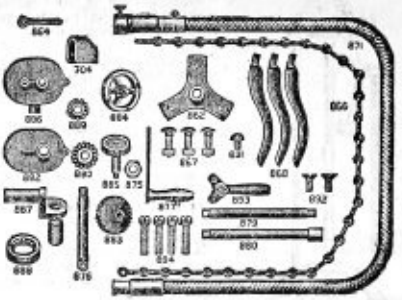
Stewart's patent handle and knife complete	each	$3.50
Stewart's patent knife without handle	each	2.50
Stewart's patent handle only	each	1.00
No. 90—Top plate	each	1.00
No. 91—Tension spring of handle	each	.05
No. 92—Tension bolt of handle	each	.05
No. 93—Eccentric roll of handle	each	.10
No. 94—Tension nut of handle	each	.05
No. 95—Pin and shaft of handle	each	.35
No. 97—Shank of handle	each	.40
No. 98—Front part of handle	each	.50
No. 99—Bottom plate	each	1.50



The construction is exceedingly simple, there are no unnecessary parts, simple nut adjustment produces equal tension throughout.

Grinding all kinds of horse clipping knives	per set	.50

ACCESSORIES FOR ALL STEWART HORSE CLIPPING MACHINES.



Flexible shaft complete	per foot	$0.75
Chain for flexible shaft	per foot	.30
Chain links, separate, for flexible shaft	per dozen	.30
Shaft without chain	per foot	.50
Oil, in quart cans	per quart	.50
Oil, in gallon cans	per gallon	1.00
Chain paste, 1 lb. can	each	.25
Chain paste, 3 lb. can	each	.50
Small squirt can, filled with oil	each	.15

PARTS FOR NO. 2 CHICAGO CLIPPING MACHINE.

No. 700—Shaft without chain, 6½ ft.	each	$3.25
No. 701—Chain for shaft, 6½ ft.	each	1.95
No. 702—Spiral spring, without cover	each	1.80
No. 703—Top sleeve	each	.50
No. 704—Gear cap	each	.50
No. 705—Gear head casting	each	1.50
No. 706—Bracket	each	2.00
No. 707—Tripod	each	2.00
No. 708—Drive wheel	each	2.50
No. 709—Bottom sleeve	each	.25
No. 710—Balance wheel	each	1.00
No. 711—Crank	each	.50
No. 712—Wood handle	each	.15
No. 713—Axle	each	.50
No. 714—Handle bolt	each	.25
No. 715—Upright	each	1.00
No. 716—Pinion	each	.50
No. 717—Eye spindle	each	.50
No. 718—Pinion shaft	each	.50
No. 719—Small cog	each	.25
No. 720—Large cog	each	.50
No. 721—Hexagon nut for handle bolt	each	.05

PARTS FOR STEWART NO. 1 BALL BEARING ENCLOSED GEAR CLIPPING MACHINES

As Supplied Since August 1, 1908.

No. 704—Gear cap	each	$0.50
No. 862—Leg bracket	each	.35
No. 864—Cotter pin	each	.02
No. 866—Chain, 6 ft. long	each	1.80
No. 871—Shaft without chain, 6 ft. long	each	3.00
No. 867—Bracket, stud and nut	per set	.15
No. 868—Legs	each	.35
No. 875—Handle nut	each	.05
No. 876—Eye spindle	each	.50
No. 877—Crank handle	each	.50
No. 879—Upper part of upright	each	.40
No. 880—Lower part of upright with coupling	each	.60
No. 882—Gear case cover	each	.75
No. 883—Intermediate gear and pinion	each	2.00
No. 884—Balance wheel and spindle	each	1.00
No. 885—Drive gear and spindle	each	1.50
No. 886—Gear case	each	1.00
No. 887—Gear head casting	each	1.50
No. 888—Balls and ball cups	per set	.75
No. 889—Small cog	each	.25
No. 890—Large cog	each	.50
No. 891—Gear cap screw	each	.05
No. 892—Grip handle screws	each	.05
No. 893—Grip handle	each	.25
No. 894—Gear case screws	each	.05

SPECIAL PARTS FOR OLD STYLE NO. 1 STEWART ENCLOSED GEAR CLIPPING MACHINE.

Not Ball Bearing, but as Supplied before August 1, 1908.

For illustrations of the following special parts, see cuts of corresponding parts for the No. 1 ball bearing clipping machine as shown above.

No. 719—Small cog	each	$0.25
No. 720—Large cog	each	.50
No. 860—Gear case	each	1.00
No. 861—Gear case cover	each	.75
No. 863—Drive gear and spindle	each	1.50
No. 865—Balance wheel and spindle	each	1.00
No. 869—Gear head casting	each	1.50
No. 870—Gear case screws	each	.05
No. 872—Intermediate gear and pinion	each	2.00

All other parts for the old style No. 1 enclosed gear clipping machine are the same as used on the No. 1 ball bearing clipping machine. See illustrations and prices above.

SHEEP SHEARING MACHINES, ETC.

Entire Page AJ%.

STEWART SHEEP AND GOAT SHEARING MACHINES.

The gearing is all enclosed in a dust and dirt proof case, and runs in oil constantly.

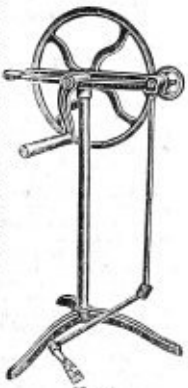
Solid tripod base, strong upright, and gears cut from steel made file hard.

A slow turning of the handle is transformed, by the ingenious mechanism of the gears, to a tremendous speed in the knife.

Solid core shaft with universal joints, may be turned in any direction.

No. 9 Ball Bearing. No. 8.

Shears are of simple adjustment and of equal tension throughout. Perfectly balanced, will shear all grades of wool.



No. 8—Complete with Stewart No. 5 shear, 4 combs and 4 cutters, w't boxed 45 lbs. .....each $9.75

See No. 18 combination horse clipping and sheep shearing machine described on page 1696.

No. 9—Ball bearing, each joint in the shaft and the shear is fitted with ball bearings, has a larger gear case than the No. 8 machine and a larger balance wheel aids in easy turning, fitted with No. 7 Stewart ball bearing shear, 4 combs and 4 cutters, w't boxed 50 lbs. .....each $11.50

18 in. large gear, enclosed in a stationary frame and drives a steel cut pinion to which is attached a solid core jointed shaft having universal joints permitting it to be turned in any direction, small turned balance wheel fitted to the pinion shaft runs at a high speed and steadies the motion of the machine at all times, all parts are interchangeable.

New Model. No. 6.

New Model—Complete with No. 5 Stewart shear, 4 combs and 4 cutters, w't boxed 60 lbs. .....each $12.75

No. 6—Set upon rigid tripod standard and strong tubular upright, w't boxed 75 lbs., otherwise same as New Model sheep shearing machine described .....each $15.00

The knives can be resharpened many times and made equal to new by using the automatic grinder shown on this page.

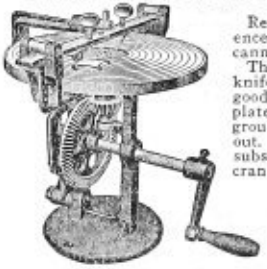
No. 06—Combination machine for clipping horses, mules and cows and shearing sheep and goats, consists of New Model shearing machine mounted on tripod stand, also clipping attachment consisting of 6½ ft. flexible shaft and clipping knife and handle, shipping w't 80 lbs. .....each $18.25

Repairs for hand power sheep and goat shearing machines are listed on page 1698.

CLIPPING ATTACHMENT FOR CLIPPING HORSES, MULES AND COWS.

For Use on Nos. 6, 8, 9 and "New Model" Sheep Shearing Machines.

No. 550—Clipping attachment, complete with 6 ft. of high grade flexible shaft and chain, eye spindle, Stewart horse clipping knife and handle and connecting parts as illustrated, shipping w't 10 lbs. .....each $5.50



THE IMPROVED STEWART NO. 11 GRINDERS.

For use on the No. 1 horse clipping machine and on the Nos. 8 or 9 sheep shearing machines. Constructed of metal throughout, may be attached to the machine in place of the shaft by means of an ingenious mechanism. This attachment makes it possible to put a perfect edge on the knives of No. 1 horse clipper or Nos. 8 or 9 sheep shearer in a few seconds time, obviating the time and expense incurred in sending them away to be sharpened.

No. 11—Grinder attachment complete, w't boxed 8 lbs., each $3.50

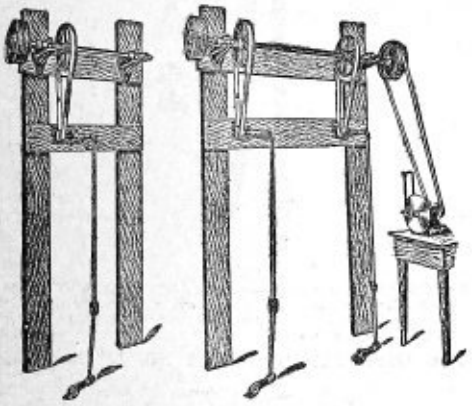
AUTOMATIC CLIPPER KNIFE GRINDERS.

Requires no skill or experience as it is automatic and cannot go wrong.

This machine will sharpen a knife in a few minutes to cut as good as new. Saves sending plates to the factory to be ground. Made of metal throughout. Can be run by power by substituting a pulley for the crank handle.

No. 13—For sheep shearing knives .....each $6.00
No. 15—For horse clipper knives .....each 6.00
No. 16—For both horse clipper and sheep shearing knives, each 6.50

W'T BOXED 36 LBS.



Extra holders for knives for Nos. 5 and 7 shears, per pair $0.50
Extra holders for knives for No. 4 shear .....per pair .50
Extra holders for horse clipping knives .....per pair .50
Emery paste grinder preparation, in 1 lb. package, per package ..... .25

Note—Shearing knives for No. 4 shear cannot be used with holders for Nos. 5 and 7 shears and vice versa.

REPAIRS FOR AUTOMATIC GRINDERS ARE LISTED ON PAGE 1698.

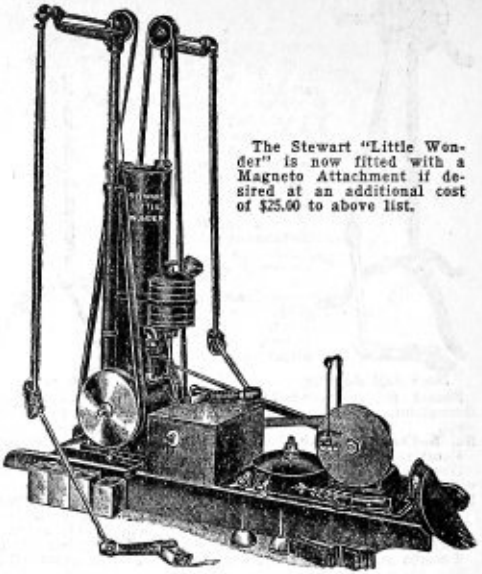
STEWART POWER SHEEP AND GOAT SHEARING MACHINES.

NEW POWER SHEEP AND GOAT SHEARING MACHINES.

Single Power Machine. Double Power Machines with Grinder.

Single Power Sheep and Goat Shearing Machine, complete with No. 5 Stewart shear and 4 sets combs and cutters, w't boxed 130 lbs.★ .....each **B J J J** $22.50

Double Power Sheep and Goat Shearing Machine, complete with 2 No. 5 Stewart shears and 8 combs and cutters, and Little Wonder Grinder, w't boxed 295 lbs., each★ .....**EHEJ** $65.00



Triple Power Sheep and Goat Shearing Machine, complete with 3 No. 5 Stewart shears, 12 combs and 12 cutters and Little Wonder Grinder, w't boxed 350 lbs., each★ .....**GHGE** $87.50

Little Wonder Power Grinder, complete, w't boxed 102 lbs., each★ .....**AHJ J** $30.00

It is especially designed for owners of from 300 to 3,000 sheep who have their own power. This machine can be run with a small gasoline or other engine, only one-quarter horse power being necessary for each machine. It has a large, strong steel shaft, 1⅛ in. in diameter, supported by heavy adjustable brackets, insuring correct lining up of the shaft. It has a unique starting and stopping device for engaging or disengaging the power without stopping the engine, avoiding all losses of time and enabling the operator to remain at the shear constantly. It is equipped with a strong shearing arm of the same type as on our highest grade machine. All wearing parts are of the best grade steel carefully and scientifically hardened and tempered, insuring smooth running and absence of wear.

Complete machines ready to set and belt to power, not including wood frame.

LITTLE WONDER SHEEP AND GOAT SHEARING MACHINES.

The Stewart "Little Wonder" is now fitted with a Magneto Attachment if desired at an additional cost of $25.00 to above list.

Little Wonder, complete with 2 wide pattern shears each fitted with 1 comb and 1 cutter, and Little Wonder Grinder, w't boxed 450 lbs.★ .....each **J I J J J** $100.00

Note—The skid is not included.

Extras.

Wide Combs★ .....each **ED** $0.50
Wide Cutters★ .....each **AD** .15

WE RECOMMEND 12 WIDE COMBS AND 24 WIDE CUTTERS.

These machines are portable and can be used anywhere; are a complete plant in themselves and can be set up in doors or out of doors and used at once without erecting either shed or framework.

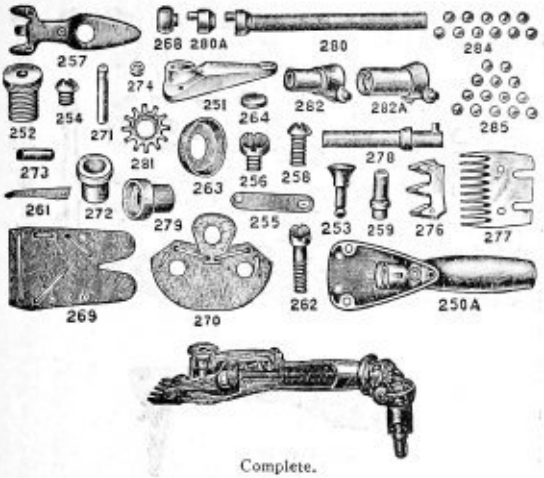
They are fitted with the very latest wide Stewart shears, the kind carried by all expert shearers. The wide shear has a four-tooth cutter and a thirteen tooth comb. It cuts very close but never mains or cuts a sheep. With each machine there is a complete grinding machine with which combs and cutters may be kept sharp.

The construction, compactness and completeness, together with the results obtained, make the machines a wonderful value for the price and one of the most attractive outfits to the farmer that could be built.

They are a complete power shearing plant at a price within the reach of any owner of 300 to 5,000 sheep.

A sturdy little two horse power gasoline engine of modern type, which can be employed for a score of other useful purposes, such as pumping water, sawing wood, churning, etc., furnishes the motive power of the two shears. All parts of the engine are interchangeable and new parts to fit can be promptly furnished. The raw material used has been tested for quality. Every part of the machinery has been chosen for its efficiency and parts subjected to friction are hardened by a scientific process.

The shears and the jointed shafts are supported by two movable horizontal arms. Two shearers can work together, reaching every part of the sheep with ease. Either shear can be operated alone, when desired, a simple shifting device being provided with which either shear can be thrown out of engagement.



Every machine is covered by an unqualified guarantee.

★FOR FACTORY SHIPMENT ONLY CHICAGO, ILL.

CLIPPING MACHINES, PARTS FOR HAND POWER SHEEP SHEARING MACHINES AND AUTOMATIC GRINDERS.

Entire Page AJ%.

NO. 7 STEWART BALL BEARING SHEARS AND PARTS.

Complete.

No. 7—Complete with 1 set comb and cutter, w't 3¼ lbs., each $6.00

This is the shear supplied with all No. 9 ball bearing shearing machines.

Will fit on any Stewart hand power sheep shearing machine no matter when purchased. All that is necessary is to mention THE YEAR IN WHICH THE MACHINE WAS BOUGHT. With this new shear there can be no question about the ease with which the work of sheep shearing is done.

STEWART EXPOSED GEAR CLIPPING MACHINES.

For Clipping Horses, Mules and Cows.
F. O. B. Chicago.

No. 3—Exposed gear machine with exposed fly wheel, easy running, but not ball bearing, complete with 6 ft. of flexible shaft and single tension, Stewart Clipping knife and handle of highest grade, w't each boxed 34 lbs., each **F J J** $6.50

The small wheel being exposed on this machine and being devoid of all ball bearings, contribute to make the machine low priced. The balance wheel having the same speed as the shaft makes it necessary to have a larger fly wheel than is used on the Stewart No. 1 Ball Bearing Clipper. The latter clipper is higher in price and is preferred by many.

ONE DOZEN IN A BOX.

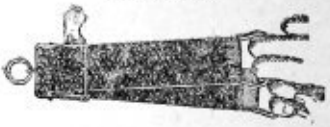
SUNASACK AUTOMATIC STROPPERS.

No. 16—Complete with full length strop 2½ in. wide, and 2 blade holders, metal parts nickel plated, per dozen .....**ADDJ** $24.00

Adapted to all styles of safety razor blades and has a special holder for [illegible] *and* [illegible] *blades. Particularly adapted for old style razors giving a shaving edge that cannot be produced by any human hand.*

The strop is of the lightest weight of firm leather cut from the best part of the hide and will not stretch. It is of a close grain filled with a mineral that gives a smooth, cool cutting edge and benefits the razor blade. No more round edges.

ONE IN A BOX; ONE DOZEN IN A CARTON.



NEW IMPROVED ZIG-ZAG STROPPER.

No. 080—New Improved Zig-Zag, all metal frame, black enameled hard wood handle, non-slipping grip with patented device which absolutely prevents cutting of razor strop, 14 in. black zig-zag razor strop of highest quality specially treated leather, complete with auxiliary blade holders for holding Gillette, Ever Ready, [illegible], [illegible] and other safety razor blades, per dozen .....**JIFJ** $16.00

ONE-HALF DOZEN IN A CARTON.

VICTOR AUTOMATIC STROPPER.

Victor, complete with full length specially prepared soft leather strop, 2 in. wide, and two blade holders, one for blades having holes or slots and the other for plain blades, metal parts nickel plated, per dozen **JIFJ** $16.00

The Victor stropper is mechanically perfect. It will sharpen both wafer and hollow ground blades to the same perfect edge.

Sharpens any safety razor blade made.

ONE IN A BOX.

[illegible] HAND STROPPERS.

For Stropping [illegible] and [illegible] Safety Razor Blades.

No. 150 [illegible]—Length 6 in., metal tubing, heavily silver plated, fitted with an ingenious spring device which securely holds the blades while stropping.....per dozen **AHJ** $3.00

This stropper is so designed as to produce a fine razor edge by a few simple strokes on the strop. The best 25 cent retailer on the market.

WE DO NOT BREAK CARDS.

SAFETY RAZORS.

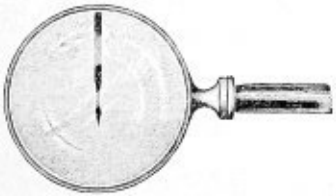
REGARDLESS OF PRICE, NO BETTER RAZOR MADE.

Showing Razor Assembled.

Display Box of Half Dozen Safety Razors.

Flexible Leather Case with Razor.

The Safety Razor is the top notch of Safety Razor art.
The construction is the simplest, having but three parts, the head, handle and blade.



HEAD—The special feature of the Safety Razor is the plain, smooth or sanitary guard. The head is made in a die, not stamped. The plain toothless guard smooths the skin so that the blade is shaving on a level, in very much the same manner that a barber stretches the skin to make it smooth. It also prevents any irregularities o fthe skin from striking the blade.

The head is so beveled and adjusted that when placed against the face, the razor naturally takes the correct angle for producing the diagonal stroke necessary for clean and comfortable shaving.

HANDLE—The Handle has closed ends, no opening for lather or dirt to accumulate, making it the most sanitary of razors.

Illustrating Magnified Section of Blade Showing Double Hollow Grinding.

BLADE—Blades are made from a special grade of Norwegian steel, rolled in Sheffield, England, and are double hollow ground, hand honed and stropped. The tempering, grinding and honing are done by experts.

With an Safety Razor, a clean, satisfying shave is the work of but a few minutes.

The Safety Razor, with 6 blades, is put up in a handsome flexible leather case convenient to carry in the vest pocket.

No. 200—Triple silver plated, complete with black flexible leather case and 6 blades...per dozen **JIFJ** $16.00

CARBORUNDUM RAZOR STROPS.

Carborundum Razor Strops are made from the finest of selected horse hide, hand-buffed and finished. The sharpening sides of the strops are corrugated and into the corrugations and into the texture of the leather the finest hand-washed Carborundum Powder is worked.

This feature, which is only found in Carborundum Strops, brings the dullest razor to an edge after but two or three strokes. The strops are fitted with new, novel and practical hardware and will retain their pliability for years.

SHOWING CORRUGATIONS AND CARBORUNDUM POWDER UNDER MAGNIFYING GLASS.

No. 225—Assortment consists of one new Hohner display card, with one dozen harmonicas, to retail at 25 cents each. The harmonicas are made up in three different styles, with an assortment of keys in each display, per ass't **BDJ** $4.03

No. 235—Assortment consists of one new Hohner display card, with one dozen harmonicas, to retail at 35 cents each. The harmonicas are made up of the 5 best selling styles in the Hohner line, and there is an assortment of keys on each card .....per assortment **CJJ** $4.99

No. 250—Assortment consists of 1 new Hohner display card, with one dozen harmonicas to retail at 50 cents each. The harmonicas are made up of 5 different styles, which are selected from the best sellers. In each assortment there will be found all the different keys required, per assortment .....**DFJ** $7.68

The stand is a masterpiece of both the artist's hand and originality. It is lithographed in four colors and gold, and supported by a substantial easel. The harmonicas are fastened on new patented clamps, which hold the goods firmly and display them to advantage.

No. 200—Lyre Harminoca Assortment, combining a very attractive harmonica stand, made in the shape of a lyre, size 19x21 in., and an assortment of 12 Hohner harmonicas consisting of 4 instruments to retail at 25 cents each, 3 to retail at 35 cents each, 3 to retail at 50 cents each, 1 to retail at 75 cents and another to retail at $1.00. The dealer sells the harmonicas for $5.30, making a profit of about 90% as well as being put in possession of a fine harmonica stand, which can be used for years .....per assortment **DAE** $6.91

HARMONICA ASSORTMENTS.

No. 600—Consisting of a display stand and following harmonicas.....per stand and assortment **AECJ** $25.52

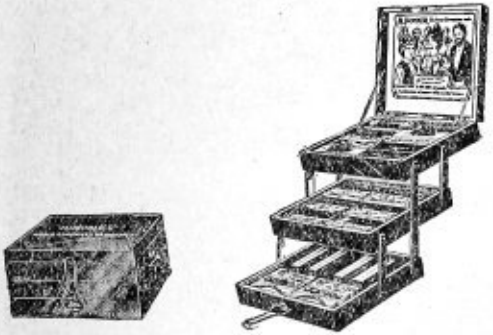
12 assorted harmonicas, retail value	$0.25	....$ 3.00
8 assorted harmonicas, retail value	.35	.... 2.80
8 assorted harmonicas, retail value	.50	.... 4.00
4 assorted harmonicas, retail value	.75	.... 3.00
4 assorted harmonicas, retail value	1.00	.... 4.00
Total retail value		....$16.80

This revolving display stand furnishes to the retail dealer an ideal method of displaying his harmonicas. The stand is obeliscal in shape, mounted on a metal disc connected by means of a cylindrical bar to a set of durably constructed clockworks of sufficient strength to revolve the obelisk for over 3½ hours by one winding.

The entire stand is furnished in a deep rich mahogany piano polish with very attractive silver pressings and having the number and retail price of each instrument stenciled in neat design. Its extreme measurements are 32 inches high by 10½ inches square at the base, and 6¾ inches square at the top.

On the obelisk is fastened by means of steel clamps and supports a quantity of thirty-six genuine Hohner Harmonicas in the keys of A, B, C, D, E, F and G, with a variety of twenty different styles. Each instrument is an excellent seller and is bound to meet with instantaneous success.

HARMONICAS AND JEWS' HARPS.



GENUINE HOHNER HARMONICAS.

No. A25—Hohner Harmonica Assortment, consisting of 12 Hohner harmonicas, put up in a handsome display case, to retail at 25 cents each, assorted styles, in seven different keys .....per assortment **BDJ** $4.03

No. A50—Assortment of 12 harmonicas to retail at 50 cents each, otherwise same as No. A25, per assortment **DFJ** $7.68

DISPLAY CABINETS.

No. 400—New Hohner, collapsible, consists of a three tray cabinet of best seasoned wood, beautifully finished in dark mahogany piano polish, opened and closed in a moment's time, contains 38 pieces of the best selling Hohner harmonicas, assorted in 16 different styles, all keys,

16 assorted harmonicas, retail value	$0.25	$4.00
12 assorted harmonicas, retail value	.35	4.20
10 assorted harmonicas, retail value	.50	5.00
Total retail value		$13.20
Per cabinet and assortment		AJCJ $17.86

When the cabinet is open, the harmonica display is exceptionally attractive, exhibiting the entire contents of 38 harmonicas at one time and showing them to great advantage. When closed, it resembles an elaborate jewel case and occupies less than a square foot of space.

The cabinet costs the dealer nothing and, besides, he is the gainer by 50%.

NUT CRACKS, CHILDREN'S SETS AND MOIETS.

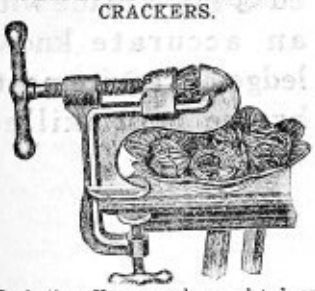
NUT CRACKS.

No. 40—Greatest length 6¼ in., greatest width 1⅞ in., made of malleable iron—cannot break—beautifully nickel plated, w't per doz. 6 lbs., per dozen .....**DHJ** $8.00

This nut cracker is hinged at four points, and the resulting powerful leverage, makes the cracking of a nut so easy that even small children can use the Rollman nut cracker.

ONE IN A BOX; ONE DOZEN IN A PACKAGE.

DOUBLE-KAY NUT CRACKER.



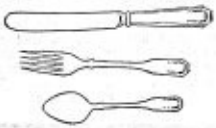
Cracks Nuts On the Ends, Makes the Kernels Come Out Whole, Eliminates Nut Picks.

No. 50—Greatest length 5¾ in., greatest width 2¼ in., spring steel backs, and weighted steel jaws, all nicely polished, w't per doz. 5 lbs., per dozen .....**BDJ** $4.00

Any one can operate it. Cracks all kinds of ordinary table nuts, such as pecans, hazelnuts, walnuts, and hickory nuts, without the use of a hammer. Can be used in the kitchen, on the train or in the country.

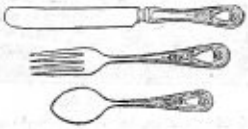
ONE IN A BOX, ONE DOZEN IN A PACKAGE. RETAILS FOR TWENTY-FIVE CENTS EACH.

PERFECTION PECAN NUT CRACKERS.



Perfection—Heavy malacca plated on solid wrought metal frame, size closed 6x6 in., per doz. **JGBJ** $12.00

The Perfection Sheller at first did not create a great deal of interest, as many thought that the screw clamp would prove a slow process. It has been proven, however, that the clamp can be quickly moved forward or backward an inch or more with a slight stroke on the handle, and the screw clamp cracks every size pecan absolutely perfect. In addition to this the clamp can be stopped within a thousandth of an inch when the pecan is properly cracked without crushing same.



CHILDREN'S SETS.

On orders of not less than one gross (12 sets) Solid Nickel Silver Knives and Forks, we will etch the customer's name and address on the blades without extra cost, provided the name runs in straight lines and has no curved or odd shaped trade mark. Shipment can be made within three weeks from receipt of order. If customer desires his own or other name stamped in the handle instead of etched on the blade, there will be an extra charge for the steel stamping die of 85 cents per letter.

Where the goods are ordered to be stamped with a steel die, spoons can also be stamped without additional cost.

ALUMINUM WARE.

KNIVES AND FORKS.

No. 222—Medium knives and forks, consisting of six knives, with light, large size polished aluminum handles, and full polished crucible steel cimeter blades, ground to a keen cutting edge, and six heavy weight solid nickel silver medium forks, per set .....**BDJ** $4.00

No. 223—Medium knives only, per dozen .....**BDJ** $4.50

These knives have the appearance of regular full size hollow handle goods and are very light, making an exceptionally neat knife for every day use. As neither knives or forks have any plating or other application to wear off, they will last indefinitely.

ONE-HALF DOZEN KNIVES IN A BOX; SIX KNIVES AND SIX FORKS IN A BOX

ALUMINUM HANDLED STEAK KNIVES.

No. 224—Medium knives, full size, attractive solid aluminum handles, octagon shaped with pointed end, blade of the finest crucible steel specially shaped for cutting meat, per dozen .....**CFJ** $6.00

These knives are of the highest quality, of the best workmanship and gotten out to meet the demand for good attractive steak or meat knives for both the household and restaurant use.

ONE-HALF DOZEN IN A BOX.

OVD SILVER PLATED WARE.

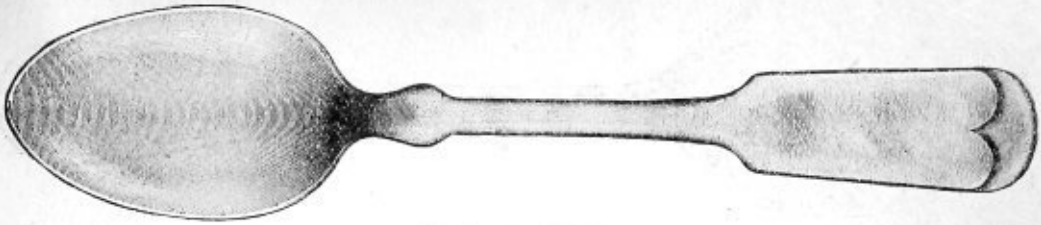
Pilgrim.
Patented 6–20–1911.
See pages 1768 to 1770

Ivanhoe.
Patented 6–20–1911.
See pages 1771 to 1773.

Heather.
Patented Feb. 25, 1913.
See pages 1774 to 1774B.

Our line of OVD Silverware consists of five distinct patterns.

We have added to this line many details whereby it excels all others for quality, elegance and artistic appearance.



Every item is packed in handsome boxes as shown on the preceding page, and has a heavy, pure silver plate on the highest quality solid white nickel silver.

OVD Silverware is unconditionally warranted.

Any article desired can be furnished in the Pilgrim, Ivanhoe and Heather patterns, as illustrated complete on pages 1768 to 1774C.

SILVER PLATED WARE.

SPOONS AND FORKS.

Patented June 20, 1911.

Embodied in our IVANHOE pattern is a combination of those three truly Colonial attributes, Beauty, Simplicity and Strength. The simple Colonial wreath is finished in a dark French gray, the balance of the handle being toned off in a lighter gray which gives an artistic appearance unsurpassed by the finest sterling silver. This pattern is so suggestive of the tableware used during the time of Sir Walter Scott that it seems highly proper that it be designated as the IVANHOE.

OVB SILVER PLATED WARE.

Patented February 25, 1913.

In designing our Heather pattern we have obtained a striking effect never before equaled on a heavy weight blank, such as used in this line.

The handle has a pronounced beveled edge from tip to bowl, and the simple Heather design placed on the bevel is unsurpassed in detail and clearness. The handle finished in a delicate French gray with a highly burnished bowl produces a very pleasing effect.

"ICY-HOT" BOTTLES.

Keep Contents Hot 24 Hours in Winter—Keep Contents Cold 3 Days in Summer—Without the Aid of Chemicals.

The "Icy-Hot" Bottle is a bottle within a bottle with a vacuum between. The vacuum is a non-conductor of heat and cold, and the heat or cold of the outside air cannot reach the contents. The glass vacuum bottle is placed inside metal casing, surmounted by a drinking cup, which also holds the cork in place. Being made of glass, the bottles are absolutely sanitary and are easily cleaned.

EVERY BOTTLE TESTED AT THE FACTORY BEFORE SHIPPING. MUST KEEP WATER STEAMING HOT FOR TWENTY-FOUR HOURS, REGARDLESS OF OUTSIDE TEMPERATURE.

No. 30C.

"REGULAR" PATTERN, Demountable, Strong Metal Case of Superior Jewelry Finish, High Grade, Center Tipped Glass Filler Held in Place by a Heavy Rubber Ring at the Neck, and an Ingenious Spring Device at the Base, Can Be Instantly Removed by the User for Sterilizing or for Replacing in Case of Breakage. Filler Cushioned to Lessen Danger of Breakage from Sudden Jars or Jolts.

No. 30C—1 pt., nickel plated case, each .....BAJ $2.50
No. 70C—1 qt., nickel plated, each .....CCE $4.00
No. 31C—1 pt., nickel plated casing, trimmed with Morocco leather in red, black, brown, green, wine or tan, each .....BIE $3.50

For extra fillers see Nos. 58, 98, 45 and 85, last column on this page.

NOTICE—Regular pattern bottles bearing the above numbers will not take old style side tipped fillers, with which the regular pattern bottles were formerly equipped.

ONE IN A CARDBOARD BOX.

Two No. 30C pt. size Icy-Hot bottles, each $2.50.....$5.00
One small Icy-Hot lunch box, nickel plated .....each $1.00
One russet leather carrying case, highest quality, lined with green velvet .....each $6.00
Per outfit.....**AJAJ** $12.00

No. 19½—Outfit consists of the following—
Two No. 70C qt. size Icy-Hot bottles, each $4.00.....$8.00
One large Icy-Hot lunch box, nickel plated .....each $1.50
One russet leather carrying case, highest quality, lined with green velvet .....each $9.00
Per outfit.....**AEEE** $18.50

No. 20—Outfit consists of the following—
One No. 70C quart size Icy-Hot bottle, each $4.00
One No. 740 quart size Icy-Hot jar, each $4.50
One large Icy-Hot lunch box, nickel plated .....each $1.50
One russet leather carrying case, highest quality, lined with green velvet, each $9.00
Per outfit.....**AEIE** $19.00

Auto parties and picnicers find these outfits the most convenient for carrying luncheons.

The carrying cases are well protected and easy to handle. They are dust, rain and weather proof.

"ICY-HOT" JARS.

No. 740.

The "Icy-Hot" Jar is constructed upon the same principle as the "Icy-Hot" Bottle, consisting of a demountable filler in a highly finished nickel plated casing. It is for the purpose of keeping solid food Hot or Cold indefinitely. The opening is large enough to allow removing contents with a large spoon. It will keep ice cream frozen without ice and keeps meat and vegetables hot without fire, whichever way they are put into the jar. Invaluable for after-theatre parties and luncheons. Creamed sweetbreads and escalloped oysters can be kept hot ready to serve.

Demountable, Can Be Repaired By the User.

No. 240—1 pt. size, fitted with a special cork with wire spring top, each .....**BAJ** $2.50
No. 740—1 qt. size, otherwise same as No. 240.....each **CHJ** $4.50

EXTRA FILLERS.

No. 245—1 pt. size, for No. 240 Jar, each .....**AGJ** $2.00
No. 745—1 qt. size, for No. 740 jar, each .....**BEE** $3.00

ONE IN A CARDBOARD BOX.

"ICY-HOT" CARAFE.

No. 515.

The "Icy-Hot" Carafe is constructed upon the same principle as the "Icy-Hot" Bottle and consists of a demountable filler in a highly artistic casing of beautiful design. Nickel plated and polished like the finest silverware. An ideal water bottle for the dinner table. Dispenses with ice in water glass and replaces ice water pitcher with its lump of often impure ice.

Water should first be cooled by placing on ice in an ordinary bottle, then transfer to the "Icy-Hot" Carafe, which will keep it cool 72 hours. Prevents contamination of pure water by germs in the ice.

If filler is broken, it can be replaced by the user at home.

No. 515—1 qt. capacity, fitted with cork stopper with nickel plated metal top and German silver chain, w't each 1¼ lbs.....each **CHJ** $4.50
No. 516—3 pt. capacity, otherwise same as No. 515.....each **EJE** $6.00
No. 505—Extra fillers for repairing No. 515 Icy-Hot carafe, with stopper, each .....**BIE** $3.50
No. 506—Extra fillers for repairing No. 516 Icy-Hot carafe, with stopper, each .....**CHJ** $4.50

ICY-HOT SPECIALTIES.

ICY-HOT CARAFES WITH PROTECTED NECKS.

Strong Metal Case, Nickel Plated and Beautifully Finished. Metal Covering Entirely Encloses Glass Filler Even at the Neck.

No. 780—1 quart size, w't boxed 5½ lbs., each★ .....**DBJ** $5.00
No. 781—3 pint size, w't boxed 7¼ lbs., each★ .....**EIJ** $7.00
No. 782—2 quart size, w't boxed 12 lbs., each★ .....**FGJ** $8.00
No. 783—3 quart size, w't boxed 12 lbs., each★ .....**JHDJ** $10.00

Practically unbreakable. Soft rubber cushions support the glass filler at two points, and spiral spring at bottom protects it against breakage caused by jolts of setting down too heavily or dropping.

A rubber ring at the neck prevents breakage if upset; also the selected filler has asbestos supports between the outer and inner walls to protect the filler against breakage at the neck.

Flat base. Completely demountable. The filler can be easily removed for the purpose of cleaning, etc.

ONE IN A CARDBOARD BOX.

EXTRA FILLERS.

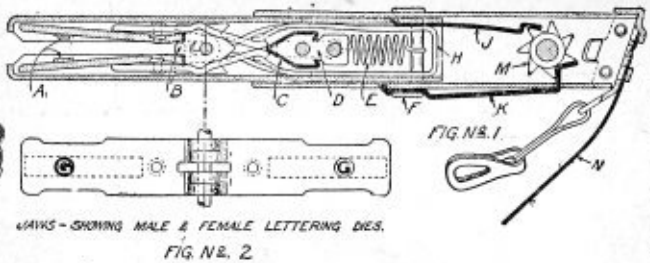
HARDINGE PORTABLE PATROL WATCHMEN'S CLOCKS.

Approved and listed by the National Board of Fire Underwriters, each clock is inspected and labeled by the underwriters' laboratories.

The Hardinge clock is guaranteed and sent out on approval

Clock Showing Leather Pouch and Strap.



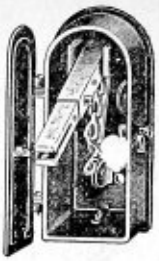


FIG. NO. 1.

JAWS - SHOWING MALE & FEMALE LETTERING DIES.

FIG. NO. 2

Sectional View of Patent Station Key.

Station Box Showing Key in Position.

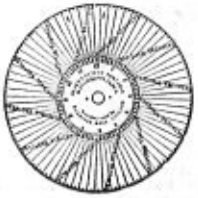
The Hardinge Patrol Clock was designed and perfected to furnish a simple, durable, flexible, interchangeable, absolutely tamper-proof system for keeping a check on watchmen. It is the latest development in the watch clock field and contains patented features which make it superior in every way to all other systems; to electrical clocks because the initial expenditure is less and the cost of up-keep practically nothing, whereas with electrical systems the wiring has to be inspected and renewed from time to time and the batteries renewed or the magnetoes overhauled in order to keep them in good condition; to other portable clocks because there is practically no cost of up-keep, whereas with others, owing to the fact that the male dies on the keys are exposed, they soon become worn and it is necessary to purchase entire new sets of keys.

Hardinge Portable Patrol Watchmen's Clock, consisting of full jeweled movement, the best made for this purpose, fitted in a fine spun aluminum case, 4¼ in. dial, w't 2¾ lbs., complete with leather pouch, carrying strap and two years' supply of dials, but without station keys and boxes	each	**CFJJ**	$60.00
Lock Station Boxes and Patent Station Keys, complete	"	**CFJ**	6.00
No. 1—Extra dials one year's supply (375 dials)	per lot	**BDJ**	4.00
No. 3—Extra dials, three years' supply (1125 dials)	"	**JFJJ**	10.00

All of the following points are unique with the Hardinge Patrol System and are not found in any other.

It is the Most Simple—Because the clock itself contains no recording mechanism—nothing but the movement, the detective lock and a guide for the key.

Movement is Interchangeable—That is, it can be taken out and replaced by anyone in a few moments time, thus allowing of a new movement being sent when the old one needs cleaning, or in case of accident. This is very important as it prevents any interruption to the service. Should occasion arise a new clock can be sent which will work on your keys. The movement is fastened to the case in such a manner so that it will not be injured should the clock be dropped or otherwise abused.



The Patent Station Key (illustrated in figure No. 1, sectional view) is the vital part of this system. The mechanism in each key is simple, protected from weather, dust, tampering and the most important of all the wearing of the embossing letter. The key can only be made with an expensive special set of tools SO THAT DUPLICATION IS PRACTICALLY IMPOSSIBLE.

The Best Feature of this Key—Is the fact that it has the male and female die within the key (see figure No. 1 at A). Owing to this fact, each key is a unit in itself and consequently ANY NUMBER OF KEYS CAN BE USED WITH A SINGLE CLOCK FROM 1 TO 96, AND STATIONS CAN BE ADDED TO A SYSTEM AT ANY TIME, WITHOUT IN ANY WAY INTERRUPTING THE SERVICE OR WITHOUT THE NECESSITY OF REPLACING THE CLOCK. BUY AS MANY STATIONS AS YOU ACTUALLY NEED TO BEGIN WITH AND ADD OTHERS AT ANY TIME AS YOUR REQUIREMENTS DEMAND.

Another Valuable Feature of this Unit Key Arrangement is the fact that should one key be totally destroyed, it in no way affects the balance of the system as the watchman is still compelled to make his rounds, missing only the affected station, which can be returned by mail for over-hauling.

The detective lock punctures the paper dial both when the clock is opened and closed, and is an absolute guaranty against tampering.

The dial illustration herewith shows the greatest improved feature ever added to a watch clock system, which is unique with the Hardinge that is having each set of keys produce a different record so that there are no duplicate sets made. This is accomplished by using some portion of the firm name, or any word or words that may be desired. Each key embosses one letter on the paper dial. The accompanying illustration shows

record produced by a 16-station clock. All other systems use a stock set of figures and consequently each set of keys is an exact duplicate.

A 12-hour paper dial is ordinarily used because the record is more distinct. 24 hours dials can be furnished when specified.

THE CARE OF GUNS.

A FEW SUGGESTIONS.

We have known of hunters and sportsmen who thoughtlessly made use of a gun as a cane, crowbar or any one of the many implements which are occasionally in demand. Such usage will frequently result in the bending of the barrel or the filling of the muzzle with dirt, which will cause a barrel to swell when a shell is discharged and in general disarrange the efficiency of the arm.

Firearms should always be cleaned and oiled as soon as possible after using. Clean the barrel from the breech. If cleaned from the muzzle, this end is apt to become distorted and the accuracy of the arm impaired. Before putting the arm away for a considerable length of time, it is a good idea to wash the interior of the barrel with hot water and soap and after it has been dried until every particle of moisture is removed, oil thoroughly with some good quality of gun oil. Use a light coating of oil on the outside of the arm and keep in a dry place where it will not be subjected to moisture or acids of any kind and the arm may be kept for years without rusting.

If the shotgun becomes leaded in such a manner that it cannot be cleaned in the above described way, use a RIVAVOC brass cleaning rod equipped with a RIVAVOC cleaner, made for the purpose of removing leading; then clean as above.

Do not allow any foreign substances to become lodged in the barrel, either through cleaning or carelessness.

Nitro powder should not be used in black powder grade shells, as the bursting at the breech is almost without exception due to this combination.

Shot will "chamber" when they will lie side by side, filling the bore.

Never snap a lock. Let the hammer down with the thumb.

Never force the fore end off with the "claw of a hammer." Hold the gun in the right hand, grasp the tip of the fore end with the left and strike the under side of the muzzle on some wooden object.

Do not use sweet oil, castor oil, or any other vegetable oil on a gun.

BURSTED BARRELS.

We frequently receive complaints with reference to gun as well as rifle barrels becoming swollen. All experts in the manufacture of firearms agree that in ninety-nine cases out of one hundred, the cause of this damage is due to some obstruction being in the barrel when the gun or rifle is fired. The following was taken from the catalogue of a well known rifle manufacturer:

"Never shoot a rifle, or a weapon of any kind, while there is an obstruction in the barrel, such as a bullet, piece of cloth, dirt, etc. If fired under these conditions, in almost every instance the air is compressed at the point of obstruction, giving a very high pressure at this point, causing the barrel to swell and forming a bulging ring which destroys the accuracy of the barrel. We have seen a .22 caliber barrel, the metal of which was one inch in diameter, so badly swollen that the ring could be felt by passing the finger along the outside of the barrel, when the cartridge used was only the .22 short with its three grains of black powder and 30 grain lead bullet. Sometimes the ring is perfect, extending entirely around the barrel, but more often the obstruction is only partial and the swelling only a section of a ring. In small bores using high pressure military smokeless powders, the pressure induced is sometimes great enough to cut the barrel entirely in two. This accident is an unfortunate one, as it often happens from no fault of the user. The results are characteristic, and so different from any accident resulting from a flaw or seam in the barrel, however, that the cause is always known to an expert, for in no other way can a ring or powder swell be produced.

Firearm manufacturers invariably refuse to accept any responsibility for damage of this kind, and we therefore cannot replace the arms. Settlement with a customer should not be made under any circumstances until our experts have had a chance to examine the arm and render an opinion as to cause for damage.

Our gunsmiths will make repairs of every kind at reasonable prices. Years of experience in boring barrels, reboring, etc., count for something.

ENCYCLOPEDIA OF GUN PARTS.

Action—The Action of a Gun is the mechanism in the frame composed of parts necessary in firing and operating.

Barrels—The part through which the projectile is forced. Classified as Damascus, Laminated, Twist, Blued Steel, Imitation Damascus, Imitation Twist.

Genuine Damascus Barrels are made by welding together sheets of steel and iron alternately, which are cut into bars, then twisted and welded together on a mandrel. Laminated or Twist are made under very much the same process with the exception of the reverse twist. Imitation Damascus and Twist Barrels have a photographed figure put on by a transfer process.

Bolts—Action or Locking Bolts lock the Barrel and Frame together.

Bore—The hole in the barrel. (See Choke and Gauge.)

Breech—The end of the Barrel nearest the Action. Sometimes the Breech is a separate piece into which the Barrel is screwed.

Butt—That part of the Stock which rests against the shoulder.

Chamber—Portion of the Barrel into which the loaded shell is inserted.

Checkered—Made rough by cross lining.

Choke—A formation of the Bore to draw the shot together at the Muzzle. There are two degrees of choke, Full and Modified. A Cylinder Bore diameter is the same from end to end. A Taper Choke Bore gradually diminishes toward the Muzzle. In a Jug Choke the gauge is increased for a short distance and again contracted near the Muzzle.

Comb—Raise in the Stock back of the Grip.

Drop—Distance from the line of sight to top of Butt Plate. Drop is measured by placing a "straight edge" on the rib, letting it extend over the Stock, measuring from the top of the Butt Plate to the Straight Edge.

Ejector—Mechanism at the Breech which throws out the empty shell automatically as Gun is broken.

Extractor—Part that extracts the empty shell only partially from the Chamber.

Firing Pin—A small pin which when struck by the hammer fires the primer.

Fore End—Part underneath the Barrel on which the hand rests in aiming and which locks the Barrel to the Action, making a hinge joint. Snap Fore End is one that fastens to the barrel automatically with a spring catch.

Frame—The iron part which contains the Action.

Gauge—Diameter of bore. Determined by the number of balls to the pound. For example, a 12 gauge will take a round lead ball of that size of which it takes twelve to weigh a pound.

Grip—The hand hold of the Stock. (See Stock.)

Hammer—Part which strikes the Firing Pin or Cap when gun is discharged. A Hammer is measured from center of hole where it fastens on the tumbler to center of strike where it hits the plunger or cap.

Lever—Part that works the Bolts in locking or unlocking the Gun. Top Lever is one working on top of frame and Side Lever working on side.

Line of Sight—Imaginary line between the eye, sight and object aimed at.

Lock—Part of the mechanism used in discharging the Gun. Rebounding Lock is one where the Hammer rebounds after striking the Firing Pin. A Bar or Front Action Lock has the mainspring in front of the Hammer, while the mainspring of a Back Action Lock is back of the Hammer.

Mainspring—Spring that operates the Hammer.

Muzzle—That end of the Barrel from which the projectile is discharged.

Rib—Bar forming the line of sight to which the Barrels are brazed. Extension Rib is one which projects beyond the Barrel at the Breech into the Frame.

Safety—Automatic catch in the Lock to prevent the premature discharge of the Gun.

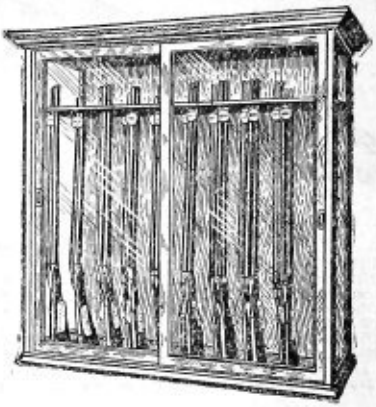
Stock—The portion of the Gun between the frame and shoulder when in positon for firing. A Stock is Straight when hand grip is straight, Pistol Grip when Grip is fashioned like the stock of a pistol and Half Pistol Grip when partially so finished.

Length of Stock is measured from the middle of front Trigger to middle of Butt Plate.

Tang—Projection of the Frame into the Stock.

Trigger—The part that disengages the Sear from the Tumbler in the act of firing. They are right or left according to position. Trigger Pull is the number of pounds pressure on the Trigger necessary to discharge the Gun.

Tumbler—Ratchet shaped piece on interior of Lock connecting with the Hammer and also with the Mainspring by a Swivel.



Water Table—A projection on the underside of the Breech, its purpose being to keep water from the Action in case the Gun is carried in a storm.

REVONOC GUN SHOW CASES.

These cases are modern in design, insuring an attractive display with the greatest economy of floor, counter or wall space. The construction is of REVONOC quality throughout.

No. 1 REVONOC—Wall case, substantially made of selected oak, beautiful golden oak finish, lined with black felt, double strength glass ends, double strength glass sliding doors that move on ball bearings and steel track, width outside at bottom 4 ft. 3 in., width inside 3 ft. 9 in., depth outside at bottom 20 in., depth inside 16 in., height outside 4 ft. 4 in., height inside 4 ft. 2 in., spaced for 19 guns or large rifles and 10 small rifles, adapted especially for wall, can also be used on counter or in center of store, weight, crated 212 lbs. .....each $40.00

We offer this as an excellent and suitable case for retailing guns and rifles. It is built for convenience and serviceable use. It should strongly appeal to our customers.

Either No. 1 REVONOC or No. 2 REVONOC case will be given free of charge with $400.00 worth of the following Guns, Rifles, Canvas and Leather Goods, etc.

REVONOC Guns,
"Cruso" Guns,
L. C. Smith Guns,
A. H. Fox Guns,
Ithaca Guns,
Stevens Guns,
Harrington & Richardson Guns,
Hopkins & Allen Guns,
Iver Johnson Guns,
Remington Guns,
Marlin Guns,
Marlin Rifles,

REVONOC Rifles,
Hopkins & Allen Rifles,
Stevens Rifles,
Remington Rifles,
Savage Rifles,
REVONOC Canvas Goods,
REVONOC Leather Goods,
Cruso Canvas Goods,
Cruso Leather Goods,
Gun Implements,
Decoy Ducks and Duck Calls,
REVONOC Dog Goods.

No. 2 REVONOC—Hexagon revolving case, of selected oak, golden oak finish, double strength glass sides, solid top and bottom, one door with lock and key, height 55 in., diameter 33 in., inside fitted with revolving adjustable rack, lower platform holding 12 shot guns or large rifles, upper platform accommodating 12 shorter rifles, w't crated 225 lbs. .....each $40.00

This case is especially designed for stores lacking sufficient wall space to accommodate our No. 1 wall case. As will be seen by the illustration and size given above, it requires very little room and can, therefore, be conveniently placed in the front of store or on the counter, displaying guns and rifles to the best possible advantage.

IF A CUSTOMER CANNOT BUY THE REQUIRED AMOUNT OF GOODS ENUMERATED AT ONE PURCHASE, but desires one of the show cases, we will ship and **CHARGE AT $40.00**, and on the bottom of the bill note the following contract—

CONTRACT—We desire to make plain that in sending either of the above cases and charging to your account, said CASE MUST BE PAID FOR at the maturity of this invoice. We will credit your account with $40.00 for No. 1 or No. 2 gun cases, when you have purchased $400.00 worth of guns and accessories specified on this page, **provided said purchases are made within one—1— year** from the date of this bill.

REVONOC DOUBLE BARREL SHOT GUNS.

HAMMER.

American Machine Made, Guaranteed for Smokeless Powders.

No. 115 REVONOC—12 gauge, decarbonized blued steel barrels, extractor, Pieper reinforced breech, finely matted, flat hollow rib, with extension bite, low circular rebounding hammers, blued frame, blued trigger guard, nitro plungers, plain walnut checkered full pistol grip stock, capped, patent snap, checkered hunting fore-end, rubber butt plate, 30 or 32 in. barrels, both barrels full choke bored, w't about 7½ bs. .....each **AJFE** $18.50

No. 16115 REVONOC—16 gauge, 28 or 30 in. barrels, w't about 6¾ lbs., otherwise same as No. 115 REVONOC ...each **AJFE** $18.50

No. 20115 REVONOC—20 gauge, 28 in. barrels, w't 6 to 6½ lbs., otherwise same as No. 115 REVONOC .....each **AJFE** $18.50

REVONOC *Double Barrel Hammer Guns are well made, accurate, strong and reliable. The best materials are put into them. They shoot and wear well, giving the greatest satisfaction. We guarantee* REVONOC *guns not to shoot loose and to safely fire nitro powders in factory loaded shells. Low in price and equal in every respect to guns costing more money.*

HAMMERLESS.

American Machine Made, Guaranteed for Smokeless Powders.

No. 99 REVONOC—12 gauge, fine quality decarbonized, blued steel barrels, finely matted flat hollow rib with extension bite, heavy lateral bolt through extension rib, extractor, top lever, automatic safety, blued frame, full pistol grip stock, capped, handsomely checkered and nicely finished, hard rubber butt-plate, patent snap fore-end, checkered and carefully finished, 30 in. barrels, left barrel full choke bored, right barrel modified choke bored, w't 7¼ to 7¾ lbs., each .....**ADDJ** $25.00

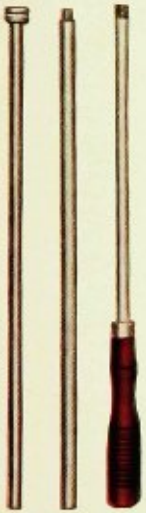
No. 1699 REVONOC—16 gauge, 30 in. barrels, w't 6½ to 6¾ lbs., small lightweight frame, otherwise same as No. 99 REVONOC, each .....**ADDJ** $25.00

No. 2099 REVONOC—20 gauge, 28 in. barrels, w't 6 to 6½ lbs., small lightweight frame, otherwise same as No. 99 REVONOC, each .....**ADDJ** $25.00

HAMMERLESS.

American Machine Made, Guaranteed for Smokeless Powders.

No. 100 REVONOC—12 gauge, fluid blued steel barrels, matted extension rib, automatic safety, top lever, rebounding locks, drop forged, case-hardened frame, selected walnut half pistol grip stock, checkered, selected checkered walnut snap fore-end, both barrels full choke bored, 30 or 32 in., w't 7½ to 7¾ lbs. .....each **AFDJ** $28.50



This REVONOC *hammerless is made for us by one of the best known high grade gun makers in this country and is constructed on the same lines and by the same workmen as their highest grade guns. It is a strong, substantial gun, and will stand the severe test to which all guns are subjected in these days of heavy nitro loads.*

THE PARTS OF AN AMERICAN MACHINE MADE GUN ARE INTERCHANGEABLE.

DOUBLE BARREL SHOT GUNS.

L. C. SMITH HAMMERLESS.

No. 00 Field.

No. 00—Field, armor steel blued barrels, English walnut stock, full pistol grip, checkered and well finished, built for rough usage, 12 gauge, 30 or 32 in. barrels, 16 gauge, 28 or 30 in. barrels, 20 gauge, 28 in. barrels, each .....**BCEJ** $37.00

No. 00A—Field, with automatic ejector, 12 gauge, 30 in. barrels, otherwise same as No. 00 .....each **CCJJ** $47.00

No. 0—Ideal, Damascus barrels in stock, or London special black steel barrels in stock or Damascus for factory shipment only, English walnut stock, full pistol grip, checkered, engraved, well finished, 12 gauge, 30 in. barrels in stock, 10, 16 or 20 gauge for factory shipment only, 20 gauge with London steel barrels only .....each **CEJE** $50.00

No. 0A—Ideal, 12 gauge with automatic ejector, 30 in. barrels, otherwise same as No. 0★ .....each **DEFJ** $65.00

No. 1—Trap, crown steel blued or Damascus steel barrels, English walnut stock, straight grip, checkered, and finely finished, lock-plate engraved with trap shooting scene, 10, 12, 16 or 20 gauge, 20 gauge with crown steel barrels only★ .....**EAAJ** $73.50

No. 1A—Trap, 12 gauge, 30 in. barrels, with automatic ejector, otherwise same as No. 1★ .....each **FAFJ** $86.00

No. 2 Specialty.

No. 2—Specialty, nitro blued steel or Damascus steel barrels, any bore desired, chambered for 2¾, 2⅞ or 3 in. shells, full or half pistol or straight grip to order, selected stock, checkered, finely engraved, 10, 12, 16 or 20 gauge, 20 gauge with nitro steel barrels only, 26, 28, 30 or 32 in. barrels, each★ .....**EIFJ** $83.00

No. 2A—Specialty, with automatic ejector, otherwise same as No. 2★ .....each **GJAE** $100.00

No. 3—Eagle, nitro blued steel or Damascus steel barrels, any bore desired, full or half pistol or straight grip to order, selected stock, checkered, highly decorated, 10, 12, 16 or 20 gauge, 20 gauge with nitro steel barrels only, 26, 28, 30 or 32 in. barrels★ .....each **AAJJJ** $160.00

No. 3A—Eagle, with automatic ejector, otherwise same as No. 3★ .....each **ABBAJ** $175.00

No. 4—Crown, nitro blued steel or Damascus steel barrels, any bore desired, full or half pistol or straight grip to order, fine imported stock, checkered, heavily engraved, 10, 12, 16 or 20 gauge, 20 gauge with nitro steel barrels only, 26, 28, 30 or 32 in. barrels★ .....each **ADGBE** $215.00

No. 4A—Crown, with automatic ejector, otherwise same as No. 4★ .....each **AEIEJ** $225.00

No. 1T—Hunter one-trigger mechanism fitted to Field, Ideal and Trap grades, additional★ .....each **AIBE** $30.00

No. 2T—Hunter one-trigger mechanism fitted to Specialty, Eagle and Crown grades, additional★ ...each **BDGE** $35.00

The above guns range in weights from 5¾ to 10¼ lbs. each.

FOX HAMMERLESS.

No. S75.

No. S75—Fox Sterlingworth Standard, 12 gauge only, 30 in. Sterlingworth fluid compressed steel barrels, American walnut stock with full cap pistol grip, length 14 in., drop at heel 2¼ in., patent snap fore-end, both barrels full choke, w't 7½ to 7¾ lbs. .....each **BCAJ** $35.00

No. SE75—Fox Sterlingworth Standard, automatic ejector, otherwise same as No. S75 .....each **BIGJ** $45.00

No. S1675—Fox Sterlingworth Standard, 16 gauge, 30 in. barrels, w't 6¼ to 6½ lbs., otherwise same as No. S75, each .....**BCAJ** $35.00

No. SE1675—Fox Sterlingworth Standard 16 gauge, 30 in. barrels, automatic ejector, otherwise same as No. S1675, each .....**BIGJ** $45.00

No. F75—Fox Sterlingworth Field, 12 gauge only, 28 in. Sterlingworth fluid compressed steel barrels, American walnut stock with full cap pistol grip, length 14 in., drop at heel 3 in., patent snap fore-end, right barrel modified choke, left barrel full choke, w't 6¾ to 7 lbs. ...each **BCAJ** $35.00

No. FE75—Fox Sterlingworth Field, automatic ejector, otherwise same as No. F75 .....each **BIGJ** $45.00

No. F2075—Fox Sterlingworth Field, 20 gauge, 28 in. barrels, w't 6 to 6¼ lbs., otherwise same as No. F75, each .....**BCAJ** $35.00

No. FE2075—Fox Sterlingworth Field, 20 gauge, 28 in. barrels, automatic ejector, otherwise same as No. F2075, each .....**BIGJ** $45.00

No. DFE.

No. AF—12 gauge, genuine Krupp fluid steel barrels, concave matted rib with rotary bolted extension, handsome dark English walnut stock, pistol grip, Deeley & Edge pattern fore-end, hard rubber butt-plate, automatic safety, perfectly balanced, engraved and finished in every detail, 30 in. barrels, w't 7 to 8 lbs. .....each **CDAJ** $50.00

No. AFE—12 gauge, automatic ejector, 30 in. barrels, otherwise same as No. AF★ .....each **DJGJ** $60.00

No. BF—12 gauge, genuine Krupp fluid steel barrels, concave matted rib with rotary bolted extension, fine selected dark English walnut stock, straight or pistol grip, hard rubber butt-plate, Deeley & Edge pattern fore-end, automatic safety, fine finish and engraving, 30 in. barrels, w't 7 to 8 lbs.★ .....each **DGCJ** $75.00

No. BFE—12 gauge, automatic ejector, otherwise same as No. BF★ .....each **ECIJ** $85.00

No. CFE—12 gauge, automatic ejector, genuine Krupp fluid steel barrels, concave matted rib with rotary bolted extension, selected curly dark English walnut stock, straight or pistol grip, Deeley & Edge pattern fore-end, hard rubber butt-plate, automatic safety, extra fine engraving, checkering and finish, 30 in. barrels, w't 7 to 8 lbs., each★ .....**FGFE** $110.00

No. XE—12, 16 or 20 gauge, automatic ejector, high quality Krupp fluid steel barrels, concave matted rib with rotary bolted extension, dark Circassian walnut stock grained and finish, Silver's recoil pad, straight, half pistol or full pistol grip, Deeley & Edge pattern fore-end, Lyman sights, automatic safety, new design engraving, grip and fore-end finely checkered, 26, 28, 30 and 32 in. barrels, w'ts 5¾ to 8 lbs.★ .....each **JIJBJ** $160.00

No. FK—Fox-Kautzky single trigger mechanism, fitted to any grade Fox gun, new or old, additional, each★ .....**AHAE** $30.00

All Fox Guns shown above can be supplied in 16 and 20 gauges and also in other lengths of barrels at same prices for factory shipment only.

★*FOR FACTORY SHIPMENT ONLY.*

DOUBLE BARREL SHOT GUNS.

PARKER HAMMERLESS.

No. PTF.

No. PTF—Trojan, 12 gauge, imported Trojan steel barrels, matted top rib, American black walnut stock, checkered full pistol grip and fore-end, hard rubber butt-plate, 28 in. barrels, right modified, left full choke bored, length of stock 14 in., drop 2¼ in., w't about 7½ lbs., each ..... **BEJE** $35.00

No. PTS—Trojan, 12 gauge, 30 in. barrels, both full choke bored, w't about 7¾ lbs., otherwise same as No. PTF, each ..... **BEJE** $35.00

No. 16PT—Trojan, 16 gauge, 28 in. barrels, right modified, left full choke bored, w't 6½ to 6¾ lbs., otherwise same as No. PTF ..... each **BEJE** $35.00

No. 20PT—Trojan, 20 gauge, 28 in. barrels, right modified, left full choke bored, w't 6¼ to 6½ lbs., otherwise same as No. PTF ..... each **BEJE** $35.00

No. VH—12 gauge, vulcan blued steel barrels, American walnut stock, checkered pistol grip and fore-end, hard rubber butt-plate, 30 or 32 in. barrels, drop 2¼ to 3 in., length of stock 14 in., w't 7½ to 8 lbs. ....each **CEBE** $50.00

No. VH—16 gauge, 30 in. barrels, w't 6½ to 6¾ lbs., otherwise same as above ..... each **CEBE** $50.00

No. VH—20 gauge, 28 in. barrels, w't 5¼ to 6¼ lbs., otherwise same as above ..... each **CEBE** $50.00

REVONOC REPEATING SHOT GUNS.

AMERICAN MADE.

Take-Down, Full Choke Bored, Guaranteed for Smokeless Powders.

No. 98 REVONOC—12 gauge, 6 shots, smokeless steel barrel, matted breech, highest quality steel frame cut from solid drop forging, blued finish, side ejection, closed top which prevents water, dirt, twigs and other foreign matter coming in contact with mechanism, fine quality American walnut straight grip stock and extra long nicely shaped fore-end, hard rubber butt-plate, chambered for 2⅝ or 2¾ in. shells, length of stock 13½ in., 1⅝ in. drop at comb, 2½ in. drop at heel, length of barrel 30 or 32 in., w't about 7½ lbs.....each **AHDJ** $32.00

No. 1698 REVONOC—16 gauge, 28 in. barrel, w't about 6¾ lbs., otherwise same as No. 98 REVONOC..... " **AIJJ** 33.00

Take-Down, Full Choke Bored, Guaranteed for Smokeless Powders.

No. 98B REVONOC—12 gauge, 6 shots, smokeless steel barrel, full choke bored, take down, **flat top matted receiver,** highest quality steel frame cut from solid drop forging, blued finish, side ejection, closed top, genuine American walnut stock, pistol grip and extra long nicely shaped fore-end, **finely checkered stock and fore-end,** hard rubber butt-plate, chambered for 2⅝ or 2¾ in. shells, length of stock 13½ in., drop at comb 1⅝ in., drop at heel 2½ in., length of barrel 30 or 32 in., w't about 7¼ lbs..... each **BJAE** $35.00

No expense has been spared in making the REVONOC repeater. It has the popular solid top, side ejector and closed-in breech which cannot freeze up with rain, snow or sleet; unlike some other repeating shot guns, the rain cannot run into the action and swell the shells in the magazine. Dirt, leaves, twigs and sand are also excluded. The closed-in breech bolt not only protects the gun and the shooter, but gives a symmetrical breech that aids in sighting and makes possible accurate shooting. The operating parts are few in number and extremely strong. They are accurately fitted and highly finished, giving the quickest and smoothest working repeating mechanism used in any gun. The quick repeat action makes the REVONOC a very effective gun for duck shooting and for shooting "doubles" at the traps.

A heavy locking bolt supports the breechbolt directly back of the shell in the chamber and avoids all cross strains—it is the strongest breech locking device ever invented. An important feature is the special gas channel in the breechbolt which prevents gas from a defective primer blowing back through the action.

Two other safety devices doubly guard against premature explosion and the automatic recoil safety lock positively prevents opening the action while a hang-fire cartridge is exploding. You can hold back the trigger and shoot the gun just as fast as you can work the action, and still be fully protected against hang-fires and premature explosions.

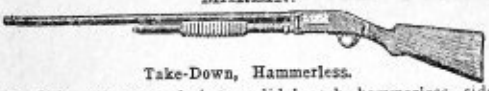
The REVONOC repeater is the safest and most efficient pump gun ever put into the hands of a sportsman.

All REVONOC repeating, single barrel and double barrel shot guns are American machine made.

Machine made guns have parts that are smoothly finished, insuring ease of operation.

Each part is interchangeable. Duplicates can be mailed promptly and will fit to a nicety.

On the other hand, numerous guns, placed on the American market under a domestic name, are of foreign manufacture.



Usually such guns have handmade parts and these, being roughly finished, are not interchangeable.

Machine made guns, then, with uniformity and accessibility of parts, are the choice.

All REVONOC guns are American machine made!

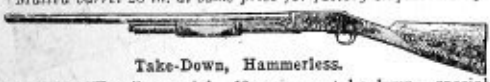
REPEATING SHOT GUNS.

MARLIN.

Take-Down, Hammerless.

No. 28A —12 gauge, 6 shots, solid breech, hammerless, side ejection, special cartridge release mechanism, rolled steel barrel, matted entire length, bored for black and smokeless powders, chambered for 2⅝ in. or 2¾ in. shells, breech bolts, firing pin and other major working parts of oil-treated chrome nickel steel, fine straight grained black walnut butt-stock, and fore-arm, pistol grip stock, 13½ in. long, drop at comb, 1½ in. drop at heel, 2¼ in., handsomely shaped and finished, rubber butt-plate, 30 in. or 32 in. barrel, full choke, w't about 8 lbs.....each **B J I J** $25.00

No. 28AR—12 gauge, 30 in. barrel with raised matted rib, otherwise same as No. 28A.....each **BEF J** $30.00



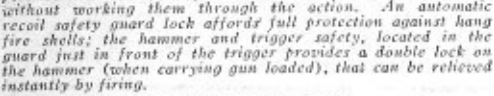
No. 1628A—16 gauge, 28 in. barrel, full choke, double extractors, trigger and hammer safety, chambered for 2¾ or 2 9/16 in. shells, pistol grip stock, 13½ in. long, drop at comb 1⅝ in., drop at heel 2½ in., w't about 6¼ lbs., otherwise same as No. 28A....each **BBC J** $27.00

No. 1628A is a distinct model built smaller and trimmer throughout than the 12 gauge, No. 28A.

No. 2028-A—20 gauge, 25 in. barrel, full choke, chambered for 2¾ in. shells, will handle and shoot effectively all standard makes and styles of 20 gauge loads in regular 2½ or 2¾ in. shells, carries four cartridges in magazine and one in chamber, butt stock 13½ in. long, 1⅛ in. drop at comb, 2⅛ in. drop at heel, hard rubber butt plate, w't each 5⅛ lbs. .....each **BDC J** $27.00

Made in TAKE-DOWN STYLE only; packs in a space the length of the barrel.

Matted barrel 28 in. at same price for factory shipment only.



Take-Down, Hammerless.

No. 28TS—"Trap" special, 12 gauge, take-down, special rolled steel barrel, handsomely matted on top for its entire length, 30 in. barrel, full choke, 6 shots, stock and forearm of fine, straight grained American black walnut, nicely checked on the grip and forearm, straight grip butt stock 14 in. long, drop at comb 1⅝ in., at heel 2 in., with large, broad, hard-rubber butt plate, w't 8 lbs.....each **BDCE** $29.00

No. 28T —"Trap" 12 gauge, raised matted rib, special rolled steel barrel, 6 shots, 30 in. barrel, full choke, action parts highly polished to insure smooth operation, stock and forearm imported Circassian walnut, finely modeled, with London oil finish and fine hand checking, straight grip, 14 in. long with 1⅝ in. drop at comb, 2 in. drop at heel, large broad butt with hard-rubber butt plate, w't 8 lbs.....each **D JAE** $45.00

For the 28T grade a special smokeless steel matted barrel instead of ribbed barrel will be furnished at the same price, or straight grip or pistol grip stock to order, without extra charge, having length from 13 to 14 inches, drop at comb 1¼ to 1¾ in., at heel 2 to 3¼ in., for shipment from factory only.

The prime feature of this gun is the shell release, which permits the removal of loaded shells from the magazine without working them through the action. An automatic recoil safety guard lock affords full protection against hang fire shells; the hammer and trigger safety, located in the guard just in front of the trigger provides a double lock on the hammer (when carrying gun loaded), that can be relieved instantly by firing.

Take-Down, Hammer.

No. 24A—12 gauge, 6 shots, special rolled steel barrel, bored for both black and smokeless powders, chambered for 2⅝ or 2¾ in. shells, frame cut from solid drop forging, blued finish frame, fine straight grained American walnut stock, pistol grip, length of stock 13½ in., drop at heel 2½ in., drop at comb 1⅝ in., length of barrel 30 or 32 in., full choke bored, w't 7½ to 7¾ lbs., each..... **A I H J** $23.25

STEVENS.

Take-Down, Hammerless.

No. 2200—20 gauge, with high pressure compressed steel barrel, full choke bored for nitro powder, drop forged receiver, solid breech matted on top, side ejection, safety firing pin, plain walnut half pistol grip stock, with rubber butt-plate, designed and chambered to shoot any length standard factory 20 gauge loaded shell up to 3 in., length of barrel 28 in., full choke or 26 in. cylinder bore, length of stock 13½ in., drop at heel 2½ in., drop at comb 1½ in., w't about 6½ lbs., each ..... **A I H J** $25.00

Supplied with 26, 30 or 32 in. cylinder, modified or full choke bored barrels for shipment from factory only.

No. 2520—12 gauge compressed forged steel barrel, full choke bored, black oxide finish, solid drop forged receiver, visible loading block, 6 shots, side ejection, walnut pistol grip stock, length 13¼ in., drop at heel 2⅝ in., rubber butt-plate, chambered for any length standard factory loaded 12 gauge shells up to 2¾ in., 30 in barrel, w't about 7¼ lbs.....each **A I H J** $25.00

Supplied with 26, 28 or 32 in. cylinder, modified or full choke bored barrels for shipment from factory only.

NO. 030 GUNS ARE NOT MANUFACTURED WITH LONGER BARRELS THAN 32 IN.

✱*FOR FACTORY SHIPMENT ONLY.*

REVONOC SINGLE BARREL SHOT GUNS.
AMERICAN MADE.

Two-Piece, Heavy Round Breech, Raised Matted Rib.

No. 250 REVONOC—12 gauge, automatic ejector, fine quality blued steel barrel, full choke bored, top snap action, drop forged, case hardened frame, rebounding hammer, walnut stock, checkered full pistol grip, rubber capped, rubber butt-plate, checkered fore-end, nicely finished throughout, 30 or 32 in. barrel, w't about 6¾ lbs., each.....JFJE $10.50

No. 16250 REVONOC—16 gauge, 28 or 30 in. barrel, w't about 6½ lbs., otherwise same as No. 250 REVONOC, each.....JFJE 10.50

This is a strong, serviceable model with distinctive lines brought out by a finish that has beauty in every detail. The raised rib is matted, the special "duck's bill" fore-end and full pistol grip carefully checkered, the grip having the protective rubber cap.

Three-Piece, Heavy Octagon Breech, Matted Barrel.

No. 275 REVONOC—12 gauge, automatic ejector, fine quality nitro blued steel barrel, full choke bored, heavy octagon water table breech, barrel matted the entire length, top snap action, drop forged, case hardened frame, rebounding hammer, patent check hook which prevents gun shooting loose, walnut stock, checkered full pistol grip, rubber capped, rubber butt plate, special "duck's bill" fore-end checkered, beautifully finished throughout, 30 or 32 in. barrel, w't about 7 lbs., each.....JFFE $11.50

This staunchly built arm is designed expressly for the use of nitro powder. The barrel, water table breech and lug are of unusual construction, being forged in one piece, which makes the "foundation of the gun" infinitely strong, increasing its durability and lasting qualities. It is also equipped with the new positive extractor and check hook. This relieves the joint and fore-end of strain.

Three-Piece, Heavy Cannon Breech, Matted Barrel.

No. 298 REVONOC—12 gauge, automatic ejector, blued steel barrel, full choke bored, very heavy "up-set" round cannon breech, barrel matted entire length, top snap action, drop forged, case hardened frame, rebounding hammer, patent check hook which prevents gun shooting loose, half pistol grip, walnut stock, rubber butt plate, special "duck's bill" fore-end, carefully finished throughout 30 or 32 in. barrel, w't about 7¼ lbs., each.....JFFB $11.50

This gun is made for service and will bear the most severe treatment to which a gun is subjected. Built expressly for nitro powder. The barrel, water table breech and lug are of special construction and are forged in one piece, thereby making the gun much stronger than if the lug were brazed to the barrel. It also has the new positive extractor and check hook. This takes the strain from the joint and off the fore-end.

THE PARTS OF AN AMERICAN MACHINE MADE GUN ARE INTERCHANGEABLE.

SINGLE BARREL SHOT GUNS.

CRUSO HAMMER.

American Machine Made, Three-Piece Shot Gun.

No. 205—Cruso, 12 gauge, plain extractor, blued steel barrel, choke bored for nitro powders, top levers, low rebounding hammer, case-hardened frame, pistol grip, plain American walnut stock and fore-end, rubber butt plate, 30 or 32 in. barrel, w't about 6½ lbs.....each **CDE** $6.00
No. 205N—Cruso, nickel plated frame, w't about 6½ lbs., otherwise same as No 205.....each **CDE** 6.00

No. 20210—Cruso, 20 gauge, automatic ejector, 28 in barrel, w't aebout 6 lbs., otherwise same as No. 205....each **CGE** 6.50

THE PARTS OF AN AMERICAN MACHINE MADE GUN ARE INTERCHANGEABLE.

HARRINGTON & RICHARDSON.

Three-Piece.

No. 230—12 gauge, plain extractor, blued steel barrel, choke bored, case-hardened frame, top snap action, metal joint fore-end, rebounding hammer, half pistol grip, fine black walnut stock, rubber butt plate, 30 or 32 in. barrel, w't about 6½ lbs.....each **CFJ** $6.50
No. 16230—16 gauge, 28 or 30 in. barrel, w't about 6 lbs., otherwise same as No. 230.....each **CFJ** 6.50
No. 240—12 gauge, automatic ejector, 30 or 32 in. barrel, w't about 6 lbs., otherwise same as No. 230, each.....**CHE** 7.00
No. 16240—16 gauge, automatic ejector, 28 or 30 in. barrel, w't about 6 lbs., otherwise same as No. 230, each.....**CHE** 7.00

Model 1905—Two-Piece Small Frame.

No. 123—28 gauge, plain extractor, blued steel barrel, case-hardened frame, top lever rebounding hammer, walnut stock, pistol grip, hard rubber butt-plate, 28 in. barrel, w't about 4 lbs.....each **CHE** $7.00
No. 124—44 caliber, plain extractor, adapted to either 44 W. C. F. shot cartridges or 44 XL shot cartridges, 26 in. barrel, w't about 4½ lbs., otherwise same as No. 123, each.....**CHE** $7.00

HARRINGTON & RICHARDSON.

Three-Piece—Heavy Reinforced Cannon Breech.

No. 500—12 gauge, plain extractor, blued steel barrel, choke bored, coil top lever and main springs, case-hardened frame, pistol grip, walnut stock, rubber butt-plate, plain snap fore-end, 30 or 32 in. barrel, w't about 7 lbs., each.....**EBE** $ 9.50
No. 505—12 gauge, automatic ejector, 30 or 32 in. barrel, otherwise same as No. 500.....each **JEEJ** $10.00

Shooters like a heavy gun for trap shooting or for firing extra heavy loads of powder and shot. This gun, with its weight, does not jar the shoulder as much as the lighter ones. The powerful breech will stand abnormal pressures.

SPENCER.

Three-Piece.

No. 211—12 gauge, plain extractor, armory blued steel barrel, choke bored, case-hardened frame, top lever, rebounding hammer, pistol grip, imitation walnut stock, rubber butt-plate, 30 or 32 in. barrel, w't about 6½ lbs., each.....**CAF** $5.50
No. 16211—16 gauge, 28 or 30 in. barrel, w't about 6¼ lbs., otherwise same as No. 211.....each **CAF** $5.50
No. 20211—20 gauge, 28 in. barrel, w't about 6 lbs., otherwise same as No. 211.....each **CJE** $5.50
No. 221—12 gauge, automatic ejector, 30 or 32 in. barrel, otherwise same as No. 211.....each **CDE** $6.00
No. 16221—16 gauge, 28 or 30 in. barrel, w't about 6¼ lbs., otherwise same as No. 211.....each **CDE** $6.00
No. 20221—20 gauge, 28 in. barrel, w't about 6 lbs., otherwise same as No. 211.....each **CCJ** $6.00

SINGLE BARREL SHOT GUNS.

STEVENS'.

Nitro Special, Hammer, Positive Extractor.

No. 291N—12 gauge, nickel plated frame, positive extractor, nitro blued steel barrel, heavy reinforced breech, choke bored for nitro powder, rebounding lock, top lever, special water table breech, patent check hook prevents shooting loose, lug swaged on barrel—not brazed, blued guard, snap fore-end, pistol grip, walnut stock, 30 or 32 in. barrel, w't 7 to 7¼ lbs., each .....DIE $9.00

No. 16291N—16 gauge, 28 or 30 in. barrel, 6¼ to 7 lbs., otherwise same as No. 291N.....each **DIE** $9.00

No. 294N—12 gauge, automatic ejector, 30 or 32 in. barrel, otherwise same as No. 291N.....each **EBE** $9.50

Nitro Special guns are made with barrels of especially prepared steel so as to withstand nitro powder. The barrel and water-table are of special construction and are forged in one piece, thereby making the gun much stronger than it would otherwise be. The gun has also the new positive extractor and check-hook. This takes the strain from the joint and off the fore-end.

The main spring and scar spring are both spiral, thus insuring a perfect, easy- working mechanism.

Hammerless.

Automatic Ejector, Automatic Safety, Bored for Nitro Powders.

No. 12180—12 gauge, compressed forged "Electro" steel barrel, hollow tapered, full choke bored, top snap action, drop-forged and case-hardened frame, fine English walnut stock, length 13½ in., drop 2¼ in., full pistol grip, capped, rubber butt-plate, snap walnut fore-end, strong metal joint, 30 in. barrel, w't 6½ lbs.each **JGAE** $13.00

No. 16180—16 gauge, 30 in. barrel, otherwise same as No. 12180 .....each **GAE** $13.00

No. 20180—20 gauge, 28 in. barrel, otherwise same as No. 12180 .....each **GAE** $13.00

A hammerless single barrel gun that is singularly well equipped with its automatic ejector and safety and its nitro-bored barrel and top snap action. The walnut and metal parts are well finished, making this model an attractive gun as well as a practical one.

Hammer.

No. 44101—44 caliber, 26 in. barrel, reinforced at breech, tested for use of nitro powder, take-down, plain extractor, tip up style, break down lever action, walnut finished stock, straight grip, rubber butt-plate, extreme length over all 43 in., w't each 4 lbs....each **CHE** $7.00

This small caliber, light weight shot gun will use 44XL or 44 W. C. F. shot cartridges as well as 44 "Game Getter" ball cartridges, well finished, of high grade material and recoil very light.

IVER JOHNSON NEW CHAMPION.

Rebounding Lock.

No. 258—12 gauge, plain extractor, blued steel barrel, full long taper choke, rebounding lock, top lever, case-hardened steel frame, barrel and lug forged in one piece, coil main spring, selected black walnut oiled finished stock and fore-end, pistol grip, 30 or 32 in. barrel, w't about 6 lbs., each .....CEE $6.50

No. 16258—16 gauge, 28 or 30 in. barrel, w't about 6 lbs., otherwise same as No. 258.....each **CEE** $6.50

No. 20258—20 gauge, 28 in. barrel, w't about 5¾ lbs., otherwise same as No. 258.....each **CEE** $6.50

No. 268—12 gauge, automatic ejector, 30 or 32 in. barrel, w't about 6 lbs., otherwise same as No. 258, each .....CHE $7.00

No. 16268—16 gauge, automatic ejector, 28 or 30 in. barrel, w't about 6 lbs., otherwise same as No. 258, each .....CHE $7.00

ONE GROSS BOWS AND ARROWS IN A CASE.

REVONOC SINGLE SHOT RIFLES.

REVONOC rifles with their beauty of outline represent the highest development of American workmanship. The stock and fore-end are made from select seasoned walnut, only the attractive grains being used.

Each stock is finished so as to bring out the full beauty of the graining. The frame is carefully case-hardened, the beautiful blendings of blue and gray, peculiar to this process, showing clear and strong. The balance, penetrating force and accuracy will please the most discriminating marksman.

Take-Down, 20 Inch Round Tapered Barrel.

No. 222 REVONOC—22 caliber, rim fire, case-hardened frame, open rear and German silver knife edge front sight, positive horizontal extractor, nicely shaped walnut stock, with rubber butt plate, special "duck's bill" fore-end, w't about 3 lbs., each.....BCJ $4.00

All of the working parts can be taken out by simply removing the stock from the barrel which is attached with a thumb screw. The action is attached to the barrel, and the breech block drops down when a cartridge is to be inserted or an empty shell extracted.

Take-Down, 18 Inch Round Tapered Barrel.

No. 322 REVONOC—22 caliber, rim fire, case-hardened frame, sporting front and rear sights, plain walnut straight grip, military stock, special shaped fluted fore-end, rubber butt plate, w't about 3½ lbs., each.....BFJ $4.50

Substantially made throughout, guaranteed for accuracy. A handsome rifle at a very low price.

Take-Down, 20 Inch Half Octagon Barrel.
Especially Designed for Smokeless Cartridges.

No. 1822 REVONOC—22 caliber, case-hardened frame, lever action, open front and rear sights, nicely shaped walnut stock with rubber butt plate, special "duck's bill" fore-end, carefully finished throughout, w't 4 lbs., each.....CDE $6.00

No. 1825 REVONOC—25 caliber, short and long rim fire, otherwise same as No. 1822 REVONOC, each.....CDE $6.00
No. 1832 REVONOC—32 caliber, short and long rim fire, otherwise same as No. 1822 REVONOC, each.....CDE 6.00

Take-Down, 24 Inch Half Octagon Barrel.

No. 1922 REVONOC—22 caliber, rim fire, case-hardened frame, solid breech block, Rocky Mountain front and sporting rear sight, lever action, detachable barrel, nicely shaped walnut stock, with rubber butt plate, special "duck's bill" fore-end, w't about 4½ lbs. each..DCE $7.50

No. 1925 REVONOC—25 caliber, short and long rim fire, otherwise same as No. 1922 REVONOC, each.....DCE $7.50
No. 1932 REVONOC—32 caliber, short and long rim fire, otherwise same as No. 1922 REVONOC, each.....DCE 7.50

Take-Down, 24 Inch Full Octagon Barrel.

No. 522 REVONOC—22 caliber, rim fire, lever action, case-hardened frame, parts drop-forged and case-hardened, fitted with sporting front and rear sights, handsome American walnut military stock and fore-end nicely checkered, hard rubber butt plate, w't about 5¼ lbs. each EDJ $9.00

No. 525 REVONOC—25 caliber, long and short rim fire, otherwise same as No. 522 REVONOC, each.....EBJ $9.00

No. 532 REVONOC—32 caliber, long and short rim fire, otherwise same as No. 522 REVONOC, each.....EBJ $9.00

ALL ABOVE RIFLES SHOOT 22 SHORT, 22 LONG, 22 LONG RIFLE AND 22 STEVENS-POPE ARMORY CARTRIDGES.

THE PARTS OF AN AMERICAN MACHINE MADE GUN ARE INTERCHANGEABLE.

SINGLE SHOT RIFLES.

HAMILTON.

No. 27—22 caliber, long or short rim fire, 16 in. tapered bronze barrel, fitted with front knife and open rear adjustable sights, automatic ejector, w't 3 lbs., each ..... **ABJ** $2.20

This rifle has a hammer action exceedingly simple and of few parts. A solid breech-block makes action absolutely safe from rear explosion. The barrel is rifled with great care and has a built-up steel jacket which gives it great strength, durability and accuracy.

TEN IN A CASE.

FLOBERT.

No. 5104½—22 caliber, Warnant action, 22 in. octagon barrel, shoots 22 caliber short cartridges or bullet caps, rifled, case-hardened mountings, walnut oiled and checked pistol grip stock, scroll and screwed guard, w't 4 to 4½ lbs., each ..... **BCJ** $4.20

FIFTY IN A CASE.

RIFLES.

STEVENS' NEW IDEAL.

Single Shot.

Sporting and Gallery, Half Octagon Barrel, Rifle Butt-Plate, Drop-Forged Case-Hardened Frame, Oiled Walnut Stock and Fore-Arm, Rocky Mountain Front and Sporting Rear Sights.

No. 9104—22 long rifle caliber, rim fire, automatic ejector, 24 in. barrel, w't 7¼ lbs. ..... each **JGHE** $10.00

No. 9106—22 long rifle caliber, rim fire, automatic ejector, 26 in. barrel, w't 7¾ lbs. ..... each **JIDJ** 12.00

No. 9204—25 Stevens caliber, rim fire, plain extractor, 24 in. barrel, w't 7¼ lbs. ..... each **JGHE** 10.00

No. 9206—25 Stevens caliber, rim fire, plain extractor, 26 in. barrel, w't 7¾ lbs. ..... each **JIDJ** 12.00

No. 9304—32 long caliber, rim fire, plain extractor, 24 in. barrel, w't 7¼ lbs. ..... each **JGHE** 10.00

No. 9506—25-20 caliber, center fire, plain extractor, 26 in. barrel, w't 7¾ lbs. ..... each **JGHE** 10.00

No. 9508—25-20 caliber, center fire, plain extractor, 28 in. barrel, w't 8 lbs. ..... each **JIDJ** 12.00

This rifle is manufactured to meet the demand for a reliable and accurate rifle at a moderate price. It is recommended without qualification and fully guaranteed by the makers.

STEVENS' NEW MODEL POCKET.

Single Shot.
With Nickel Plated Detachable Skeleton Stock.

No. 8102—22 caliber, 12 in. blued steel round barrel, octagon breech, Stevens' combination sights, nickel plated frame, walnut stock, w't 2¾ lbs. ..... each **JHAJ** $10.50

The front sight is a combination globe and top; the rear sight is folding and adjustable. This rifle is adapted for 22 long rifle and 22 Stevens-Pope Armory for accuracy, will also shoot 22 short and 22 long cartridges.

STEVENS' "VISABLE LOADING" REPEATER.

No. 70—22 caliber, chambered for 22 shorts, holds 15 cartridges, 20 in. round barrel, length over all 35 in., varnished stock and slide handle, fitted with bead front and sporting rear sights, w't 4½ lbs. ..... each **FCE** $8.00

No. 73—Visible loading, suitable for 22 long rifle cartridges, holds 11 cartridges, rifled with a twist of one turn in 16 in., otherwise same as No. 70. ..... each **FCE** 8.00

The 22 long rifle model will magazine and shoot 22 short, 22 long and 22 long rifle rim fire cartridges, but for accurate results, the manufacturers recommend that 22 long rifle be used.

The "Visible Loading" feature is entirely new and so simple that it will appeal instantly to the shooter for the reason that cartridge is always in sight while being fed into chamber. The magazine tube and breech block are in one piece. Has extra strong double extractors, making the extraction of the empty shell absolutely positive. The breech block has a positive lock and is operated by the slide handle after the breech block is closed. The hammer also has a positive lock and is always locked, while the breech block is unlocked.

WINCHESTER SINGLE SHOT.

Thumb Trigger Action Model.

No. 720—22 cal., rim fire, shoots 22 short and 22 long cartridges, 18 in. round blued steel barrel, take-down, bolt action, 13¾ in. highly finished straight grip stock, checkered butt-plate, entire length 33½ in., w't 5 lbs. ..... each **BHE** $3.50

When the gun is cocked, the action is locked against opening until firing pin falls. The gun is cocked by pulling rearward on the firing pin, which is made with a knurled head. It is furnished with an open rear sight, and with a Winchester front sight having a bright alloyed tip, which will not tarnish.

TEN IN A CASE.

Model 1902, Bolt Action.

No. 718—22 cal., 18 in. round blued steel barrel, rifled, open rear sight, straight grip stock with rubber butt-plate, trigger guard of a new design which fulfills the purpose of a pistol grip, take-down, can be taken apart easily and quickly, the operation consisting simply of unscrewing thumb screw underneath the fore arm, shoots 22 short or 22 long cartridges, w't 2¾ lbs. each ..... **CAE** $5.00

Model 1904, Bolt Action.

No. 719—22 cal., 24 in. heavy round barrel, take-down, adjustable rear sight, bead front sight with bright alloyed tip, highly finished Schuetzen shaped butt stock, with a blued steel rifle butt plate, shoots 22 short and long cartridges, w't 4 lbs. ... each **DDJ** $6.00

WINCHESTER SINGLE SHOT.

Solid Frame.
Octagon Barrel, Plain Trigger, Plain Walnut Rifle Butt Stock, Blued Frame.

No. 5108—25-20 cal. center fire, 28 in., w't 7 lbs., each ..... **AAIJ** $15.00

WINCHESTER AUTOMATIC.

Model 1903, Take Down.

No. 724—22 cal., hammerless, rim fire, 20 in. round barrel, straight grip stock of plain walnut, 10 shots, w't 6¾ lbs. ... each **AFJJ** $25.00

The Winchester Model 1903, is a ten-shot, automatic, hammerless, take-down rifle, adapted to a new 22 caliber rim fire cartridge loaded with smokeless powder and grooveless bullet. It is simple in construction and operation.

ALL ABOVE, TEN IN A CASE.

REPEATING AND AUTOMATIC RIFLES.

WINCHESTER REPEATING.

Model 1906, Take Down.

No. 702—22 cal., rim fire, 22 short, 22 long and 22 long rifle, 20 in. round barrel fitted with sporting front sight and adjustable open rear sight, 35⅜ in. length over all, stock 12⅝ in. long, rubber butt-plate, magazine holds fifteen 22 short and eleven 22 long or 22 long rifle cartridges, w't 5 lbs.....each **JHHJ** $11.75

Model 1890, Take Down.

No. 704—22 cal., short, 24 in. octagon barrel, plain trigger, sliding fore-arm action, straight grip rifle stock of plain walnut, 15 shots, w't 5¾ lbs. .....each **AJAE** $16.00
No. 705—22 cal., long, 24 in. octagon barrel, plain trigger, sliding fore-arm action, straight grip rifle stock of plain walnut, 12 shots, w't 5¾ lbs. .....each **AJAE** $16.00
No. 706—22 W. R. F. cal., 24 in. octagon barrel, plain trigger, sliding fore-arm action, straight grip rifle stock of plain walnut, 12 shots, w't 5¼ lbs. .....each **AJAE** $16.00

SAVAGE AUTOMATIC.

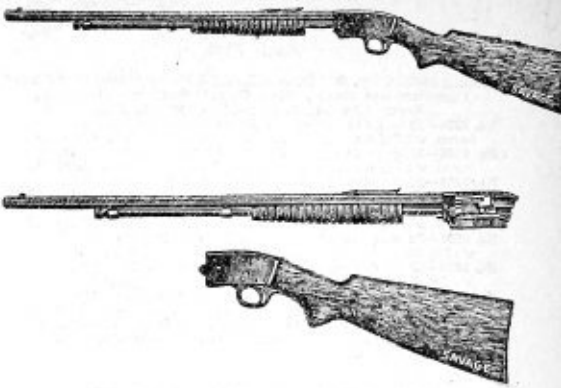
Model 1912, Take Down.

No. 7421—22 long rifle caliber, 7 shots, self-loading, 20 in. round barrel, hammerless, American walnut stock and fore-arm, shot gun butt, steel butt-plate, bead front and adjustable rear sight, with two magazines, length taken down 23½ in., w't 4½ lbs.★ .....each **AJGE** $12.00
Extra Magazines for No. 7421 Rifle★ .....each **BE** .40

The Model 1912, 22 Savage Automatic Rifle is a self-loading hammerless, take-down arm, constructed to shoot accurate, powerful and inexpensive 22 long rifle semi-smokeless or Lesmok cartridges only. The recoil each time the rifle is fired throws out the empty shell, cocks the arm and puts a loaded cartridge into the barrel, leaving the rifle ready for the next shot, will shoot one shot to a trigger pull just as fast as trigger is pressed.

TEN IN A CASE.

SAVAGE REPEATING.



Model 1911, Take Down, Bolt Action.

No. 7400—22 caliber, shorts only, 20 shot repeater, bolt action, 20 in. round blued steel barrel, steel shot gun butt, walnut stock, equipped with adjustable rear and metal bead front sight, w't 4 lbs.....each **EEJ** $6.50

Its special riding for 20 short only combined with adjustable open sights makes it an ideal arm. It has stock magazine capacity of 20 shots. Simply opening and closing the bolt ejects the fired shell, inserts a new shell and automatically cocks the arm placing it in a position to fire the next shot. It is light and compact, being modeled after the most modern military rifles.

SAVAGE REPEATING.

Model 1914, Take Down, Trombone Action, Tubular Magazine.

No 7424—22 caliber, 24 in. octagon barrel, hammerless, repeater, solid top, side ejection, positive safety, pistol grip stock, steel rifle butt-plate, shoots 22 short, 22 long and 22 long rifle cartridges without adjustment, magazine holds twenty 22 short, seventeen 22 long or fifteen 22 long rifle cartridges, fitted with metal bead front and adjustable wind gauge rear sights, length taken down 27½ in., w't 5¾ lbs. .....each **AJGJ** $12.00

The arm is hammerless, with solid breech, solid top and side ejection. All the moving parts are enclosed within the receiver. The safety is of the shot gun type and is located at the top of the tang, immediately in front of the grip.

The action is positive, short, quick and easily operated.

The beauty of outline, typical of all Savage arms, is increased in the Model 1914 by the introduction of an action slide handle, as long and as well shaped as a forearm. This makes unnecessary the strained, cramped position of the left arm and wrist, unavoidable with other 22 caliber arms of the trombone type, and permits the shooter to grasp the rifle with the left hand easily and as far forward as he desires.

In addition to this, the Model 1914 has a new, yet characteristically Savage pistol-grip, short, sharply curved and fitting the hand perfectly.

The rifle retains the time-tried and approved features of the mechanism of the Model 1903. The breech bolt and action are similar in design and locked in exactly the same way. The firing mechanism, ejector and safety are identical. The take-down device, owing to its long bearings, almost the entire length of the receiver, besides being easily operated, is especially strong and rigid. An ingenious design of carrier and action slide makes it impossible for more than one cartridge at a time to be released from the magazine and positively blocks the feeding of another cartridge until the action not only has been closed and locked on the preceding one, but also has been opened again to extract and eject it. This construction makes the presence of two cartridges in the receiver at the same time—a condition likely to occur in tubular magazine arms, handling cartridges of three different lengths—physically impossible.

★FOR FACTORY SHIPMENT ONLY.

REMINGTON REPEATING RIFLES.

Model No. 12, Take-Down, Hammerless.

No. 1021—Standard, 22 caliber, solid breech, side ejection, 22 in. round barrel, chambered to take without adjustment 22 short, 22 long and 22 long rifle cartridges, straight grip, walnut stock, rubber butt-plate, w't 4½ lbs., magazine holds fifteen 22 short, twelve 22 long or eleven long rifle cartridges .....each **JIFE** $12.65

Model No. 12, Take-Down, Hammerless.

No. 1022—Gallery Special, 22 caliber, solid breech, side ejection, 24 in. octagon steel barrel, chambered for 22 shorts only, pistol grip, walnut stock, steel rifle butt-plate, w't 5½ lbs., magazine holds 15 short cartridges, each .....**AAHE** $16.00

Model No. 12, Take-Down, Hammerless.

No. 1023—Target, 22 caliber, solid breech, side ejection, 24 in. octagon steel barrel, chambered to take without adjustment 22 short, 22 long and 22 long rifle cartridges, straight grip, walnut stock, steel rifle butt-plate, w't 5½ lbs., magazine holds fifteen 22 short, twelve 22 long or eleven long rifle cartriges .....each **AAHE** $16.00

Model 12, Take-Down, Hammerless.

No. 1024—Target, 22 caliber, using 22 cal. W. R. F. cartridges, solid breech, side ejection, 24 in. octagon steel barrel, straight grip, walnut stock, steel rifle butt-plate, magazine holds nine 22 W. R. F. cartridges, w't each 5½ lbs. .....each **AAHE** $16.00

The Remington repeating rifle chambered to shoot 22 W. R. F. will be a popular one. It is extremely accurate, its serviceable range being 100 to 200 yards. The cartridge shows excellent penetration, shooting through seven pine boards ¾ in. in thickness.

ALL ABOVE, TEN IN A CASE.

Model 16, Take-Down, Hammerless.

No. 1025—.22 caliber—.22 Winchester Automatic Cartridge is not adapted to this rifle—automatic, solid breech, side ejection, 22 in. round barrel, chambered for .22 automatic rim fire cartridges, straight grip, walnut stock fitted with steel rifle butt plate, adjustable straight bar rear sight and white metal bead front sight, magazine holds fifteen cartridges which, with one in the chamber, makes this a sixteen shot autoloading repeater, w't each 5¼ lbs., each .....**AGDJ** $20.00

The Remington .22 caliber autoloading hammerless rifle has the famous solid breech, generally recognized as the most important improvement in modern arms. A thick wall of solid steel lies between the firing chamber and the shooter's face ALWAYS. This affords the shooter absolute protection against injury from blow-backs or defective ammunition. The solid breech also prevents dirt, snow and other foreign substances from entering the mechanism.

The safety lock is arranged conveniently just in front of the trigger.

When the rifle is "on safe" it is impossible to pull the trigger or fire the arm. The safety lock indicates whether the gun is cocked because the safety can not be set "on safe" when the gun is uncocked.

The autoloading action permits great rapidity of accurate fire, which is still further increased by the perfect balance of the arm.

The interrupted screw take-down system is simple and strong embodying perfect mechanical features to preserve alignment of the barrel with the frame.

When taken down, the arm is so compact that it may be put ina suit case. It is only necessary to press rearward on the take-down button, give the barrel a quarter turn, and withdraw from the frame. No screws to turn or small members to lose. Further dismounting is obtained by removal of an assembling screw, which releases the two halves of the frame, rendering the mechanism easily accessible for cleaning and oiling.

Provision is made to take up all wear which can possibly occur, assuring perfect fitting of barrel to frame at all times.

The barrel may be cleaned from the breech and may be conveniently inspected, two necessary factors in the proper care of any .22 caliber barrel with which fine shooting is to be done.

The magazine consisting of a simple tube with capacity for fifteen .22 caliber automatic cartridges is arranged within the stock where it is protected from injury. The loading hole is on the bottom of the stock. The arm may be used as a single shot if desired.

ONE IN A BOX.

MARLIN REPEATING RIFLES.

Model 29, Take-Down.

No. 1929—22 caliber, 23 in. round barrel, 39¼ in. over all, trombone action, handles short, long and long rifle cartridges without any change in adjustment, blued frame, rifle butt-plate, black walnut butt stock and fore-end, metal bead front sight, flat top block rear sight with notch and vertical white line at middle, w't 4½ lbs.....each **GGJ** $8.50

This new model 29 Marlin repeating rifle handles 15 short, 12 long or 11 long rifle cartridges at one loading without any change in adjustment. Recommended as a thoroughly accurate and efficient rifle for all small game and for target shooting up to 200 yards.

It has the same simple take-down construction as the model 20 and the regular solid top, side ejecting Marlin construction which protects the shooter, keeps the gun clean and dry and promotes rapid accurate firing; the real test of a repeater.

Model 20, Take-Down.

No. 2024—22 caliber, trombone action, 24 in. octagon barrel, solid top, side ejector, closed in frame of best quality special steel, butt stock and fore-arm black walnut, well finished, metal rifle butt-plate, ivory bead front sight, special adjustable flat top rear sight, capacity of magazine 15 short, 12 long or 11 long rifle cartridges, length over all 39¼ in., w't about 4 lbs. 10 oz., each **AJGE** $13.50

Model 20, Full Magazine, Take-Down.

No. 2025—22 caliber, trombone action, 24 in. octagon barrel, full magazine, solid top, side ejector, closed in frame of best quality special steel, butt stock and fore-arm black walnut, well finished, metal rifle butt-plate, ivory bead front sight, special adjustable flat top rear sight, w't about 5 lbs. 2 oz.....each **AJGE** $16.50

Similar to the regular model 20 rifle, but made with heavier modeled stock and 24 in. tapered barrel. Handles at one loading 25 only 22 short, 20 only 22 long or 18 only 22 long rifle cartridges. A very accurate, well balanced gun.

Model 27, Take-Down.

No. 2027—25-20 caliber, solid top, trombone action, side ejector, 24 in. octagon special smokeless steel barrel, 7 shots, blued frame, blued steel rifle butt-plate, black walnut stock and fore-end, Rocky Mountain adjustable rear and ivory bead front sights, shoots black powder cartridges, low pressure smokeless and high velocity smokeless cartridges, length over all 42¼ in., w't 5¼ lbs., each .....**ACGE** $16.50

No. 2029—32-20 caliber, otherwise same as No. 2027, w't 5¾ lbs. .....each **ACGE** $16.50

Model 27 is well made, accurate and reliable for target work and all small game shooting. It is the only pump action repeater made in 25-20 and 32-20 caliber.

No. 2724—25 Stevens rim fire caliber, 24 in. round special rolled steel barrel, take down, trombone action, solid top, 8 shots, blued frame, blued steel rifle butt plate, black walnut stock and fore-end, Rocky Mountain adjustable rear and ivory bead front sight, length over all 42¼ in., w't 5¼ lbs. .....each **ABBJ** $14.75

No. 2824—25 Stevens rim fire caliber, 24 in. octagon special rolled steel barrel, otherwise same as No. 2724, each .....**ACGE** $16.50

These new Marlins are the only 25 rim fire repeating rifles on the market. They are the same as regular Model 27, 25-20 and 32-20 caliber, except adapted to the 25 Stevens rim fire cartridges only and will not work as a repeater with 25 short Stevens size.

Model 1892, Solid Frame.
Blued Frame, Blued Metal Rifle Butt-Plate, Black Walnut Stock, Rocky Mountain Sights.

No. 2324—32 caliber, 24 in. round barrel, magazine will hold 17 short, 14 long or long rifle cartridges, rim or center fire, w't 5½ lbs.....each **AACJ** $13.75

No. 2424—32 caliber, 24 in. octagon barrel, magazine will hold 17 short, 14 long or long rifle cartridges, rim or center fire, w't 5½ lbs.....each **ABBJ** $14.75

The 32 caliber is made so that the same rifle may be used for 32 short rim fire and 32 long rim fire cartridges, and by changing the firing pin 32 short center fire and 32 long rifle center fire cartridges. The rifle as sent out from the factory is adapted to use rim fire ammunition, but a center fire firing pin is furnished with rifle without extra charge. The firing pins can be interchanged by any one without using tools.

Model 1897, Take-Down.
Case-Hardened Frame, Black Walnut Stock, Rocky Mountain Rear and Ivory Bead Front Sights.

No. 1124—22 caliber, 24 in. round tapered barrel, rubber shot gun butt, w't 5¾ lbs.....each **ACBJ** $15.35

No. 1224—22 caliber, 24 in. octagon tapered barrel, rubber shot gun butt, w't 5⅝ lbs. .....each **ADFJ** $17.00

No. 1226—22 caliber, 26 in. octagon tapered barrel, rubber shot gun butt, w't 5⅞ lbs.....each **AFJJ** $18.60

This rifle is similar in construction to the model of 1892, but is a take down with many important improvements.

In external appearance the following differences may be noted: the larger thumb screws and the finely tapered barrel, which, with the neat rubber butt plate, give the arm a light and graceful appearance.

The receiver is made of the special steel used in the high power smokeless rifles, which insures a solid rifle.

Capacity of magazines 25 short, 20 long and 18 long rifle cartridges.

Model 1892, Solid Frame.
Blued Frame, Black Walnut Stock, Rubber Butt-Plate, Removable Sideplate, Rocky Mountain Front and Rear Sights.

No. 2124—22 caliber, 24 in. round barrel, rubber shot gun butt, w't 5½ lbs.....each **AACJ** $13.75

No. 2224—22 caliber, 24 in. octagon barrel, rubber shot gun butt, w't 5½ lbs.....each **ABBJ** $14.75

No. 2226—22 caliber, 26 in. octagon barrel, rubber shot gun butt, w't 5⅝ lbs.....each **ACFE** $16.25

Shoots without adjusting.

Capacity of magazines 25 short cartridges, 20 long cartridges, 18 long rifle cartridges.

ALL ABOVE, TEN IN A CASE.

REPEATING RIFLES.

Model 1894 Carbine, Solid Frame.

Case-Hardened Frame and Lever, Blued Breech Bolt, Blued Rifle Butt-Plate, Black Walnut Stock, Rocky Mountain Sights.

No. 8925—25-20 caliber, 20 in. round barrel, with sling ring on left side of receiver, 12 shots, w't 6 lbs., each.....**AABJ** $12.95

No. 8938—38-40 caliber, 20 in. round barrel, with sling ring on left side of receiver, 12 shots, w't 6 lbs., each★.....**AABJ** $12.95

The .25-20 and .32-20 Marlin are guns of power and range, yet safe to use in settled districts. They cover fully any game smaller than deer, and have an accurate range of 300 yards. The .38-40 and .44-40 with the well known black and low pressure smokeless loads, and especially with the new high velocity smokeless cartridges, are excellent for deer and wolves.

New Model 1895.

No. 6504—33 caliber, solid frame, 24 in. round special smokeless steel barrel, half magazine, holds 5 cartridges, 4 in. magazine and 1 in. chamber, American walnut butt-stock and fore-arm, shot gun butt, rubber butt-plate, Rocky Mountain adjustable rear and front sights, special light weight model—about 7¼ lbs., each★.....**AGBJ** $18.50

No. 6504TD—33 caliber, take down, 24 in. round special smokeless steel barrel, half magazine, otherwise same as No. 6504★.....each **BJDF** $22.00

The 33 caliber cartridge is one of the most powerful of all modern high power smokeless cartridges throwing a heavy bullet with extremely high velocity (over 2050 feet) very flat trajectory, deep penetration and tremendous shocking and killing power, it quickly brings down moose, bear, deer and all other big game.

Model 1893, Take Down.

Case-Hardened Frame, with "Smokeless Steel" Barrels.

No. 6406TD—30-30 caliber, 26 in. octagon barrel, 10 shots, w't 8¼ lbs.....each **AHJJ** $21.00

No. 3226TD—32-40 caliber, 26 in. octagon barrel, 10 shots, w't 7⅝ lbs.....each **AHJJ** $21.00

The special smokeless steel used in the manufacture of the barrel, receiver and breech bolt is guaranteed to be made according to the regulation specifications of the United States government for the new 30 caliber army rifle. Elastic limit seventy thousand lbs., tensile strength one hundred thousand to one hundred twenty thousand lbs., to the square inch. The Marlin Co. is the only one making the 32-40 and 38-55 rifle of the special smokeless steel, making these calibers just as strong and durable as the 30-30.

These Model 1893 rifles are quick handling, powerful, accurate guns, built in perfect proportion throughout, with the simplest and strongest mechanism used in any high power repeater. They are made especially to stand the continued use of high power smokeless loads with jacketed bullets, and are ideal guns for shooting bear, moose, deer and all American big game.

Model 1893 Carbine.

Extra Magazines ..... each AAJ 1.50

ALL ABOVE, TEN IN A CASE.

AUTOMATIC PISTOLS.

COLT.

Rapid Firing, Eight Shots in 1 3-5 Seconds.

The action of these pistols is automatic, except that the trigger must be pulled to fire each shot, the cartridges being supplied from a detachable magazine inserted in the handle of the pistol. After the pistol is charged with a filled magazine, one opening movement is made by hand, bringing the first cartridge into the chamber. On pulling the trigger the cartridge is fired, the empty shell extracted, and a new cartridge loaded into the chamber, all these operations taking place automatically. This automatic operation of the pistol is effected by the recoil of the moving parts, and as a consequence the recoil is so absorbed in being utilized that it has no disturbing effect.

The arm has three safety devices. Its accuracy and durability are unquestioned.

Vest Pocket Model, Hammerless.

No. C1—25 cal., 6 shots, 2 in. barrel, length over all 4½ in., blued finish, w't 13 oz.....each **A A J J** $13.30

No. C1N—Nickel plated, otherwise same as No. C1....each **A A J J** $13.30

No. C1N97—Nickel plated, fitted with fine quality pearl stocks, otherwise same as No. C1...each **A B I E** $14.25

No. C197—Blued, fitted with fine quality pearl stocks, otherwise same as No. C1.....each **A B I E** $14.25

Extra Magazines, 25 cal., each **E J** $0.60

This model combines extra light weight and very small size with the essential features of an efficient pistol. Being flat, light and compact, the pistol can be conveniently carried in a vest pocket (or other accessible place) ready for instant use and with perfect safety. It has not an equal, in its size, for Power, Accuracy and Effectiveness.

COLT.

Vest Pocket Model, Hammerless.

No. C1NP—25 cal. nickel plated, **Colt genuine pearl stocks,** fitted **with medallion monogram,** 6 shots, 2 in. barrel, length over all 4½ in., w't 13 oz.....each **A C E J** $15.50

Extra Magazines, 25 cal., each **E J** $.60

This is a special, fancy model of the popular 25 caliber pistol, nickel plated and fitted with Colt genuine pearl stocks inset with the Colt medallion monogram. Makes an excellent gift for either sex; carried readily in vest pocket or in a hand bag.

Pocket Model, Hammerless.

No. 6—32 cal., center fire, 8 shots, 3¾ in., blued finish, length over all 6¼ in., w't 23 oz.....each **A D C J** $17.35

No. 380—380 cal., center fire, 7 shots, 3¾ in. barrel, blued finish, rubber stock, length over all 6¼ in., w't 23 oz.....each **A D F E** $20.00

Extra Magazines.

32 cal., for No. 6 pistol..each **F J** $0.75
380 cal., for No. 380 pistol each **G J** $0.90

This number is also a pocket model but slightly larger and of heavier caliber than the vest pocket automatic.

Pocket Model, Hammer.

No. C5—38 cal., center fire, 7 shots, 4½ in. blued barrel, length over all 7½ in., w't 32 oz..each **A H G J** $22.65

Extra Magazines, 38 cal., for Colt's pocket pistols.....each **H J** $0.95

A hammer model adapted in size for use as a pocket arm. A hard shooter.

COLT.

Military Model, Hammer.

No. 7—38 cal., center fire, 8 shots, blued, 6 in. barrel, length over all 9 in., w't 38 oz....each **A I H J** $24.00

Extra Magazines, 38 cal., for Colt's military pistols.....each **H J** $0.95

In this Military Model, the slide remains open after firing the last cartridge. When reloading the arm in the above position, insert the magazine, then press downward the slide stop (illustrated above just rear of the trigger). The slide goes forward, inserting a cartridge without any movement of the slide by hand. The slide stop is operated by the thumb of the hand holding the pistol.

For military purposes, rapidity of reloading is essential. A full magazine can be slipped into this pistol with one quick motion.

Military Model 1911, Hammer (Adopted by the U. S. Government as the Service Side Arm).

No. 45—45 cal., center fire 7 shots, full blued, checkered walnut stocks, 5 in. barrel, length over all 8½ in., w't 39 oz.....each **B J C E** $36.00

Extra Magazines, 45 cal., each **J I E** 1.15

Use 45 U. S. Government, 230 grain bullet, or 45 Colt automatic, 200 grain bullet cartridges, both rimless and smokeless, full jacketed bullet. The slide remains open after firing the last cartridge in the magazine.

Rapidity of fire depends solely upon quickness in pulling the trigger for each shot. If it is desired to carry the pistol fully cocked, the slide lock may be pressed upward, thus positively locking hammer and slide. The slide lock is located within easy reach of the thumb of the hand holding the pistol and may be instantly pressed down when raising pistol to firing position.

This pistol was placed under the most severe tests possible in competing for the Army and Navy specifications. One was shot 10,000 times without cleaning and then to test its accuracy the contents of one full magazine were fired at a regulation target, giving a splendid grouping. This is a remarkable result, as it has generally been the opinion of experts that metal jacketed bullets, shot without lubrication, would wear a barrel and cause a marked loss of accuracy.

AUTOMATIC PISTOLS.

SAVAGE.

Pocket Model, Hammer.

No. 15—32 cal., automatic, 11 shots (including one in the chamber), length of barrel, 4 in., length over all 6½ in., w't 19 oz.....each **ACGE** $16.70
Extra Magazines, for No. 15, 32 cal., each .....**E J** $0.60
Use 32 cal. automatic smokeless cartridges.

The .32 Savage Automatic is a powerful, accurate and rapid fire pistol, which carries 10 cartridges in the magazine. An extra one may be placed in the chamber, giving the arm a capacity of 11 shots. The mechanism is semi-automatic or self-loading, in which the recoil of firing the cartridge extracts and ejects the empty shell, also cocks the pistol, reloading it in readiness for the next shot, to fire each of which the trigger must be pulled.

Pocket Model, Hammer.

No. 16—380 caliber, automatic, 10 shots, (including one in the chamber), length of barrel, 4½ in., length over all, 7 in., w't 21 oz., each .....**ADC J** $17.50
Extra Magazines, for No. 16, 380 cal., each .....**E J** $0.60
Use 380 cal. automatic smokeless cartridges.

The .380 has the same mechanism as the .32 and is operated in exactly the same way. It differs only in caliber, length of pistol, length of barrel, weight, and magazine capacity. In the .380 there are combined accuracy, available stopping power, magazine capacity, reliability and durability in the size and weight of a pocket arm.

Savage pistols aim as easily as pointing your finger; entire arms can be quickly taken apart and put together without tools; safety is positive and can be operated with the thumb. The only automatic that has an indicator which tells at all times whether loaded. Weighs from three to four ounces less than other automatics. Operation is always reliable.

HARRINGTON AND RICHARDSON.

Vest Pocket Model.

No. H25—25 caliber, hammerless, 6 shots, 2 in. barrel, length over all 4½ in., blued finished, w't 12½ oz., each .....**J HH J** $10.50

Use 25 cal. automatic smokeless cartridges.

Simplicity of construction, strength and reliability of mechanism, light weight and compactness make this a thoroughly good pistol. A positive safety, locking the firing mechanism, is provided, so located that it can be conveniently operated by the right thumb.

For cleaning and oiling the pistol can be dismounted and assembled almost instantly and without the use of any tool.

SMITH AND WESSON.

No. S35—35 caliber, center fire, 7 shots, 4½ in. barrel, length over all 7½ in., blued finish, wood stock, w't 24 oz., each .....**AHG J** $22.65

Easily cleaned. By pulling out trigger guard forward end is released and barrel is free to swing upward, allowing a clear view, not only of interior of barrel, but the locking mechanism of the bolt. By releasing joint pivot, barrel can be entirely removed from frame and bolt lifted out. By means of a sliding catch, the bolt, when operated manually, may be entirely disconnected from the heavy recoil spring.

Peters Ammunition.
(For 35 S. & W. Automatic.)

35 caliber, S. & W. Automatic, rimless, smokeless cartridges, w't of full metal cased bullet 78 grains, per M.....**AEG J** $18.00

The above cartridge was designed especially for the new 35 S. & W. Automatic pistol.

MAUSER.

Pocket Model, Hammerless.

No. 2—25 cal., automatic, 10 shots, length of barrel 3⅛ in., length over all 5½ in., w't 15 oz., each .....**ABD J** $14.00
No. 3—32 cal., automatic, 9 shots, length of barrel 3½ in., length over all 6⅛ in., w't 21 oz. .....each **ADCJ** $17.50
Extra Magazines, for Nos. 2 and 3, each .....**GE** $0.85
Use 25 and 32 cal. automatic smokeless cartridges.

These automatic pistols have no perceptible recoil. The trigger is easily pulled; safety device on side, and the hand is not encumbered aiming. The accuracy of these pistols at ranges suitable for hand fire arms is really marvelous, and it is also further increased by the comparatively long barrels. After last shot is fired breech remains open. Inserting a magazine filled with cartridges closes the breech and throws the first cartridge into the chamber. After a few shots have been fired and firing is to be discontinued, magazine is withdrawn, but one cartridge still remains in the barrel. With the magazine out of the pistol the trigger CAN NOT be pulled, even though a cartridge is in the barrel, thus making these pistols practically "fool proof." The rapidity of firing satisfies the severest demands that can be made.

LUGER.

Muzzle Velocity 1,150 Feet per Second. Maximum Range 2,000 Yards.

No. 9—7.65 M M or 30 cal., Luger, center fire, 8 shots, blued finish, walnut scored stock, 4⅝ in. barrel, length 9 in., w't 29 oz.....each **BCFE** $28.50
No. 18—9 M M cal., center fire, 8 shots, blued finish, walnut scored stock, 4½ in. barrel, length 9 in., w't 29 oz., each .....**BCFE** $28.50
Extra Magazines, for Nos. 9 and 18, each .....**ACE** $1.75

Ammunition, Smokeless.
(For Nos. 9 and 18 pistols.)

30 caliber, Luger, same size as 7.65 M M, soft point or metal case, 1,000 in a case.....per M **BBBE** $25.00
Made by The Peters Cartridge Co.
9 M M caliber, Luger, soft point, 1,000 in a case.....per M **BDGE** $30.00
Made in Germany.

The Luger has fine appearance, good balance, simplicity of action, combined with rapid fire and wonderful accuracy. It operates on the link system. It has a magazine containing eight cartridges, which is held in the stock of the pistol. This magazine can be replaced in a moment.

REVOLVERS.

COLT.

Colt's positive lock, as illustrated above, rests between hammer and frame excepting when trigger is pulled. Accidental discharge is absolutely impossible.

Pocket Positive, Double Action, Jointless Frame, Simultaneous Ejection, Positive Lock, Six Shots, Center Fire, Rubber Stock.

No. 7232B—32 cal., blued, 2½ in. barrel, w't 15 oz. .....each **ABAJ** $14.60

MAXIM SILENCERS.

Model 1912-22 Caliber Coupling and Silencer.

No. 1222 M. S.—22 caliber, with coupling complete, diam. 1 in., length 4¼ in., w't 5 oz., each .. ..DAE $7.50

No. 1235 M. S.—25-20 caliber, with coupling complete, diam. 1 in., length 5 in., w't 7 oz., each★ .. ..JEEJ 10.00

No. 1232 M. S.—32-20 caliber, with coupling complete, diam. 1⅝ in., length 6¼ in., w't 12 oz.★.. .. ..each JEEJ 10.00

WHEN ORDERING, SPECIFY MAKE AND MODEL OF RIFLE TO BE FITTED; WHETHER BARREL IS ROUND OR OCTAGON AND IF FULL OR HALF MAGAZINE.

The coupling for the 22, 25-20 and 32-20 caliber silencers, fit tight on the barrel. The silencer attaches and detaches by a slight turn.

★*FOR FACTORY SHIPMENT ONLY.*

MAXIM SILENCERS.

22 Caliber High Power Coupling and Silencer.

No. 1233 M. S.—22 H. P. caliber, with clamp type coupling complete, for Savage 22 H. P. rifle, diam. 1 in., length 5⅜ in., w't 7 oz.....each JGAE $13.00

The coupling for the silencer of this popular rifle locks on the barrel by means of a locking clamp. The silencer attaches and detaches very easily by a slight turn.

No. 1235 M. S.—High power silencers for any caliber rifle having front sight mounted upon base built into the barrel, diam. 1⅝ in., length 6¼ in., w't 12 oz.★.....each JGGJ $14.00

This coupling locks fast to the barrel by means of a clamp.

25-35 Caliber Sight Type Coupling and Silencer.

No. 1236 M. S.—25-35 caliber, complete with sight type coupling, diam. 1 in., length 5⅜ in., w't 8 oz.★.....each JGGJ $14.00

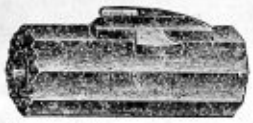
No. 1237 M. S.—High power silencers for any caliber rifle having front sight dovetailed into barrel, diam. 1⅝ in., length 6¼ in., w't 12 oz., complete with sight type coupling★.....each JGGJ 14.00

WHEN ORDERING, SPECIFY MAKE AND MODEL OF RIFLE TO BE FITTED, WHETHER BARREL IS ROUND OR OCTAGON, IF FULL OR HALF MAGAZINE. FULL LENGTH MAGAZINES MUST BE SHORTENED TO MAKE ROOM FOR COUPLING.

Sight type couplings drive tight on the end of gun barrel after the front sight has been removed from rifle. Coupling carries new front sight.

Fitting Silencers to rifle without coupling, by threading, extra, each.. .. ..BBJ $4.00

On all high power rifle barrels that are octagon or with which the magazine extends to the muzzle, the barrel must be threaded for the silencer



Couplings are supplied for attaching to all but high power octagon barrels.

No extra charge is made for fitting silencers to 22 caliber rifles (either round or octagon barrel) if coupling is used. Minimum charges for workmanship are made for other calibers, in no case in excess of the charge made for attaching by threading.

The silencer eliminates noise of gun report entirely although ammunition having bullet velocity of 1,100 feet per second will cause a "crack" by air flight after leaving the silencer. Two-thirds of the recoil is eliminated. Shot cartridges work perfectly and make miniature trap shooting noiseless. The silencer is not recommended for use on revolvers, automatic rifles (excepting the model 1903-22 caliber Winchester) automatic pistols and shot guns.

RIFLE SIGHTS.

SHEARD'S GOLD ALLOY.

No. 101 Sight on Rifle Barrel.

Sheard's gold hunting or target front with gold and copper alloy bead. Will not blur, will show clear and distinct in the darkest timber in the most unfavorable light and improve shooting greatly. It is very strong and can be used with any open or peep rear sight.

No. 101—For Winchester rifles, models 1873, 1876 and 1886, all calibers except 33, 45-70 and 45-90 H. P. S. and light weights, Winchester single shot rifles all calibers except 30-40 U. S. A. and 22 cal. 1902 and 1904 models, Winchester 1895 model calibers 38-72 and 40-72, Marlin rifles model 27, 25-20 and 32-20 cal., models 1892, 1893, 1894 and 1895 all calibers except 22, 25-36, 30-30 and 32 special, Savage rifles and carbines model 1899 calibers 32-40 and 38-55, each .....**ABJ** $2.00

In ordering sights for 1886 model Winchester lightweight rifles, state caliber.

Front View.

No. 102—For Winchester rifles models 1892 and 1894 all calibers except 25-35, 30-30 and 32 special high power, 1894 model, Colt's Lightning rifles all calibers except 22 cal., Remington single shot rifle Nos. 2, 4 and 6, 22 caliber, each .....**ABJ** $2.00

No. 103—For Winchester rifles model 1886 calibers 33, 45-70 and 45-90 high power smokeless, Winchester rifles model 1895 calibers 35 and 405, Winchester self-loading rifles models 1905, 1907 and 1910, calibers 32, 35, 351 and 401, each .....**ABJ** $2.00

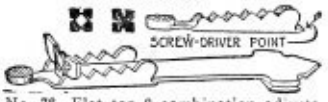
No. 105—For Winchester rifles model 1894, calibers 25-35, 30-30 and 32 special, each .....**ABJ** $2.00

No. 106—For Winchester carbines 1894 model, 25-35, 30-30 and 32 special calibers, each .....**ABJ** $2.00

SHEARD'S GOLD ALLOY.

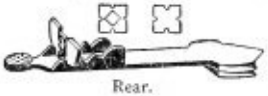
No. 111.

No. 111—For 1903 model U. S. Springfield rifles and carbines, each.....**ABJ** $2.00



No. 113—For Savage model 1899 rifles and carbines, calibers 25-35, 30-30 and 303, and Marlin model 1893 rifles, calibers 25-36, 30-30 and 32 special, each .....**ABJ** $2.00

No. 115—For Remington 30-30 and 32 special autoloading rifles, each .....**ABJ** $2.00



No. 117—For Winchester 1890, 1903 and 1906 model, 22 cal. repeating rifles, Winchester 1902 and 1904 model single shot rifles, Remington model 12 repeating rifle No. 1, 22 caliber, each .....**ABJ** $2.00

KING'S.

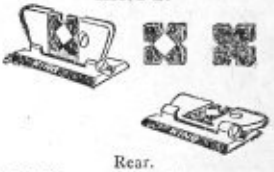
No. 78—Flat top 8 combination adjustable sporting rear, with adjustable disc having 4 notches, 2 U-shaped and 2 V-shaped of different sizes with white diamond on 1 side, giving 8 combinations with adjustment, as the disc may be placed either edge up or either face to, and locked with a screw, double step adjustment with screw driver point doing away with all blurring as in old style single steps, and making a more stationary sight, for all Witchester, Savage, Marlin and Remington, except autoloading, rifles, each **AJJ** $1.70

When used with King triple bead front sight gives twenty-four combinations of sights on the gun at one time.

Rear.

No. 80—Eight combination carbine rear, same adjustable disc and double elevating step as No. 78, each **AJJ** $1.70

All King rear sights are adjustable so that any one is suited to any model rifle of Winchester, Marlin, Savage and Remington (except auto-loading). This simplifies matters a great deal and enables dealers to get along on a small stock and still have the assortment.



Front.

No. 71—Triple bead front, 1/8 in. bead, has 3 perfect beads, ivory, gold and black, all on the rifle at one time, instantly charged and accurate, being revolved in either direction and held by a spring.....each **ABJ** $2.00

No. 72—Triple bead front, 3-32 in. bead, otherwise same as No. 71, each **ABJ** $2.00

Specify make, model and caliber when ordering Nos. 71 or 72. When King's Triple Bead Sights Nos. 71 or 72 are used with King's Leaf or Sporting Rear Sights, they give twenty-four combinations of sights on the gun at one time.

KING'S.

Rear.

No. 76—Flat top 8 combination adjustable leaf, with adjustable disc having 4 notches, 2 U-shaped and 2 V-shaped of different sizes, with a white diamond of hard enamel on one side, gives 8 combinations with an adjustment, as the disc can be placed either face to or either edge up, and locked in position by screw, for all Winchester, Savage, Marlin and Remington, except autoloading, rifles, each **JHJ** $1.40

Used with King triple bead front sight gives twenty-four combinations of sights on the gun at one time.

WINCHESTER.

Sporting Front.

Model 90 Front.

No. 181—Sporting rear, graduated from 50 to 300 yds., can be adjusted to buckhorn or clover leaf, each **JFE** $1.20

No. 182—Extra steps.....each **BJ** .35

No. 183—Express rear for model '94 rifle .....each **ACJ** $2.20

No. 184—Sporting front, each **CJ** .50

No. 185—Model '90 front, each **CJ** .50

No. 187—Sporting rear, adapted to models '90, '02, '04, '06 and thumb trigger Winchester rifles....each **JFJ** $1.00

No. 186—Model '90 rear Winchester, each .....**JFJ** $1.00

MARBLE'S.

Front.

No. 62—Duplex adjustable, 1/16 gold bead and 1/8 in. ivory bead, 2 sights in one, for model 1894 Winchester, model 1893 Marlin or model 1899 Savage rifles only .....each **AAJ** $1.80

The Duplex Marble Sight is an all purpose sight. It has 1-16 in. gold bead for target practice and game in ordinary light and on snow, with a 1/8 in. white enameled bead for all game in dubious light. It snaps down at a touch flat and flush. In ordering, specify make, model and caliber of rifle for which sight is intended.

RIFLE AND SHOT GUN SIGHTS.

MARBLE'S RIFLE.

No. 42. No. 61, Front View. No. 61, Side View.

No. 42—Standard front bead, for any rifle of any caliber, 1/8 in. bead, of ivory .....each **JEH** $1.00

No. 61—Reversible front, one ivory and one gold, both same size, furnished in either size 1/8 or 3-32 in., each .....**JHE** $1.50

The sight can be reversed instantly. Mention make, model and caliber when ordering.

No. 8R. No. 52. No. 53.

No. 8R—Adjustable, flexible rear peep sight for Model 14 Remington repeating rifle .....each **BJJ** $3.60

No. 38—Taps for fitting No. 8R, each .....**BE** $0.40

No. 39—Drills for fitting No. 8R, each .....**BE** $0.40

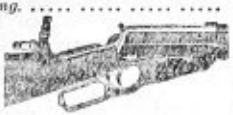
Model 14 Remington repeating rifle is not drilled and tapped to receive peep sight, consequently the foregoing tools are required.

No. 50—Special rear for Remington 22 repeater .....each **BJE** $3.60

Made expressly for the 22 caliber Remington Repeater, it cannot be made with the flexible joint on account of having to be made low, but it has all the other features of No. 51 Marbles' Flexible Rear Sight.

No. 51—Automatic flexible joint, rear, for Winchester, Marlin and Savage rifles .....each **BJE** $3.60

It can be used on all rifles with long firing bolts. A jamb nut holds the disc stem rigid at any elevation. Interchangeable disc allows change of aperture at will.



Mention make, model and caliber when ordering.

No. 52—Automatic flexible joint, rear, with cup disc, for Winchester, Marlin, Savage and all standard American rifles .....each **BDJ** $4.20

No. 53—Rear, with side light, otherwise same as No. 52.....each **BDJ** $4.20

The side light feature of the No. 53 makes it possible to line up your sights on a moving object much quicker than with the solid disc.

Mention make, model and caliber when ordering.

Mention make, model and caliber when ordering.

No. 66—Special base flexible joint, rear, with long base, particularly adapted to the Winchester box magazine rifles, each .....**BJE** $3.00

MARBLE'S RIFLE.

No. 60. No. 41.

No. 60—Rear, folding leaf sight, each **JGJ** $1.20

No. 41—Improved, front, for any rifle of any caliber, 1/8 in. bead, of ivory, each .....**JGJ** 1.00

It is possible with this improved front sight to see under as well as over, on long range where haste is necessary to adjust the rear sight; accuracy is insured by the fact that the object aimed at can be seen under the sight.

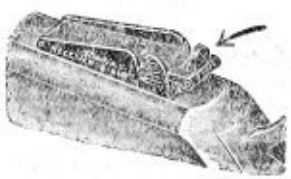
Mention make, model and caliber when ordering.

STEVEN'S RIFLE.

Sporting or Rocky Mountain Rear., each **FE** $1.20

Rocky Mountain Front.....each **DB** $0.80

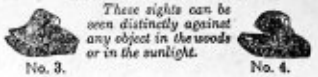
MARLIN RIFLE.



Rocky Mountain Rear, Buckhorn low and high.....each **FB** $1.10
Extra Steps, for above..... " **BB** .60

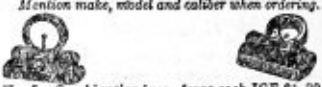
Rocky Mountain Front Front Rear.

Rocky Mountain Front, knife edge., each **DJ** $0.70
22 Caliber Front..... " **CJ** .55
22 Caliber Rear..... " **DJ** .70



No. 39—Receiver, for Marlin rifles made after Aug. '93, graduated peep or open sight.....each **BEJ** $1.40

Rifles made before above date require two holes to be drilled and tapped in rifle receiver.



LYMAN'S RIFLE.

These sights can be seen distinctly against any object in the woods or in the sunlight.

No. 3. No. 4.

No. 3—Ivory bead front.....each **JGE** $1.30
No. 4—Ivory hunting front.... " **CH** .70
Mention make, model and caliber when ordering.

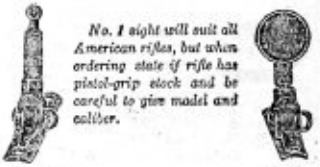
No. 5—Combination ivory front, each **JGE** $1.30
Mention make, model and caliber when ordering.

No. 24. No. 26.

No. 24—Jack, for Mar. and Winchester carbines and Win. '95 rifles...each **CH** $0.70
No. 26—Ivory bead, for Winchester carbines and Win. '95 rifles.....each **CH** .70
Mention make, model and caliber when ordering.

No. 6. No. 6R.

No. 6—Leaf .....each **JGE** $1.30
No. 6R—Leaf for Remington automatic rifles, same as No. 6, each **AAE** $2.00
One leaf is a bar with triangular ivory center, the other is a wide open V crotch.
Mention make, model and caliber when ordering.



No. 12.

No. 12—Slot blank,.....each **BJ** .35

No. 21—Receiver for Winchester models '94, '95 and Marlin '93 and '95, each **BFJ** 4.55

No. 1 sight will suit all American rifles, but when ordering state if rifle has pistol-grip stock and be careful to give model and caliber.

No. 1. No. 2

No. 1—Combination rear.....each **BBJ** $3.85
No. 2—Combination rear with cup disc, each .....**BFJ** 4.55
The No. 2 sight has a large detachable disc and is intended for match rifles and gallery rifles. It is not as good for "all around" shooting as the $3.85 combination sight.
The disc is easily removed, and for most work, is not needed.
Mention make, model and caliber when ordering.

LYMAN'S SHOT GUN.

No. 11—Ivory shot gun, rear... each **CH** $0.70
No. 10—Ivory shot gun, front.. " **CH** .70
No. 9—Sets of ivory front and rear shot gun sights with reamer..per set **JGE** 1.80

FOR FACTORY SHIPMENT ONLY.

GUN CLEANING RODS AND IMPLEMENTS.

SHOT GUN CLEANING RODS.

No. 416 REVNOC—16 gauge, otherwise same as No. 412 per dozen..... BBJ 4.00
No. 420 REVNOC—20 gauge, otherwise same as No. 412, per doz. BBJ 4.00
No. 418 REVNOC—Extra pads for Nos. 412, 416 and 420, per dozen pairs..... JFJ 1.00

A cleaner, fitting all standard cleaning rods, and so designed as to fit the entire length of the inside of shot gun barrels, notwithstanding the various chokes adopted by the different makers. We guarantee it to remove all lead, rust spots and foreign matter from breech to muzzle, and leave the barrels perfectly clean.

The sides cut all lead and dirt from the barrels, they are too soft to injure them in any way. In fact, by constant use, this cleaner will improve the barrels, by giving them a lengthwise polish.

No. 248—Twisted wire with bristle brushes, 12 gauge, per dozen .....BHE $5.20
ONE DOZEN IN A BOX.

MARBLE'S ANTI-RUST ROPES.

No. 240—MARBLE'S anti-rust ropes, standard length 30 in., 12, 16 and 20 gauge.....per dozen DDJ $3.00

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore. This insures a constant pressure of oil against the entire circumference of the bore. One oiling will last for years.

REVOLVER CLEANERS.

"REV-O-NOC."

No. 400 REVNOC—32 or 38 caliber, brass rod, cocobolo revolving handle, brass wire brush, length of rod 9½ in., length over all 13½ in.....per dozen EDJ $0.80

One of the most serviceable rods and cleaners on the market, for revolvers and pistols. Removes rust, lead, caking, etc. Especially adapted for cleaning target revolvers.

No. 141B—Brass, four joints, cocobolo revolving handle, slotted and notched rod only, 32 in. long, to fit any caliber of No. 246B brushes, per dozen .....**BGJ** $4.50

IN ROUND CANVAS BAG, ONE-HALF DOZEN IN A BOX.

No. 246B—Extra brass wire brushes, with short shank and male threads, to fit No. 141B rod, 22, 25, 30, 32, 35, 38 or 45 calibers, per doz. **JIE** $1.60

No. 246BL—Extra brass wire brushes, with long shank and female threads, to fit old style No. 141B rods, 22 caliber only ....per dozen **JIE** $1.60

No. 246B, short shank brush, screws into tip of No. 141B cleaning rod.
No. 246BL, long shank brush, screws onto the second joint of the rod, the tip joint being removed for that purpose.

RIFLE CLEANING RODS.

No. 171—Marble's, 22, 25, 30 or 38 caliber, brass sections, 3 steel joints, ends jagged and slotted, wood handle, 22 caliber, 26 in. long, and 25, 30 and 38 caliber, 28 in. long, per dozen .....**JIFJ** $16.00

No. 172—Marble's, brass gauze brushes, to fit No. 171, 22, 25, 30, 35 or 38 caliber, per dozen .....**DHJ** $8.00

The principle of construction is a spirally bent tempered spring wire, with sections of very soft brass wire gauze washers, separated by soft metal washers. The brass gauze brushes are a little smaller than the bore of the rifle they are intended to clean. In pushing the cleaner through the barrel the spring of the wire coil forces the brass gauze brushes firmly against the entire circumference of the bore of the rifle, thus removing spots of lead, burnt powder or rust.

No. 275—Marble's, field cleaners, linen cord, brass weight and No. 172 brass cleaner, 22 or 30 caliber, per dozen .....**JGBJ** $12.00

To clean, place loop over some projection, drop weight through barrel and hold, drawing rifle back and forth.

GUN IMPLEMENTS.

Ideal Stove Covers, for holding melting pot, will fit any stove, w't 1¾ lbs., each .....DJ $0.64

GUN REPAIRS.

Almost from the inception of our gun business, we have maintained a gun shop where we employ a corps of skilled mechanics, and are equipped with all necessary tools and machinery for making repairs of every description, choke boring, reboring, etc., as well as the examination of all arms. As many of our customers do not employ a gunsmith, we have been obliged to do a large amount of this class of work for the trade, charging only for the actual time of the workman and the materials used. It is impossible to quote prices intelligently on this class of work without having the arms for examination, but we give you a list of prices which are simply approximate estimates, but will cover the expense in the majority of cases.

It is necessary to have the action of the gun and the old stock when possible, from which to obtain the length and drop when making a new gun stock, and the complete gun in order to fit a new fore-end or extractor. However, in some cases we can get along with the barrels when a new extractor only is required, although it is necessary to guess at the length of the extractor pin in this case.

Parts for Flobert rifles, not being interchangeable, can be supplied from stock only in the rough, and when parts are wanted finished and fitted, it is necessary for us to have the rifle in order to do the work properly. The cost of breech blocks and hammers for Flobert rifles finished and fitted, varies from $1.00 to $1.50 each, the seemingly high prices being due to the fact that the parts have to be finished entirely by hand. In sending us guns or parts, do not fail to put your own name and address on the tag, and to write a letter giving full particulars. Failure to do this may be the cause of much unnecessary delay.

Bending stocks.....	each	$1.00 to	$2.50
Cutting off stocks.....	"	1.00 to	2.00
Making new stocks for medium grade imported guns..	"	7.00 to	9.00
Making new stocks for better grade imported, also American guns.....	"	9.00 to	12.00

REVONOC *For-All-Things Oil is a high viscosity, low gravity lubricating oil unexcelled for its Cleaning and Polishing properties.*

Prevents guns from rusting, Nickel and Brass from Tarnishing.

Penetrates into the pores of the metal, forming a film like coating that defies all weather conditions.

Composed of ingredients absolutely harmless to the finest finished surface, REVONOC *For-All-Things Oil is unsurpassed for cleaning and polishing pianos and fine furniture. Restores the original finish and lustre, removing all spots and stains.*

For Sewing Machines, Phonographs, Dictaphones, Typewriters, Automobiles, Motor Boats, Lawn Mowers, Separators, Bicycles, etc. Use a damp cloth on veneered or polished surfaces, and a dry cloth on metal.

No. 21—Automatic, self-closing and locking, w't 7 oz. ....each **AIJ** $3.20

TARGET TRAPS AND SUPPLIES.

TARGET TRAPS.

Ideal-Leggett.
For Rental Only. Not for Sale.

The Only Trap Without a Carrier.

The Ideal-Leggett Trap is a high grade machine, leased to throw Blue Rocks only. This trap is not for sale, but is rented at minimum prices to increase the sales of the famous Blue Rocks. In the past few years, nearly one thousand gun clubs, after an expensive experience with old style carrier traps, have installed the Ideal-Leggett and found that the annual rental of $10.00 was less than the former annual repair expense, to say nothing of the yearly depreciation of other traps.

Gun clubs should install the trap that will be used at all the large tournaments, as practice over other traps is a detriment. No trap made throws a snappy, sporty target as the Ideal-Leggett, whether in singles or doubles.

The makers lease these traps for the purpose of throwing Blue Rocks only, at $30.00 for the first and $10.00 for each of the following years, with a rebate of $15.00 for return at the expiration of any year, provided conditions of contract have been fully observed.

The Chamberlin Cartridge & Target Co., Cleveland, Ohio, fully guarantee these traps in every respect, keeping them in repair free of charge with the exception of springs and rubbers, which we quote under "Trap Repairs."

To gun clubs having Leggett traps, the manufacturers furnish the Ideal upper and new pulling stand to attach to their Leggett base for net, $10.00. Weight of upper stand, 150 pounds.

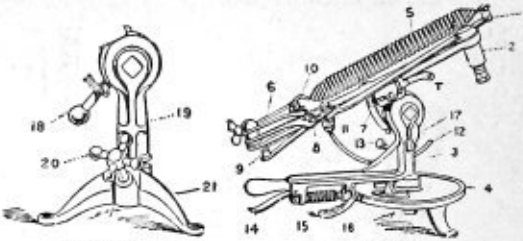
Weight of trap complete, with pulling stand and pipe, 380 pounds. For shipment only F. O. B. cars, Cleveland, Ohio. First year's rental, net★.....$30.00

Blue Rock Extension Spring.

Blue Rock Expert.

Blue Rock Extension Spring, w't 28 lbs. .....each **DHJ** $8.00
Blue Rock Expert, w't 30 lbs. .....each **JIFJ** 11.50

HAND TRAPS.



No. 37—Length 21 in. folded, finished in dark oxidized effect, w't each 6 lbs. .....each **CIJ** $6.50

This Hand Trap is not a toy, but it is a thoroughly practical apparatus for throwing clay targets by hand. It is constructed to give the greatest strength and power with minimum weight. The best materials only are used, and it will give a lifetime of good hard service if used with reasonable care.

ONE IN A CASE.

TRAP REPAIRS.

Extension Spring. Expert.

Both of the above traps use the same throwing mechanism, of the latest design. In ordering repairs for older types, special mention should be made that the mainspring is under the arm instead of above.

It is a 544 page book full of instructions from start to finish, page after page, picture after picture, 1,000 illustrations by Buzzacott, the standard authority for camping and camp outfits, hunting and hunting outfits, angling and angling outfits, big game, hunters, trapping, guides, amateurs or experts. An encyclopedia of valuable instruction. America's greatest book on these subjects. Every sportsman wants one.

TRAPS.

REVONOC GAME TRAPS.

Steel With Chain.

No. 100G REVONOC—Rat, single spring, 3½ in. jaw, w't per doz. 6 lbs., per dozen .....**AAE** $4.25

No. 101G REVONOC — Muskrat, single spring, 4 in. jaw, w't per doz. 8 lbs., per dozen .....**ACE** $5.00

No. 101½G REVONOC—Mink, single spring, 4¾ in. jaw, w't per doz. 11½ lbs., per dozen .....**BJE** $7.50

No. 102G REVONOC—Fox, double spring, 4⅜ in. jaw, w't per doz. 14 lbs., per dozen .....**JBHE** $10.50

No. 103G REVONOC—Otter, double spring, 5½ in. jaw, w't per doz. 23 lbs., per dozen .....**JCHJ** $14.00

No. 104G REVONOC—Beaver, double spring, 6½ in. jaw, w't per doz. 27 lbs., per dozen .....**JDDE** $16.50

REVONOC *Traps are of superior quality. The springs are made from spring steel, carefully tempered. When opened the* REVONOC *Traps lie very flat so that they can be easily secreted in the runways of animals. The chain is strong, well made and will stand the severest test.*

NO. 100G, THIRTY-FIVE, NO. 101G TWENTY-FIVE, NO. 101½G TWENTY, NO. 102G TWELVE, NO. 103G EIGHT, AND NO. 104G FIVE DOZEN IN A BARREL.

No. 1G.

All Steel With Chain.

No. 0G REVONOC—Rat or Gopher, single spring, w't per doz. 6½ lbs., per dozen .....**ADE** $4.25

No. 1G REVONOC—Muskrat, single spring, w't per doz. 8 lbs., per dozen .....**AGJ** $5.00

No. 1½G REVONOC—Mink, single spring, w't per doz. 10 lbs., per dozen .....**BEE** $7.50

Traps of this pattern are popular with trappers because they are light weight, yet strong. They are easily transported and a greater number can be taken to the trapping grounds. Easily secreted in the narrow runways of animals because so compact in form.

REVONOC *Traps are strongly made, carefully inspected and guaranteed.*

TWELVE DOZEN IN A CASE.

TRAP CLAMPS.

No. 5G—For setting No. 5G, w't per doz. 10½ lbs. .....per dozen **CDJ** $6.00

No. 6G—For setting No. 6G, w't per doz. 24 lbs. .....per dozen **JEGJ** $10.00

NEWHOUSE WITH CHAIN.

No. 2G.

No. 1G—Muskrat, 4 in., single spring, w't per doz. 10 lbs., per dozen .....**BHE** $5.00

No. 1½G—Mink, 4⅝ in., single spring, w't per doz. 15 lbs., per dozen .....**DBE** $7.50

No. 2G—Fox, 4⅝ in., double spring, w't per doz. 18 lbs., per doz. **JFJJ** $10.50

No. 2½G—Otter, 5½ in., single spring, w't per doz. 26 lbs., per dozen .....**JIDJ** $16.50

No. 3G—Otter, 5⅝ in., double spring, w't per doz. 28 lbs., per doz. **JHJJ** $14.00

No. 4G—Beaver, 6⅛ in., double spring, w't per doz. 38 lbs., per dozen .....**JIDJ** $16.50

No. 5G.

No. 5G—Bear, 11¾ in., double spring with teeth, w't per doz. 23¼ lbs., per dozen .....**JFHDJ** $120.00

No. 6G—Grizzly Bear, 16 in., double spring with teeth, w't per doz. 525 lbs., per dozen .....**AEIFJ** $280.00

NOS. 0G AND 1G TWELVE DOZEN IN A CASE, NO. 1½G TWENTY-FIVE, NO. 2G FIFTEEN, NO. 3G TEN DOZEN IN A BARREL, NO. 4G SEVEN DOZEN IN A BARREL.

No. 81G—Webbed jaws, spread of jaws 4 in., with chains, w't per doz. 11 lbs., per dozen .....**CAE** $5.50

The animal can only gnaw off its leg at a point below the meeting edges. The flesh left above the point of amputation and below the jaws will swell, and make it impossible to pull the leg stump out of the trap.

12 DOZEN IN A CASE.

No. 91G—Double jaw, spread of jaws 5½ in., with chains, w't per doz. 11 lbs. .....per dozen **CDJ** $6.00

No. 91½G—Double Jaw, spread of jaws 6¼ in., with chains, w't per doz. 17 lbs .....per dozen **EAE** $9.00

For Muskrat, Skunk, Mink, Raccoon, Fox or Woodchuck.

NO. 91G THIRTY DOZEN, NO. 91½G, TWENTY DOZEN IN A BARREL.

ONEIDA JUMP TRAPS.

Double Jaw with Chains.

No. 91G—Muskrat or skunk, 4¾ in., single spring, w't per doz. 8 lbs., per dozen .....**BJE** $6.00

The double jaws take an easy and firm grip so high up on the muskrat that he cannot twist out, neither can the skunk gnaw out. Double jaws rarely break the leg bones because of the double surface.

TWELVE DOZEN IN A CASE.

Single Spring.

All Steel with Chain.

No. 0G—Rat or Gopher, 4 in., single spring, w't per doz. 5½ lbs., per dozen .....**ADE** $4.25

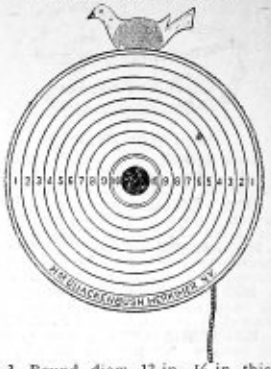
Produces a powerful and steady flame.

SIX TORCHES IN A CASE.

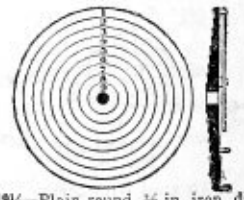


No. 1G—Baker, gasoline, 5 qt., japanned tank, 1 burner, w't per doz. 72 lbs. .....per dozen **BHHJ** $48.00

No. 9—Extra burners, for No. 1G torch, per dozen .....**AJHJ** $18.00

ONE IN A CRATE.

GALLERY TARGETS.



No. 3—Round, diam. 12 in., ½ in. thick, with bell and image, made of a grade of metal particularly adapted to stand cartridges, with ¾ in. diam. bull's eyes, w't 12 lbs.....each **CJJ** $5.00

When bull's-eye is hit, a bird rises and the bell, similiar in sound to an electric bell, rings a few seconds.

While designed for the use of 22 caliber cartridges, the spring may be quickly adjusted for service as an air rifle target.

We can furnish No. 3 Targets with ⅛ in., ⅝ in. and 1 in. bull's eyes at same price for shipment from factory.

No. 19¼—Plain round, ⅛ in. iron, diam. 12 in., ¼, ½ and ¾ in. open bull's eye, for BB caps, ringing gong when bull's eye is hit, self-setting, w't 13½ lbs., each .....**AEJ** $2.50

No. 19—Same as No. 19¼, ¾ in. iron, with ¼, ½, ¾ and 1 in. open bull's eye, for 22 caliber cartridges, w't 20 lbs. .....each **BAJ** $3.50

The construction of the target's surface brings out each numbered circle clearly, thus aiding the marksman in locating his shot.

No. 0116—Entirely of heavy iron, for 22 caliber cartridge, birds and stars falling back when hit, 6 objects to shoot at, made for outdoor shooting, reset by rope from stand, w't 13¾ lbs. .....each **AHJ** $3.00

No. 0118—Same as No. 0116 but larger, with 8 objects to shoot at, w't 23 lbs., each .....**BDJ** $4.00

These targets are substantially made, and will stand extreme wear and tear. The heavy metal objects have their weights so evenly distributed that the entire target is reset with a slight tug at the rope.

CAMP STOVES AND KITS.

CAMPERS' STOVES.

No. 125-G—Campers', sheet steel, with hinge doors, two holes with covers, six feet telescope pipe, size 23x12x12 in., oven 10x10x6 in., w't 15 lbs., each .....**AIE** $3.20

OUTING STOVES.

No. 50-G—Outing, sheet steel, folding, with hinged doors, sliding circular joints, size 26x10x11½ in., oven 8x10x 6 in., takes 5 in. pipe, w't 12½ lbs., each .....**CFJ** $6.00

Can be put together without the use of tools or rivets, and forms an air-tight stove in which the draft can be regulated to a nicety. The stove can be easily taken apart.

In assembling, the sides are secured to the bottom by sliding the sections together; the front and back sections are then forced down, after which the bottom, sides and top of oven are put into position; the top is next slid on from the front.

ONE IN A BOX.

CAMP STOVES.

No. G102—"The Furnace in a Bucket," special steel, 10x10 in., strong bail, whereby it may be easily carried from place to place, lower half is fuel reservoir, where gasoline is stored under slight air pressure, burner is controlled by a single valve, flame can be turned down to the smallest glimmer if desired, w't 15 lbs., each .....**JGBJ** $12.00

For hunters, fishermen, summer campers, picnickers, cottagers, surveyors, construction gangs, sportsmen's clubs, lumber camps, outing parties, auto parties, etc. Furnishes powerful heat with a minimum expenditure of fuel. A can of coffee can be made, a fish broiled or a bird roasted over this stove quicker and fully as well as over the best gas range made.

ONE IN A CARTON.

POCKET KOOK-KITS.

No. 126—Consists of two 9x4x1 in. pans, two 4½x2½x3 in. drinking cups, one 4½x2½x8½ in. coffee, soup and water boilers, all made of heavy tin with detachable heavy wire handles, a collapsible fire grate 7x8 in. with four heavy wire legs, 7¾ in. long, all parts on grate electric welded, w't 2 lbs. .....each **BAJ** $3.50

The only perfect pocket Kook-Kit made. Can be easily put together and taken apart. The two pans are designed for use as separate frying pans or roasting pans, by simply placing both bottoms together, one on top of other. The rims are seamed to form close fitting vessels. Will fit any coat pocket.

TWO DOZEN IN A CARTON.

DECOYS AND DECOY WEIGHTS.

KANKAKEE WOOD DUCKS.

Mallard, Canvas Back, Red Head, Blue Bill, Sprig Tail and Blue Winged Teal.

No. 1—Glass eyes, best grade, assorted, per dozen .....**DIE** $9.00

No. 2—Tack eyes, second grade, assorted.....per dozen **DBE** $7.70

No. 3—Painted eyes, third grade, assorted.....per dozen **CFJ** $6.50

No. 3 not carried in canvas back.

No. A1—Extra quality, glass eyes, mallards only, assorted, two-thirds male and one-third female, w't per doz. 27 lbs.....per dozen **JFFJ** $12.00

These decoys are made of the best seasoned white cedar, flat bottomed, will float evenly on the water at all times, are well balanced and nicely painted. Assorted one-third female and two-thirds male.

ONE DOZEN IN A CRATE. AVERAGE W'T PER DOZEN 33 LBS.

FOLDING WOOD DUCKS.

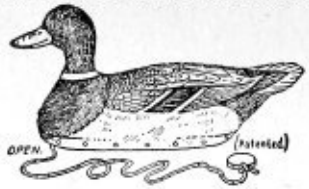
FOLDED

IN USE

No. 6—Illinois River, profile, 3 in group, 2 male and 1 female, painted in natural colors to represent male and female mallards, canvas backs, blue bills, black mallards, whistlers, red heads, teal and widgeons—mallards will always be sent unless otherwise specified—w't per doz. 10 lbs., per dozen .....**DIE** $9.00

Four floats take one dozen of the decoys. One cord and anchor for each group of three decoys.

ONE DOZEN IN A STRONG CARRYING BOX.

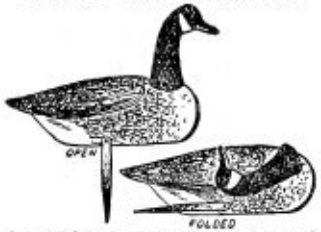


FOLDING DUCKS.

No. 7—Acme, wood base, waterproof cloth form, nicely painted with anchor, folding wire frame, w't per doz. 14 lbs., per dozen **JFJE** $11.00

ONE DOZEN IN A CASE.

AUTOMATIC CANVAS DUCKS.



No. 14—Collapsible decoys, mallard only, canvas body, wooden float and head block, one wire spring head support, one wire tail support, complete with anchor and cords, assorted 8 males and 4 females to the dozen, per dozen .....**JFFJ** $12.00

These automatic canvas decoy ducks open up automatically, no lever, no cranks, no air pressure, they expand by means of a spring when the anchor cord is unwound. They are light in weight, pack in small space, can be collapsed quicker than any other decoy made. They give good service and are hard painted, true to life.

ONE DOZEN IN A NEAT CARRYING BOX, WITH HANDLE; W'T PER DOZEN ABOUT 14 LBS.

FOLDING CANADA GEESE.

No. 12—Canada geese decoys for land shooting, profile wooden bodies, folding metal heads and folding wooden sticks which may be pressed into the ground, natural appearing, w't per doz. 6 lbs....per dozen **JFJE** $11.00

ONE DOZEN IN A NEAT CARRYING BOX.

Goose Decoys open ready for use.

No. 10—Illinois River, Canada geese, profile, 3 in group, colors accurately represented, four floats take one dozen of the decoys, one cord and anchor for each group of three, w't per doz. 12 lbs.....per dozen **JGGJ** $14.00

ONE DOZEN IN A STRONG CARRYING BOX.

FOLDING PAPER DECOYS.

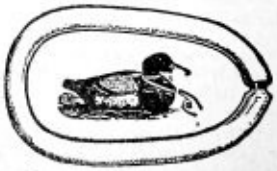
Johnson's Mallard, Blue Bill and Canvas Back Ducks. Specify Kind when Ordering.

No. 25—Folding decoys, life size, drakes and hens, assorted, printed on a heavy grade of jute cardboard, a very tough stock, put through a waterproofing process which makes it impossible to absorb moisture, made to float by inserting a quarter-inch pine board which fits snugly inside the body when unfolded, board is dyed water color and also waterproofed, fitted with a pendulum weight weighing about an ounce to retain its upright position, w't complete 6 oz. .....per dozen **BBJ** $4.00

No. 27—Paper portion only, for No. 25 decoys, specify kind when ordering, per dozen .....**ADJ** $2.50

Cheapest, lightest and most compact decoy made. Easily carried in a hunting coat.

ONE DOZEN BOARDS IN A PAPER BOX; ONE DOZEN PAPER PORTIONS IN AN ENVELOPE.



LIVE DECOY FASTENERS.

No. 17—Samuell, flat brass collar, hinged to admit of fastening, riveted ring for cord, w't per doz. 3 oz., per dozen .....**AEJ** $2.50

Fastens around neck and has many advantages over leg fastening. Ducks can remain in water longer, as they have better use of their feet. Don't splash water all over you when taking them up.

DECOY WEIGHTS.

No. 15—Galvanized iron, 4¼x2¾ in., w't per doz. 6 lbs., per dozen .....**JIJ** $1.50

GRASS SUITS, SHOE DRESSING AND CALLS.

GRASS HUNTING SUITS.

Grass Hunting Suits, for wild goose, duck, and all kinds of shore bird shooting, made of long, tough marsh grass into cape-coat with hood, are convenient to wear and shoot from, make good waterproofs in rainy weather, are easily packed and carried, w't less than 4 lbs.,
per dozen .....**ABIE** $21.60

GAME CARRIER.

No. 0—Barnum, 2 tinned steel loops, stitched tan duck connecting strap, length folded 8 in., w't per doz. 2¼ lbs. .....per dozen **ABJ** $2.00

LOOSE.

OILED CLOTHING.

Each step in the manufacture of this unequalled line of clothing, from the selecting of the long staple cotton, from which to make the special close-woven cloth, to putting on the brand, is taken with the one single purpose in mind—viz., TO MAKE AN OILED GARMENT THAT IS THE BEST THAT CAN BE MADE. A garment that is absolutely **Waterproof, Durable,** and entirely **free from stickiness.**

In addition to the extreme and minute care in the process of manufacturing, Clothing has several features, found in no other line. All Slickers and Frocks have Shoulder Caps, Elbow Patches, Inner Sleeves, Weather Pieces, Flannel-lined Collars, and Throat-pieces, Two Pockets. The Buttons on the Garments are patent Eyelet-Fastened Zinc Buttons with a smooth back that does away entirely with the annoying catching and tearing of clothing so common in other lines. Furthermore these buttons are superior to others in that they will not rust or corrode.

PLAIN SLICKERS.

—Yellow, sizes 0, 1, 2 and 3 assorted, w't per doz. 58 lbs., per dozen .....**BHHJ** $48.80

—Black, otherwise same as above .....per dozen **CJJJ** $50.00

PAULINS AND WAGON COVERS.

Important Information Regarding the Three Grades of Tents, Wagon Covers, etc., which we handle.

Before placing your order for Tents, Wagon Covers, etc., decide what kind of goods will sell best and give satisfaction. Every buyer understands his own trade best and therefore he must decide for himself what grade of goods to buy in order to satisfy his trade.

We handle Tents, Covers, etc., in three different grades—[illegible] grade, [illegible] grade and **Standard grade.** In this way we can satisfy the demand of all classes of trade.

EXPLANATION OF GRADES.

[illegible] **Grade**—This grade of goods is guaranteed absolutely **Full Weight** and **Full Size**, and is made of selected first quality duck. [illegible] goods are not sold in competition with other makes because they are worth more. We recommend this grade where absolutely the best is wanted, and where the price is not the object. There are no better Tents or Covers made at any price.

[illegible] **Grade**—Some people want a medium good article at a medium price, something that will give good service and still not too high in price. Our [illegible] grade is in this class of goods, **Medium Price, Good Quality** and **Full Size.** We highly recommend [illegible] goods, and you will find them satisfactory to both yourself and your trade.

Standard Grade—This grade is made to meet competition and for use in mild climates and for short service. It is light in weight, but measures full size, both in center height and height of walls.

	BJJ	BDJ	BIJ	CCJ

Milk wagon covers carried in grade only.

BLACK OILED TARPAULINS.

Made in Any Size.

Per square ft. .....JF $0.10

PERFECTION WATER-PROOFING.

No. 6G—Waterproofing compound in semi-solid form, guaranteed to be waterproof if properly applied, w't per doz. cans 12 lbs., per dozen cans.....EJE $8.40

To be thinned with gasoline, linseed oil or any drying oil, apply to dry surface that it may be absorbed. One gallon will waterproof about 100 sq. ft. of canvas, on closely woven goods it will go much further. Does not injure fabric to which it is applied or make it stiff. Will dissolve in gasoline or oil slowly, but if wanted for immediate use put can in warm water or melt over a little heat and pour into gasoline.

For automobile tops, motor boat canopies, buggy tops, tents, awnings, tarpaulins, boats, sleeping bags, water buckets, horse and wagon covers, hunters, sportsmen's and workmen's clothing, etc.

In semi-solid form, no danger in carrying it in stock.

ONE HUNDRED 1 LB. CANS IN A CASE.

METALLIC CARTRIDGES.

All Peters Cartridges Are Loaded with Either King's Celebrated Semi-Smokeless or with Smokeless Powder

RIM FIRE.

22—Short Blank, powder 3 grains, for 22 caliber revolvers and pistols.
32—Short Blank, powder 9 grains, for 32 caliber revolvers and pistols.
22—BB caps, round ball, for Flobert and other gallery rifles, lead 20 grains, fulminate and smokeless powder.

22—C. B. caps, conical swaged bullet, for gallery rifles, lead 29 grains, lubricated, semi-smokeless and smokeless powder.
22—Short, powder 3 grains, lead 30 grains, for 22 caliber revolvers and rifles, semi-smokeless and smokeless powder, mushroom, lubricant and non-lubricant bullet.

22—Long, powder 5 grains, lead 35 grains, for 22 caliber revolvers and rifles, semi-smokeless and smokeless powder, mushroom, lubricant and non-lubricant bullets.
22—Long rifle, powder 5 grains, lead 40 grains, bullet crimped but slightly to insure accuracy, for long range and target practice, semi-smokeless and smokeless powder, mushroom and non-lubricant bullet.

12—Stevens Pope Armory, powder 5 grains, lead 40 grains, bullet crimped into shell, loaded with semi-smokeless powder.
22—Extra long, powder 7 grains, lead 40 grains, adapted for various rifles of this caliber, loaded with semi-smokeless powder.
22—W. R. F., powder 7 grains, lead 45 grains, adapted to Winchester repeating rifle, model 1890, semi-smokeless and smokeless powder.
22—Winchester Automatic, adapted to Winchester automatic rifle, lead 45 grains, smokeless powder.

25—Short Stevens, powder 5 grains, lead 69 grains, semi-smokeless powder.
25—Stevens, powder 11 grains, lead 65 grains, adapted to Winchester and Stevens single shot rifles, semi-smokeless powder.
32—Extra short, powder 6 grains, lead 55 grains, for 32 revolvers and rifles, semi-smokeless powder.

32—Short, powder 9 grains, lead 80 grains, for 32 short caliber revolvers and rifles, semi-smokeless powder.
32—Long, powder 13 grains, lead 90 grains, for 32 long caliber revolvers and rifles, semi-smokeless powder.

41—Short, powder 13 grains, lead 130 grains, for 41 short caliber revolvers and rifles, semi-smokeless powder.

CENTER FIRE.

22—Winchester, powder 13 grains, lead 45 grains, for Winchester single shot rifles, semi-smokeless powder.
25-20—Marlin and Winchester repeating rifles, powder 17 grains, lead 86 grains, for Marlin rifles, semi-smokeless and smokeless powder.

25-30—Winchester and Stevens, single shot, powder 20 grains, lead 86 grains, for Winchester and Stevens single shot rifles, semi-smokeless and smokeless powder.
25—Automatic pistol, 50 grain metal cased bullet, smokeless powder, for Colt, Browning and Clement automatic pistols.

30—Luger, caliber same as 7.65 M.M., German and American, for Luger Automatic pistol, soft point or steel jacket bullet, lead 93 grains, smokeless powder.
32—S. & W., powder 9 grains, lead 85 grains, for Smith & Wesson and other revolvers, semi-smokeless and smokeless powder.
32—S. & W. long, powder 13 grains, lead 98 grains, for Smith & Wesson hand ejector revolvers, semi-smokeless and smokeless powder.

32—Colt New Police, or Police Positive, powder 13 grains, lead 98 grains, for Colt's new police revolvers, semi-smokeless and smokeless powder.
32—Colt Automatic, for Colt, Savage, Browning and Clement Automatic pistols, metal case bullet, 74 grains, smokeless powder.

32—Short Colt, powder 9 grains, lead 80 grains, for 32 short caliber revolvers, semi-smokeless and smokeless powder.
32—Long Colt, powder 12 grains, lead 90 grains, for 32 long caliber revolvers, semi-smokeless and smokeless powder.

32-20—Marlin, Winchester and Colt, powder 20 grains, lead 100 grains, for Marlin and Winchester rifles, also Colt and other revolvers, semi-smokeless and smokeless powder.
38—S. & W., powder 14 grains, lead 145 grains, for Smith & Wesson and other revolvers, semi-smokeless and smokeless powder.
38—S. & W. Special, powder 21 grains, lead 158 grains, for Smith & Wesson and Colt revolvers, semi-smokeless and smokeless powder.

38—S. & W., Special gallery, powder 10 grains, lead 69 grains, for Smith & Wesson and Colt revolvers, smokeless powder

CENTER FIRE.

38—Colt Automatic, for Colt automatic revolvers, 136 grains, metal case bullet, smokeless powder.
38—Short Colt, powder 18 grains, lead 130 grains, for Colt revolvers and other rifles of this caliber, semi-smokeless and smokeless powder.

38—Long Colt, powder 19 grains, lead 150 grains, for 38 long caliber revolvers and rifles, semi-smokeless and smokeless powder.
38—Colt New Police, or Police Positive, powder 14 grains, lead 150 grains, for Colt new police revolvers, semi-smokeless powder.

38-40—Marlin and Winchester, powder 40 grains, lead 180 grains, for Marlin, Colt and Winchester rifles, also Colt and other revolvers, semi-smokeless and smokeless powder.
380—Colt Automatic, for Colt revolvers, 95 grains, metal case bullet, smokeless powder.

41—Short Colt D. A., powder 14 grains, lead 160 grains, for 41 caliber Colt D. A. revolvers, semi-smokeless powder.
41—Long Colt's D. A., powder 21 grains, lead 200 grains, for 41 caliber Colt's D. A. revolver semi-smokeless and smokeless powder.

44—Bulldog, powder 15 grains, lead 168 grains for 44 caliber Webley and bull dog revolvers, semi-smokeless powder.
44—Webley, powder 18 grains, lead 200 grains, for 44 caliber Webley double action revolvers, semi-smokeless powder.

44—S. & W., Russian, powder 23 grains, lead 246 grains, for Smith & Wesson and Colt revolvers, semi-smokeless and smokeless powder.
44—S. & W., American, powder 25 grains, lead 205 grains, for Smith & Wesson revolvers, semi-smokeless powder.
44—S. & W. Special, powder 26 grains, lead 246 grains, for Smith & Wesson 44 special revolver, smokeless powder.
44-40—Marlin, Winchester and Colt, powder 40 grains, lead 200 grains, for Marlin and Winchester rifles, also Colt and Smith & Wesson revolvers, semi-smokeless and smokeless powder.

44—Marble game getter, powder 20 grains, lead 119 grains, for Marble game getter and other rifles, semi-smokeless powder.
45—Colt U. S. A., powder 28 grains, lead 255 grains, semi-smokeless powder.
45—Colt U. S. A., powder 38 grains, lead 255 grains, semi-smokeless and smokeless powder

PETERS METALLIC CARTRIDGES.

All Peters Cartridges are Loaded either with King's Semi-Smokeless or with Smokeless Powder.

CENTER FIRE MILITARY AND SPORTING.

25—Colt Automatic, 200 grains, metal case bullet, for Colt's revolvers, smokeless powder.

22—High Power Savage, for Savage model 1899 rifle, diam. of bullet .228 in., w't of bullet 70 grains, striking energy 1206 ft. lbs., metal case or soft point, smokeless powder.

25-35—Winchester, lead 117 grains for Winchester repeating rifles model 1894, and Savage repeating rifle, smokeless powder.

25-36—Marlin, lead 117 grains, for Marlin rifle, smokeless powder.

25—Remington Autoloading, 117 grains bullet, for Remington autoloading rifles, smokeless powder.

30-30—Marlin and Winchester, lead 170 grains, for Marlin, Winchester model 1894 and Savage rifles, semi-smokeless or smokeless powder.

30-30—Marlin and Winchester, short range, lead 113 grains, for Marlin, Winchester and Savage rifles, smokeless powder.

30-30—Remington, autoloading, metal case, 170 grains, soft point for Remington autoloading rifles, smokeless powder.

30-40—U. S. Army, lead 220 grains, for Krag-Jorgensen repeating rifle, adopted by U. S. government, and Winchesters model 1895, and single shot rifles, smokeless powder.

30—Savage, lead 190 grains, for Savage repeating rifle, smokeless powder.

CENTER FIRE MILITARY AND SPORTING.

32-40—Marlin and Winchester, lead 165 grains, for Marlin, Winchester, Savage and Ballard rifles, semi-smokeless and smokeless powder.

32—Winchester special, bullet 170 grains, for Winchester rifle, smokeless powder.

32—Remington autoloading, metal case or soft point, lead 165 grains, for Remington autoloading rifle, smokeless powder.

32—Winchester, self-loading, metal case or soft point, 165 grains, for Winchester model 1905 self-loading rifle, smokeless powder.

35—Winchester, self-loading, metal case or soft point, 180 grains, for Winchester model 1906, self-loading rifle, smokeless powder.

33—Winchester, bullet 200 grains, high power for Winchester rifle, model 1886, soft point or metal case, smokeless powder.

35—Winchester, bullet 250 grains, high power, for Winchester rifle, model 1886, soft point or metal case, smokeless powder.

35—Remington, autoloading, metal case or soft point, lead 200 grains, for Remington autoloading rifles, smokeless powder.

351—Winchester, self-loading, metal case or soft point, lead 180 grains, for Winchester model 1907, self-loading rifles, smokeless powder.

38-55—Marlin and Winchester, lead 255 grains, for Marlin, Winchester, Savage and Ballard rifles, semi-smokeless and smokeless powder.

CENTER FIRE MILITARY AND SPORTING.

38-56—Wicnhester, lead 255 grains, for Marlin rifle, model 1895, and Winchester rifle, model 1886, and single shot, semi-smokeless and smokeless powder.

401—Winchester self-loading, metal case or soft point, for Winchester model 1910, self-loading rifles, smokeless powder.

405—Winchester, lead 300 grains, for Winchester model 1895, repeating rifle, metal case or soft point, smokeless powder.

40-82-260—Marlin and Winchester, powder 82 grains, lead 260 grains, for Marlin rifle, model 1895, and Winchester single shot and repeating rifles, semi-smokeless and smokeless powder.

45-70-405—Government, powder 70 grains, lead 405 grains, for U. S. Army, Springfield, Marlin and Winchester rifles, semi-smokeless and smokeless powder.

45-90—Marlin and Winchester, powder 90 grains, lead 300 grains, for Marlin and Winchester rifles, semi-smokeless and smokeless powder.

PETERS SHOT CARTRIDGES.

Rim Fire, Loaded with King's Semi-Smokeless Powder.
22 and 32 Long.

Center Fire, Pistol Size, Loaded with King's Semi-Smokeless Powder.

32—Smith and Wesson, size shot 10.
38—Smith and Wesson, size shot 9.
38-40—Winchester and Marlin, size shot 8.
44-40—Winchester and Marlin, size shot 8.
44—XL, sizes 6 and 8 shot. U. M. C. make only. Peters Cartridge Co. do not manufacture.
45-70—Government, Peters make, size shot 8.

Per 1000 ..... CBAJ $42.00

10—Gauge Cannon, loaded with 8 drs. black powder, per 100 ..... BAJ $2.50

TWENTY-FIVE IN A BOX.

The Peters Cartridge Co. may be regarded as a pioneer in the manufacture of ammunition by mechanical processes. It literally created a new article of commerce and established a trade previously unknown or thought impossible, thus benefitting many, and opening a field of operation whose advantages other manufacturers have been quick to seize.

Its loading machines are without an equal in the world. They load with great rapidity and with far greater accuracy and uniformity than can be had by the most careful and expert hand-loading. They are entirely automatic and each operation is so guarded by testing and tell-tale devices that a mistake in loading is practically impossible.

The factories of The Peters Cartridge Co. are among the largest and certainly comprise the most complete ammunition plant in the world. The output in all kinds of shells and ammunition amounts to hundreds of millions annually.

It produces the greatest variety of goods of any cartridge concern in the world, and it does what no other concern attempts, makes practically everything entering into the completed shell or cartridge of whatever kind, except some of the rawest parts of the raw material and some of the nitro powders. The result is, The Peters Cartridge Co. not only obtains everything at first hand, but is able to watch over every detail of the process and to know that it is right.

Take, for instance, the Primer. This Company not only constructs all its own primers, but mkaes every particle of fulminate entering into same. It carefully selects and tests all material, chooses the proper conditions, and conducts with scientific accuracy every detail of the process. It is, therefore, able to maintain a very high and uniform standard in all its primers and primer material, and to secure the most prompt and complete combustion and the highest velocity for all powders.

Take again the Wads. All wads used or sold by this company are of its own manufacture. It has, in connection with its works, one of the most complete felt factories anywhere to be found. It makes felt wholly for wads, and with a view to securing the best results in loading. The material is carefully selected, the sheets are accurately gauged, and the felting done in such way as to secure the greatest elasticity.

The same may be said of the Shot. This company makes its own shot, having for this purpose a tower of the latest pattern. The shot can, therefore, be always counted on as the same, which is a very important matter in securing accuracy and uniformity in results.

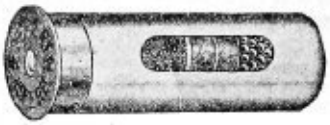
25 IN A BOX; 500 IN A CASE.

We suggest the following "League" loads for the various game shooting—

Quail and Partridge—**No. 728**—3 drs. powder, 1 oz. No. 8 shot.
Quail and Partridge—**No. 757**—3¼ drs. powder, 1⅛ oz. No. 7 shot.
Prairie Chicken—**No. 757**—3¼ drs. powder, 1⅛ oz. No. 7 shot.
Prairie Chicken—**No. 756**—3¼ drs. powder, 1⅛ oz. No. 6 shot.
Ducks—**No. 756**—3¼ drs. powder, 1⅛ oz. No. 6 shot.
Ducks—**No. 755**—3¼ drs. powder, 1⅛ oz. No. 5 shot.
Ducks—**No. 754**—3¼ drs. powder, 1⅛ oz. No. 4 shot.
Rabbits and Squirrels—**No. 727**—3 drs. powder, 1 oz. No. 7 shot.
Rabbits and Squirrels—**No. 726**—3 drs. powder, 1 oz. No. 6 shot.
Rabbits and Squirrels—**No. 757**—3¼ drs. powder, 1⅛ oz. No. 7 shot.
Rabbits and Squirrels—**No. 756**—3¼ drs. powder, 1⅛ oz. No. 6 shot.
Doves—**No. 728**—3 drs. powder, 1 oz. No. 8 shot.
Doves—**No. 757**—3¼ drs. powder, 1⅛ oz. No. 7 shot.

In analyzing a shell, we find two distinct features which govern its worth, namely, Quality and Dependability. Quality means, of course, certain features which ammunition makers and users agree are essential to a first-class load. Dependability means that those features must appear with absolute uniformity in every load.

If two shells, supposed to be the same, give different results, owing to variations in materials or in loading, uniformity will be sacrificed, and consequently the result of each shot must be more or less in doubt.



A manufacturer of loaded shells who buys primers, or fulminate from which primers are made, from one concern, his shot from another, his wads from still another, etc., can never be sure of an absolutely uniform standard, because the quality of his raw materials is subject to the whim of various manufacturers over whom he has no control and who are not vitally interested in the quality of the completed shell, but only in the profit on their particular goods.

On the other hand, if there were a concern manufacturing ammunition that used only standard brands of powder, much of it made under its own supervision, if it maintained its own shot tower because it insisted on having perfectly formed and polished shot, and was not satisfied with the quality of the best shot procurable in the open market, if it refused to use wads unless of a certain uniform standard of elasticity and freedom from dirt, and so was forced to make its own, if its loading machines were marvels of mechanical perfection and embodied many special features covered by its own patents, if it followed the most rigid system of inspection and maintained the highest standards known to ammunition experts—if there were such a concern, its product ought to be, and would be, both dependable and of unsurpassed quality.

There is one such concern, namely, The Peters Cartridge Company, of Cincinnati, Ohio. Its factories cover an area of twelve acres and comprise nearly 500,000 square feet of floor space, it manufactures or supervises the manufacture of every item of raw materials entering into its finished product, and it is thus the most complete plant of its kind in the world.

Guaranty—These shells are made by the latest improved machinery and are loaded with extreme care. We warrant every Peters' loaded shell we send out. Signed, **Hibbard, Spencer, Bartlett & Co.**

PETERS "REFEREE" LOADED SHELLS.

Purple Colored.

Combinations of powder and shot not shown in Peters' or our catalogue must be charged an arbitrary list price of $5.00 higher than the similar regular load.

Referee Shells are Loaded with King's Semi-Smokeless Powder.

This is a wonderful powder. While it is neither a black nor a nitro powder, nor a mixture of the two, it has the best qualities of both without their faults. It has the high velocity of a nitro powder with the low breech pressure of black. It is just as safe as black powder and may be used in the same way, bulk for bulk, though the same results may be obtained with less charge. It is free from smoke and very clean, permitting of hundreds of shots being fired without cleaning and without injury to the gun or loss of accuracy. It will not deteriorate nor is it affected by climatic influences, as are most of the nitro powders.

Many experts prefer it to any nitro powder, while the beauty of it is, it costs the same as black powder and requires nothing better than the ordinary gun, shell, primer and loading, such as would be required for a good quality of black powder.

12 Gauge, Loaded with King's Semi-Smokeless Powder.

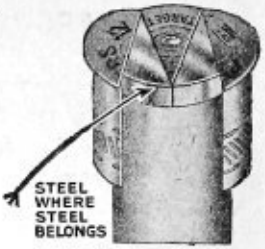
PETERS "TARGET" LOADED SHELLS.



A Medium Brass Shell for Bulk Smokeless Powders.
Maroon Colored.

"TARGET" shells have the new "steel where steel belongs" reinforced head, the steel drives into the rim and clear across the head, preventing the gases from working back into the single thickness of brass that forms the head and rim of competitive shells and bursting them. The special base wad is wedged into place by the upset battery cup and cannot blow forward into the barrel.

Special Loaded Shells.

Combinations of powder and shot not shown in Peters' or our lists must be charged an arbitrary list price of $5.00 higher than the similar regular load.

E3187½Ch.	Throating	3½	1¼	7½Ch.	BEEJ	42.50

"Target" and "Ideal" shells have the new "steel where steel belongs," reinforced head. The steel drives into the rim and clear across the head, preventing te gases from working back into the single thickness of brass that forms the head and rim of competitive shells and bursting them. The special base wad is wedged into place by the upset battery cup and cannot blow forward into the barrel.

"IDEAL."

12 Gauge, Loaded with New E. C. Improved Smokeless Powder.

GUN AND BLASTING POWDER.

KING SHOT GUN.

FFFFG. FFFG. FFG.

FG. CG.

Quick Shot (Black Powder).

Kegs, 25 lbs., sizes FFFFG, FFFG, FFG and FG* ..... each $6.00
Half Kegs, 12½ lbs., sizes FFFFG, FFFG, FFG and FG* ..... each 3.00
Quarter Kegs 6¼ lbs., sizes FFFFG, FFFG, FFG and FG* ..... each 1.75
Pound Cans (14 in case), FFFG, FFG and FG* ..... each .30
Half Pound Cans (24 in case), FFFG, FFG and FG* ..... each .25

"Quick Shot" powder is celebrated for its strength, velocity, cleanliness, quickness of ignition and freedom from dense, foul smoke. It is unequaled for general field work, and is especially adapted to trap and rapid wing shooting. A great prize winner, and the delight of sportsmen. The very best black powder made.

KING BLASTING.

FFF FF. F.

For mining very soft or seamy coal. For mining soft coal and breaking stone. For mining hard coal and general blasting.

C. CC.

For railroad excavations, coal and iron mining, and quarrying hard stone. For granite and heavy blasting.

Kegs, 25 lbs., sizes FFF, FF, F, C and CC* ..... per keg $2.00

Used with great satisfaction by miners, contractors and quarrymen. It possesses unusual strength, and makes but light smoke.

KING SEMI-SMOKELESS.

FFFFG. FFFG. FFG.

FG. CC.

Kegs, 25 lbs. (bulk), FFFG, FFG, FG and CG* ..... each $10.00
Half Kegs, 12½ lbs. (bulk), FFFG, FFG, FG and CG* ..... each 5.25
Quarter Kegs, 6¼ lbs. (bulk), FFFG, FFG, FG and CG* ..... each 2.75
Pound Cans (bulk), FFFG, FFG, FG and CG* ..... each .50

Combines all the best qualities of black powder with the best qualities of nitro powder. Gives the highest velocity of nitro powder with the low bursting strain of black powder. Produces very little smoke and no offensive odor; leaves but the slightest deposit; does not cake or cause leading, pitting or discoloration of gun. Gives a fine pattern; is quick, strong, penetrating, far reaching, always accurate and reliable, and is as safe as any black powder.

Requires no priming and nothing better than the ordinary shell, primer and wadding for the highest efficiency. A great powder for field and trap, and especially gratifying to those desiring a better article than black powder and less expensive than nitro powder.

It is equal to the best for shot guns, but excels anything yet discovered for rifles and pistols. It is suited equally to all calibers and to all sizes and kinds of metallic ammunition, attention to the size of grain only being necessary in order to secure the best results. It gives to the ball great velocity, range, penetration, accuracy and very slight trajectory, at the same time leaving the gun almost absolutely free from fouling. Though having a muzzle velocity of nearly 1,700 ft., it does not strip the ordinary lead ball, or cause leading or wild and unaccountable shots.

The grains are hard and resemble those of black powder, with a density of weight somewhat less. The keeping quality of this powder would seem to be perfect. After months of storing in ordinary powder kegs, in ordinary magazines and in all temperatures, with frequent tests on instruments, there has not been discovered the slightest trace of deterioration, or any material variation in results.

KING CANNON.

Kegs, 25 lbs., FFFFF only, for celebration purposes* ..... per keg $3.50

DUPONT BLASTING.

Kegs, 25 lbs., sizes FFFF, FFF, FF, F and C, CC, CCC each* $2.50

BLASTING WITH POWDER.

The great advantage that black blasting powder has over high explosives for use in coal mines, building-stone quarries and for blasting in soft material is, that it exerts a strong push upon the material to be moved and not a blow similar to that exerted by high explosives. This makes black powder very valuable in quarry work where it is desired to obtain material in large blocks.

For use in mining, as the ordinary black powder is in grains, it is impossible to put it in most drill holes unless confined in cartridges, which are usually cylinders of manila paper. Bore holes underground should never be loaded with loose powder on account of the danger of dust from the powder coming in contact with lights and carrying the flames into the main body of powder, thus causing an explosion. However, in quarry work, railroad and other grading it can be poured into dry downward holes. In large chamber blasts, the powder packed in kegs or bags can be placed in the room excavated to receive it.

To spring a hole, explode a stick or two of dynamite in the bottom with very little or no tamping. The explosion forms a chamber or pocket at the bottom, where a large pocket is required this operation can be repeated with increased charges. When the pocket is thoroughly cooled, pour the powder into this pocket until it begins to come up in the hole, placing the means of ignition as close to the centre of the charge as possible. Then tamp the hole solid to the collar.

The cartridges for use in mines can be made by rolling the paper around a wooden cartridge bar of a slightly smaller diameter than the drill hole. The loose edges of the paper are stuck down by means of miners' soap, one end of the paper is folded over to close the end of the cartridge, and the stick when removed, leaves a paper cylinder. When the cylinder is filled with powder, the cartridge is completed by folding down the other end.

A uniform and compact tamping is essential with the use of black powder. For tamping black powder charges the material used should be free from small pieces of stone or other hard matter that might produce sparks or damage the fuse; hence stone dust, coal dust, etc., are not considered suitable as tamping. The best material is moist clay, which should be rammed home in layers with a wooden tamping rod, a paper wad being placed between the powder charge and the first layer of clay. In holes having anything but a downward slant the tamping material is best wrapped in short paper cartridges.

DUPONT CANNON.

Kegs, 25 lbs., FF, FFF, FFFF, FFFFF, per keg* $2.75

This powder is used for celebrating purposes and the manufacture of fireworks and is also used in granite quarrying.

Dynamite, caps or powder cannot be shipped with other goods, neither can they be sent by express. Each must be shipped separately, except 100 only caps with each 100 feet of safety fuse may be sent, up to 600 caps and 500 feet of safety fuse. No more than 600 caps may be shipped with any larger amount of safety fuse.

**OWING TO CITY ORDINANCES WE ARE UNABLE TO CARRY IN STOCK, POWDER, DYNAMITE OR CAPS, SO THAT THESE GOODS ARE NECESSARILY FOR SHIPMENT FROM FACTORY. WRITE FOR PRICES.*

POWDER AND DYNAMITE.

Dynamite is a combination of nitro-glycerine with other explosive ingredients, and when properly manufactured is much safer than gunpowder. 40% is the grade most used and is best for quarry work, stump blasting, etc. While 30% is suitable for blasting clay, very soft rock and other material which requires a pushing rather than a shattering effect, 50% to 60% is necessary for very hard rock. 60%-is best for breaking boulders, submarine blasting and shooting wells. Sold by weight only.

To Prepare a Cartridge for Use.

Cut off a piece of fuse the required length and carefully insert the freshly cut end of the fuse in the cap. The fuse should exactly fit the cap. If it is too large, pare it down, and if too small, wrap it with paper till it is the right size. Press the cap down gently until the charge contained in the cap comes in contact with the loose powder of the fuse end, then with the crimpers tighten the empty end of the cap, so that the fuse cannot be pulled out.

The principal precaution to be observed in crimping caps on the fuse is to be careful not to crimp the caps tight enough to cut off the powder train in the fuse, thus preventing the fire from reaching the cap and causing a failure of the blast.

If the place where the blasting is being done is wet, the filling of the cap must be protected, as if allowed to become damp it might cause the blast to hang fire or miss altogether. This trouble can be very simply prevented by smearing the outside junction of the fuse and cap—i. e., where the cap is crimped to the fuse as well as the hole in the cartridge where the fuse enters—with grease, tallow or some similar substance to keep out the dampness.

Now, having prepared the cap as just described, it is ready to be put into the cartridge. Take a pointed stick of wood about the size of a lead pencil and punch a hole in the side of the cartridge about an inch or two from one end, at an angle towards the other end. Insert the cap in this hole and tie the fuse the cap in this hole and ties the fuse tightly by means of a half hitch.

This prevents the tamping rod from coming in contact with the cap, and keeps the cap from pulling out.

Having prepared the cartridge for use in the manner described, insert it in the bore hole and push it firmly home, being sure it fully fills up the diameter of the hole, for crevices or air spaces greatly lessen the power of an explosive.

Be sure the tamping is done with a wooden rod. Never use a metal tamping rod or a rod having metal parts. An old broom handle makes an excellent tamping rod.

After the charge is pressed home as directed, put in two or three inches of fine dirt or sand, and tamp—pack—lightly. The tamping material should be packed as firmly on top of the charge as can consistently be done without disarranging the cap and fuse in the cartridge. Then fill up two inches more of the hole with tamping material, packing it in a little more firmly. After five inches of tamping covers the charge, the tamping may be rammed as hard as is possible with hand power, without danger of premature explosion. It is not safe to tamp by a blow any stronger than can be given by hand.

DU PONT.

DuPont Red Cross Farm Powder—For use in subsoiling, tree planting and stump blasting on the denser soil, made only in 1¼x8 in. cartridges, ½ lb. .....per 100 lbs. $16.50

DuPont Red Cross Stumping Powder—Intended for boulder blasting and stump blasting in sandy soil requiring a quicker and stronger explosive than farm powder, made only in 1¼x8 in. cartridges, ½ lb., per 100 lbs. $18.00

Farm powder and stumping powder are explosives especially prepared for agricultural work. They are low explosives, that cost less, will do all the work from stumps and boulders to deep plowing, (subsoiling) better than the higher grades of explosives.

DuPont, Low Freezing Ammonia Grades, Red Cross Extra.

Strength, per cent..	20	30	40
Per 100 lbs.	$16.50	18.00	19.50
Strength, per cent		50	60
Per 100 lbs.		$21.00	22.50

Red Cross extra low freezing is the best dynamite for general use, since it does not freeze until water freezes, nor thaw until ice melts. It is especially valuable for all agricultural uses, such as stump and boulder blasting, tree planting, sub-soil blasting and road making. It is very insensitive and should not be detonated with anything weaker than a No. 6 cap. The Red Cross Extra 40 per cent strength is the dynamite generally used, except for tree planting and sub-soiling. For these latter uses the 30 per cent grade is recommended. It is packed in strong wooden boxes of 25 lbs. and 50 lbs. weight. The standard size cartridges are 1¼x8 in., weighing approximately ½ lb., although special sizes can be furnished if necessary.

DuPont Ammonia Grades, DuPont Extra, DuPont Giant Extra.

Strength, per cent..	30	40	60
Per 100 lbs.	$18.00	19.50	22.50

DuPont, Low Freezing Nitroglycerine—Straight—Grades, Red Cross Nitroglycerine.

Strength, per cent...	30	40	50	60
Per 100 lbs...	$18.75	20.25	22.05	23.85

DuPont Gelatin Grades, Gelatin Low Freezing, Forcite Gelatin, Repauno Gelatin, Giant Gelatin.

Strength, per cent..	40	50	60
Per 100 lbs.....	$20.25	22.05	23.85

DuPont, Nitroglycerine—Straight—Grades, Giant Nitroglycerine.

Strength, per cent ..	30	40	50	60
Per 100 lbs...	$17.75	19.35	20.95	22.55

Packed in 25 and 50 lb. cases.

BLASTING WITH DYNAMITE.

AETNA.

Aetna Farm Dynamite—Recommended for subsoiling, tree planting and ordinary blasting about the farm, made only in 1¼x8 in. cartridges, ½ lb., per 100 lbs. $16.50

It may also be used for stump blasting, but in localities where the stumps are usually large, we recommend Aetna stump powder. Aetna dynamite is not used for rock or boulder blasting; for this class of work we recommend 40 to 50 per cent standard low freezing grades.

Aetna Stump Powder—Recommended for blasting stumps, block holding boulders, etc., it has a heaving and shattering effect which is absolutely necessary in properly removing stumps, made only in 1¼x8 in. cartridges, ½ lb. .....per 100 lbs. $18.80

Aetna Standard, Low Freezing Ammonia.

Strength, per cent ..	20	30	40
Per 100 lbs.	$16.50	18.00	19.50
Strength, per cent		50	60
Per 100 lbs.		$21.00	22.50

Standard low freezing dynamite is for use in cold weather, as well as in spring and fall when alternate freezing and thawing makes blasting with ordinary explosives somewhat uncertain. It is the most effective and convenient for blasting stumps, breaking boulders, digging wells, quarrying work, etc.

It does not require thawing when the temperature is 30 degree Fahrenheit or above.

Aetna Standard or Ammonia.

Strength, per cent ..	30	40	60
Per 100 lbs.	$18.00	19.50	22.50

Ammonia dynamite is a slower powder than either dynamite or gelatin, and is very useful for blasting clay, stumps and stone that is rather soft and seamy, where a pushing, lifting action rather than a shattering effect is desired.

Ammonia dynamite does not stand exposure to water as well as either gelatin or regular dynamite.

Aetna Gelatin.

Strength, per cent ..	40	50	60
Per 100 lbs.	$20.25	22.05	23.85

In gelatin dynamite, gun cotton is substituted for a portion of the nitroglycerine. It has many advantages over other kinds in that it is practically water proof, is more dense and makes much less smoke and fumes. It is used therefore, a good deal for underground mining. It is preferred by quary men because it will get out rock better than other dynamite.

Aetna Nitroglycerine.

Strength, per cent ..	30	40	50	60
Per 100 lbs...	$18.75	20.25	22.05	23.85

Packed in 25 and 50 lb. cases.

Dynamite, Caps and Powder cannot be shipped with other goods; neither can they be sent by Express. Each must be shipped separately, except 100 only caps with each 100 feet of safety fuse may be sent up to 500 caps and 500 feet of safety fuse. No more than 500 caps may be shipped with any larger amount of safety fuse.

Dynamite is packed in cases containing 25 or 50 lbs., net, in cartridges 1¼x8 in.

OWING TO CITY ORDINANCES, WE ARE UNABLE TO CARRY IN STOCK, POWDER, DYNAMITE OR CAPS, SO THESE GOODS ARE NECESSARILY FOR SHIPMENT FROM FACTORY. WRITE FOR PRICES.

DYNAMITE BLASTING SUPPLIES.

DYNAMITE BLASTING CAPS.

No. 7 (Septuple)	23.15	1.50	11.00★

Always store and carry caps separate from the dynamite. Caps cannot be shipped with dynamite. PACKED 100 IN A BOX; 1,000 IN A CARTON; 20,000 IN A CASE.

BLASTING MACHINES.

F. O. B. Chicago, Xenia, St. Louis, Louisville, St Paul.

Aetna "Lion."

No. 1—Capacity 8 to 10 holes, height of case 11 in., w't 18½ lbs. . . each ABEJ $15.00
This machine is chiefly used for shooting wells, prospecting and other blasting where but a few charges are to be fired simultaneously.

No. 3—Capacity 20 to 25 holes, height of case 13½ in., w't 22½ lbs., each . . . . . AGBE $22.00
The favorite of quarry men and rail oad contractors.

No. 4—Capacity 30 to 50 holes, height of case 18 in., w't 45½ lbs. . . each CDEJ $45.00
The best size for ordinary quarry work and railroad contractors' use, even if only twenty holes are to be fired at a shot, for the extra current compensates for leaks in the blast line which are sometimes unavoidable.

No. 5—Capacity 50 to 100 holes, height of case 20½ in., w't 64½ lbs., each . . . . . EAJJ $65.00
We believe that the No. 5 is as powerful as can be made and still be easily portable and sufficiently easy to drive to enable one man to get the full current out of it.

These machines will be found to fully sustain their reputation for reliability. They are well made throughout, work smoothly, are hard to break and easy to repair. The design is extremely simple, so that an ordinary workman can keep them in good order and make slight repairs if necessary. This simplicity of design, together with strong and durable construction, produces a machine whichwill stand the hardest usage.

LEADING WIRE.

F. O. B Chicago, Xenia, St. Louis, Louisville, St. Paul.

Aetna.

No. 16—No. 16 B. & S. gauge copper wire in coils of 500 ft., w't per coil 8½ lbs. . . . . per coil CEE $6.50

Enough leading wire is needed with each machine to make two leaders of sufficient length to reach from the blast to a safe distance at which the person who operates the machine should stand. *Five hundred* feet is the quantity usually sold, which means a distance of 250 ft. from blast, but in some cases a greater length of leading wire is needed.

CONNECTING WIRE.

F. O. B. Chicago, Xenia, St Louis, Louisville, St. Paul.

Aetna.

No. 22—No. 22 B. & S. gauge copper wire, 2 lb. spools, 600 ft. on a spool, per lb . . . . . EJ $0.90

This is a pure copper wire perfectly insulated. It is used in connecting the electrical fuses to each other where several charges are to be fired simultaneously, the holes being far apart. A small quantity only of this will be needed if the fuse wires be picked up after each blast, as they can be twisted together and used in place of connecting wire.

Safety of Electric Firing.

Electric firing is by far the safest method, because there is no waiting for the shot to go and no doubt about when it is going to explode. It enables the blaster to retire to an unexposed place in perfect safety and without undue haste, and eliminates all danger of accident because of miscalculation of the time it takes fuse to burn or because of defective fuse, which has frequently resulted in injury to men who have returned to examine a blast about the time it exploded.

In coal mines electric firing does away with practically all danger of the blast igniting gas and furthermore makes it possible to have every man out of the mine when the blast is fired. Many operators consider this latter feature so important that they have adopted electric firing because of this consideration alone.

Smoke from burning fuse is entirely avoided, an item of no little value in mine work.

ELECTRIC BLASTING FUSES.

Dupont or Aetna.

No. 6—Double strength (single strength are no longer made), heavily insulated, cotton covered exploders, w't of charge 15.43 grains or 1.00 grammes.

Length.....	4	6	8	10	12 ft.
Per 100.....	$4.50★	5.00★	5.50★	6.00★	6.50★

FIFTY IN A BOX; FIVE HUNDRED IN A CASE.

Electric fuses are the detonators used when dynamite is fired electrically. They consist of a copper capsule containing a detonating charge surrounding a fine platinum wire bridge, which joins the ends of two insulated copper wires. The ends of the copper wires are secured in the copper shell by a composition plug which renders it waterproof. The fuse is fired when a sufficient current is passed through the wires and across the platinum bridge to heat the latter to a temperature high enough to ignite the charge surrounding it.

BLASTING BY ELECTRICITY.

When a good deal of blasting is to be done, it is usual to set off the blasts by means of a battery and electric exploder (called an electric fuse). In this way any number of blasts from five or ten up to forty can be fired at once. This is found extremely convenient when it is necessary to get rid of a very large stump or extra large bowlder, as frequently several ordinary sized charges fired simultaneously will destroy an obstacle which would not be affected by the same charges fired successively or by one charge as large as all the smaller ones combined.

Directions for Using Machine.

An electric fuse should be used with the wires attached of such length that the ends may protrude from the surface after the hole is charged, the fuse head being in the center of the charge.

Tamp with dry sand, or in such a manner that the wires will not be cut nor the insulated covering upon them injured.

When all the holes to be fired at one time are tamped, separate the ends of the two wires in each hole, joining one wire of the first hole with one of the second, the other or free wire of the second with one of the third, so proceeding to the end, or the last hole.

If the wires attached to the electric fuses should not be long enough, use connecting wire for joining.

All connections of wires should be made by twisting together bare and *clean* ends, and it will be best if the joining parts be bright.

The charges having all been connected as directed above, the free wire of the first hole should be joined to one of the "leading" wires, and the free wire of the last hole with the other of the two leading wires. The leading wires should be long enough to reach a point at a safe distance from the blast—say two hundred and fifty feet, at least.

All being ready, and not until the men are at a safe distance, connect the leading wires, one to each of the projecting screws on the top of the machine, through each of which a hole is bored for the purpose, and bring the nuts down firmly upon the wires.

Now, to fire, taking hold of the handle for the purpose, lift the rack (or square rod toothed upon one side) to its full length and press it down, with all force, bringing the rack to the bottom of the box with a *solid blow*, and the blast will be made.

DYNAMITE CAPS OR POWDER CANNOT BE SHIPPED WITH OTHER GOODS, NEITHER CAN THEY BE SENT BY EXPRESS. EACH MUST BE SHIPPED SEPARATELY, EXCEPT 100 ONLY WITH EACH 100 FEET OF SAFETY FUSE MAY BE SENT UP TO 500 CAPS AND 500 FEET OF SAFETY FUSE. NO MORE THAN 500 CAPS MAY BE SHIPPED WITH ANY LARGER AMOUNT OF SAFETY FUSE.

★OWING TO CITY ORDINANCES, WE ARE UNABLE TO CARRY IN STOCK, POWDER, DYNAMITE, OR CAPS, SO THESE. C[illegible]M FACTORY. WRITE FOR PRICES.

REV-O-NOC SEAMLESS Roaster

NOT a single joint or opening where grease or dirt can hide and collect. Just think—you can clean it inside and out as easily as a china plate. It is smooth as glass and not affected by any acid whatever.

THE BOTTOM CANNOT TOUCH THE OVEN

and the food will therefore cook without any attention. Put your meat or fowl in a "Rev-o-noc" Roaster, go to church or to your club and you need not worry about a burned dinner.

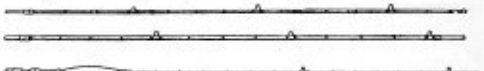
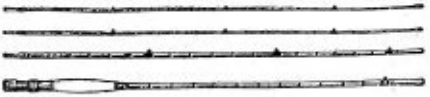
No. 187 REVONOC—4 piece and extra tip, fly, hexagonal split bamboo, nickel plated trimmings, shoulder ferrules, solid metal reel seat **below** cork grip, ring tie guides, single ring tip, very closely wound with red and black silk, length 7 ft., in a partitioned cloth bag, length in bag 23 in.....per dozen **BBGE** $37.92

POCKET.



No. V72 REVONOC—8 piece, six strip split bamboo, **13 in. joints,** nickel plated trimmings, welted ferrules, solid metal reel seat below cork grip, German silver snake guides, one 1 ring and one 3 ring tip, three ring tip fits in 5th joint making a 6 ft. rod, cluster winding of purple silk, trimmed with red, also extra winding between, making rod very strong, lengths 6 and 7 ft., in a partitioned cloth bag, per dozen .....**CHIJ** $74.80

SPLIT BAMBOO FLY.



No. 165 REVONOC—3 piece, **extra tip,** six strip split bamboo, nickel plated trimmings, shoulder ferrules, solid metal reel seat **below cork grip,** ring tie guides, fly tip, red and green silk wound, lengths 9½ and 10 ft., w't about 6½ oz., on wood form in cloth bag, per doz. **AJEJ** $17.50

No. 155 REVONOC—Without extra tip, 3 piece, six strip split bamboo, nickel plated trimmings, shoulder ferrules, solid metal reel seat **below cork grip,** ring tie guides, fly tip, red and green silk wound, lengths 9½ and 10 ft., w't about 6½ oz., in cloth bag, per doz. **JHFE** $14.46

No. 167 REVONOC—3 piece and extra tip, six strip high grade split bamboo, **nickel plated** shoulder ferrules, solid metal reel seat **below cork grip,** snake guides, fly tips, closely wound with red and green silk, length 10 ft., w't about 7½ oz., on wood form in cloth bag, per dozen .....**AEHE** $26.40

No. 169 REVONOC—3 piece and extra tip, fine quality six strip split bamboo, nickel plated mountings, welted shoulder ferrules, either ring tie or snake guides, fly tips, solid metal reel seat below **cork grip,** very closely wound with red and green silk, cluster winding on butt, lengths 9 and 10 ft., w't about 7 oz., on cloth covered form in cloth bag.....per dozen **AHJJ** $30.00

No. 569 REVONOC—3 piece and extra tip, **cane wound grip,** nickel plated metal reel seat below hand, improved ferrules, snake guides, nickel plated ring tip, wound with red, black and green silk, lengths 9½ to 10 ft., w't 6¼ oz., put up on a flannel covered form in a cloth bag, per dozen .....**BGCE** $45.60

No. 567 REVONOC—3 piece and extra tip, nickel plated metal reel seat below **cork grip,** snake guides, nickel plated ring tip, closely wound with maroon and yellow silk, length 7½ ft., w't per doz., 3¼ lbs., put up on a flannel covered form and in a cloth bag..per dozen **BHHJ** $48.00

The above rod for light snappy work.

No. 2327 REVONOC—3 piece special selected clear split bamboo, with extra tip, locking reel seat below cork grip, very fancy, whipped in crimson and grass green silk, welted waterproof ferrules, snake guides, length 9, 9½ and 10 ft.,.....per dozen **BHHJ** $48.00

No. 568 REVONOC—"LIGHT WEIGHT" 3 piece and extra tip, **cork grip,** cedar reel seat with nickel plated trimmings below hand, snake guides, nickel plated ring tip, improved ferrules, wound with black and red silk, length 8½ ft., w't about 5½ oz., put up on a flannel covered form in a cloth bag.....per dozen **CHIJ** $64.80

BAMBOO AND STEEL FISHING RODS.

SPLIT BAMBOO FLY.

No. 210 REVONOC—3 piece and extra tip, China cane, six strip split bamboo, **inlaid,** showing cedar above grip, swelled butt, welted shoulder ferrules, German silver snake guides, fly tips, solid metal reel seat below cork grip, very closely wound with red and black silk, length 10 ft., w't about 6½ oz., on flannel covered form with **leather** cups and straps in a canvass bag,
per dozen.....**DCB J** $72.00

A very handsome fly rod, especially strong and well made.

No. 283 REVONOC—3 piece and extra tip, nickel plated metal reel seat below **cork grip,** swelled butt, snake guides, nickel plated ring tip, very closely wound with red and black silk, length 9½ ft., w't about 6 oz., put up on a plush covered wood form, in a cloth bag,
per dozen .....**J F D H J** $108.00

No. 565 REVONOC—3 piece and extra tip, **cork grip,** nickel plated brass reel seat below hand, highly nickel plated, improved ferrules, snake guides, nickel plated ring tip, wound with maroon and yellow silk, length 10 ft., w't about 8 oz., put up on a green plush covered wood form in a cloth bag.....per dozen **J H F. D J** $144.00

A machine and hand made rod of beautiful design and great strength.

SPECIAL COLORADO FLY.

No. 293 REVONOC—3 piece and extra tip, best Calcutta cane, six strip split bamboo, **hand made,** full **German silver** trimmings, welted shoulder ferrules, snake guides, fly tips, solid metal reel seat below grip, special 10 in. **solid cork balanced** grip, which makes rod evenly balanced, a feature found in no other rod, closely wound with old gold and black silk, length 9½ ft., w't 6 oz., on **velvet** covered form with **leather** cups and straps in a canvas bag.....per dozen **A B I F J** $216.00

IL-A-NOY BAIT.

Three Year Guarantee Accompanies Each "Il-a-noy" Steel Rod.

No. 975—Three piece and butt, enameled brown, nickel plated trimmings, specially selected cork grip, solid metal nickel plated reel seat above hand, two ring German silver guides, three ring offset German silver tip, w't 7½ to 8½ oz., lengths 6½, 8½ and 10 ft., in red partitioned cloth bag.....per dozen **BCGE** $39.00

This rod has reversible grip—can be used as a fly rod by reversing handle.

IL-A-NOY CASTING.

No. 978.

No. 977 —Three piece and butt, enameled brown, nickel plated trimmings, specially selected cork grip, solid nickel plated metal reel seat above hand, large special Kalamazoo German silver casting guides and offset tip, finger hook, w't 7 to 7½ oz., length 5 ft., in red partitioned cloth bag.....per dozen **BFFE** $44.40

No. 976¾—Three piece and butt, enameled brown, nickel plated mountings, specially selected cork grip, solid nickel plated metal reel seat above hand, large special Kalamazoo German silver casting guides and **large offset agate tip,** finger hook, w't 7 to 7½ oz., length 5 ft., in red partitioned cloth bag,
per dozen.....**C J BE** $50.40

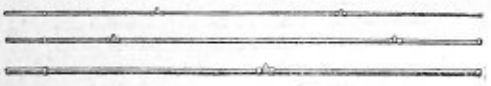
With K & K Frictionless Tip.

No. 976¾—Fitted with a K & K Frictionless Tip, otherwise same as No. 976¾.....per dozen **C J BE** $50.40

The small wheel at the end of this tip makes a line last about four times as long as with the best agate tip.

No. 976¾—Three piece and butt, enameled brown, nickel plated trimmings, specially selected cork grip, solid nickel plated metal reel seat above hand, **large agate first guide and tip,** finger hook, balance large special German silver casting guides, w't 6½ to 7 oz., length 5 ft., in red partitioned cloth bag, per dozen **C E C J** $58.80

No. 978 —Three piece and butt, enameled brown, nickel plated trimmings, nickel plated finger hook, cork grip, reel seat above hand **large special German silver mounted agate casting guides and offset agate tip,** w't 7 to 7½ oz., length 5 ft., in red partitioned cloth bag, per dozen .....**D E C E** $75.60



IL-A-NOY FLY.

No. 983—Three piece and butt, enameled brown, nickel plated mountings, special cork grip, solid nickel plated metal reel seat below hand, German silver snake guides, one ring tip, w't 7½ to 8 oz., length 9 ft., in red partitioned cloth bag....per dozen **BCGE** $39.60

This rod has a reversible grip. Can be used as a bait rod by reversing handle.

FISHING RODS.

CRUSO BAIT.

(Guaranteed.)

No. 675—CRUSO, three joints and butt, cork grip, reel seat above handle, nickel plated fittings, enameled in dead black, German silver two-ring standing guides, German silver three-ring top, lengths 5, 5½, 6, 6½, 7½, 8½ and 10 ft., in partitioned cloth bag....per dozen **ADD J** $24.00

CRUSO NEW MODEL "KALAMAZOO" CASTING.

No. 677—**Cruso,** three joints and butt, cork grip, reel seat above handle, nickel plated fittings, nickel plated finger hook, enameled dead black, large size German silver special casting guides, special shaped large size German silver three-ring top, lengths 4½, 5, 5½ and 6 ft., in partitioned cloth bag, per dozen **AFHJ** $28.00

No. 676¾—**Cruso,** special pattern large size German silver special casting guides, special pattern large size German silver mounted **agate top,** otherwise same as No. 677.....per dozen **BJGJ** $40.20

AUTOMATIC REELS.

"Meisselbach."

No. 81—100 yds., 3 in. spool, ¾ in. diameter, aluminum frame, spring of finest tempered steel, all working parts of hard brass and tempered steel, working in German silver bearings, fully guaranteed, w't 11 oz., per dozen .....**CFJJ** $60.00

This reel has an exclusive feature in a Safety Winding Spring which allows the spring to be wound up at any time when line is in or out, by turning the milled spring box, without any danger of over-winding. Main shaft is of carbon steel, substantial in size and runs in German silver bearings,

Spring is of the finest tempered steel. All working parts are enclosed.

Spool has friction release which allows stripping of spool under all conditions, and is fitted with a safety release which allows the spool to be run in at any speed without danger of injuring the mechanism.

The line is guided by two revolving rollers, which prevent it from being injured and worn, as in the case of all other reels.

ONE IN A BOX.

No. 80—Rochester, 100 yds., automatic, aluminum, satin finish, steel wearing parts, winding automatically 100 ft. without rewinding, automatic tension, w't 6½ oz....per dozen **CIFJ** $66.00

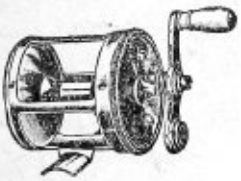
SOUTH BEND ANTI-BACK LASH.

No. 399—100 yds., 1⅞ in. pillar, 2 in. in diameter, jeweled bearings, hand polished, solid German silver, balanced white bone handle with back sliding click, per dozen **JGBJJ** $120.00

A guarantee for one year with each reel. This reel is the only one of its kind made which has a brake that works automatically with the proper force as the line slackens at the end of the cast.

The spool and gear journals are of special steel, accurately turned ground, lapped and burnished to mirror like surface, turning in solid phosphor bronze bushings.



The gearing is of special hunting tooth trem, the gear of which is cut from hard drawn brass, the pinion from special tool steel.

Can be used with or without back lash as desired.

SNELLED FISH HOOKS AND TROUT FLIES.

GOLD STANDARD SNELLS.

Gold Standard snelled hooks are the highest grade obtainable. Tied on the highest quality English hollow point hooks. The snells are made of the best heavy, selected gut, tied by the most expert tiers. The highest quality of tying is used, the snell being reinforced by an indestructible, waterproof, transparent cement. These goods are guaranteed perfect in every particular. Gut runs from 8½ to 9 inches, according to size of hooks.

ONE DOZEN IN A BOX ON A CARD.

No. 21.

MINNOWS.

MINNOWS.

Bodies.—These bodies are of choice selected red cedar, which has been thoroughly seasoned, perfect in shape, proportion and balance, from seven to eleven coats of waterproof enamel, according to the color finish, guaranteed not to crack, chip or peel, exceptionally artistic and beautiful color blendings.

Hooks.—Imported, extra strong, heavily nickel plated treble pattern, tail treble hook is two sizes larger than the side trebles, hooks are fastened by screw eyes and so suspended that they do not scratch the body.

Eyes.—Glass, with life-like appearance, correctly placed, fitted and counter-sunk.

Spinners.—Each minnow has two spinners, one at the head end and one at the tail end, revolving in opposite directions, perfect in shape and design, heavily nickel plated, polished and buffed, cone shape washer at nose gives the front spinner a metal to metal bearing surface instead of metal to wood, making the spinners revolve very easily.

Trimmings.—All trimmings, eyelets, screw eyes, beads, etc., are heavily nickel plated.

Material and Workmanship.—These minnows are unsurpassed in quality, the very best grade of material being used throughout, and expert workmanship employed in their manufacture. The durability and "game-fish-getting" qualities of these minnows make them the most popular on the market today.

AND DOWAGIAC MINNOWS.

WEEDLESS UNDERWATER.

Two Spinners, One Belly Weedless Treble and One Tail Weedless Treble, Hollow Point Hook, W't 1 oz.

No. 6008 —White body, dark shaded back, w't per doz. in carton 1½ lbs. .....per dozen **JFIJ** $11.50

No. 6001 —Rainbow color, green back, red and yellow sides blending into white belly, w't per doz. in carton 1½ lbs. ..per dozen **JFIJ** $11.50

Identically the same high grade construction as the No. 1000 series, a wonderfully effective lure and fish getter.

SURFACE OR FLOATING.

One Front Spinner 3½ in., ¾ oz. Body, One Belly and One Tail Large Treble Hook.

No. 5000 —Imitation frog back, white belly, w't per doz. in carton 1¾ lbs. .....per dozen **EFJ** $9.30

No. 5003 —White body, bright red head, w't per doz. in carton 1¾ lbs. .....per dozen **DFJ** $7.70

No. 94 —**Luminous** phosphorous enamel all white body, otherwise same as No. 5000 , per dozen.....**JFIJ** $11.50

See No. 95 below.

No. 5004 —1 oz. white body 4½ in. long with red head and collar, one belly and one tail large treble hooks, w't per doz. in carton 1¾ lbs., per dozen .....**DFJ** $7.70

No. 95 —**Luminous** phosphorous enamel, otherwise same as No. 5004 .....per dozen **JFIJ** $11.50

No. 98 —3 in., oz. body, weedless hooks, otherwise same as No. 95 .....per dozen **JFFJ** $11.00

This bait possesses the peculiar quality of absorbing light, and reflecting the same in the dark. It emits a clear white light which is made more effective by the radiant power of the water.

The strong ripple thrown by the concave collar on these numbers attracts the fish from a great distance.

MUSKIE AND BASS CASTING.

Three Extra Strong Hollow Point Treble Hooks, Head and Tail Spinners, 3⅝ in., 1½ oz. Body.

No. M1000 —Green cracked back, white belly, w't per doz. in carton 2 lbs. .....per dozen **JHCJ** $13.80

MUSKIE TROLLING.

Five Heavy Extra Strong, Hollow Point Treble Hooks, 5¼ in., 2⅛ oz. Body with Glass Eyes and Head and Tail Spinners.

No. M2001 —Rainbow color, green back, red and yellow sides blending into white belly, w't per doz. in carton 3¼ lbs., per dozen.....**AAEJ** $19.20

Highest grade material and workmanship throughout, extra strong in construction, perfect in shape and design.

COMBINATION.

Combination Minnow and Buck Tail ½ oz. Bait, Buck Tail Tied on 2⅝ in. Body Masks Large Tail Treble Hook, One Spinner.

No. 3006 —Hexagon shape white body with red and green spotted decorations, red Buck Tail, w't per doz. in carton 1½ lbs., per dozen.....**JFJJ** $10.00

No. 3000 —Round body, green cracked back, white belly, w't per doz. in carton 1½ lbs., per dozen.....**JFJJ** $10.00

A clean sportsman-like underwater bait, that can be used to advantage in fairly weedy water.

PANETELLA.

Two Spinners, Three Treble Hooks, 4¼ in., ¾ oz. Body.

No. 7000 —Green cracked back, white belly, w't per doz. in carton 1¾ lbs.....per dozen **EFJ** $9.30

No. 7001 —Rainbow color, green back, red and yellow sides, blending into white belly, w't per doz. 1¾ lbs., per dozen.....**EFJ** $9.30

The slender shape makes an attractive lure for the gamey ones.

MIN-BUCK.

"MIN-BUCK," ¾ oz., 3 in. Body, Two Spinners, Three Treble Hooks.

No. 4007 —Yellow body, red and green spotted decorations, hexagon shape, yellow Buck Tail on tail treble, w't per doz. 1 lb., per dozen.....**JFEJ** $10.80

No. 4008 —White body with dark shaded back, natural color Buck Tail on tail treble, w't per doz. 1 lb., per dozen .....**JFJJ** $10.00

HEDDON'S DOWAGIAC.

No. 1500—Dowagiac wood sinking bait, 3 in. white body with red, green and yellow spotted effect, two spinners, three detachable dummy double hooks, w't per doz. 12 oz., per dozen .....**JIFJ** $16.00

No. 1501—Yellow body, otherwise same as No. 1500, w't per doz. 12 oz., per dozen .....**JIFJ** $16.00

This is Heddon's latest product, with new style, patented hooks that do away with treble hooks and are guaranteed to increase the killing certainty.

ONE IN A BOX.

No. 0 Series—Two spinners, three japanned extra strong Dowagiac treble hooks 3 in., 2½ oz. body in colors given below, per dozen **JGBJ** $12.00

No. 0—White body, red and green decorations.

No. 01—Yellow body, red, green and black decorations.

No. 02-W Red body, black decorations.

This is a new design with flat surfaces and side hooks mounted on a ridge with body of minnow sloping away from hooks, leaving them in the clearest possible position for efficiency.

No. 00 Series—Five japanned treble hooks, 3½ in., 2¾ oz. body, otherwise same as No. 0 Series in colors given below.....per dozen **JHAE** ..13.60

No. 00—White body, red and green decorations.

No. 001—Yellow body, red, green and black decorations.

No. 002—Red body, black decorations.

The above picture represents the way in which gill nets are commonly set in the great lake fisheries. These nets are made for taking whitefish, ciscoes, trout, pickerel, bass, mullet, suckers, perch, etc. When not certain of the exact size of mesh and twine needed, write us what kind of fish intended to catch, give weight, also in what kind of water, viz., lake, river, bayou, etc.

The linen gill net is made of best quality imported twine. It is a single net hung on a single top and a single bottom line, mounted with floats and sinkers complete, ready for use.

Our trammel nets have three nets, hung on a single top and a single bottom line. Lines are of best quality cotton obtainable. When ordering Trammel nets, always mention kind wanted and price per yard.

Of the three nets, two have large mesh called "walling," made of cotton seine twine; the inside net is made of best quality "imported Scotch linen twine." Our "Superior" trammel net is strictly high grade, combining best quality, quantity of material, and best workmanship. We guarantee them to be the best nets made, and the cheapest in the long run, where good, constant service is required. Inside net is made of 25/3 twine.

PALMER IMPROVED PATENT LOCK-WEAVE MINNOW SEINES.

Palmer—Four feet wide ..... per running foot $0 24

The Palmer Improved Lock-Weave Minnow Seine is made of Bingen Lock-Weave Netting, under Palmer Patent. Netting is of ½ in. mesh, "V" shape and being a lock-weave is more firm than any other netting used in woven seines. Of olive green color, making a beautiful finish. Plenty of floats and leads distributed at proper proportion. The great improvement in the Palmer Seine over all others, is sewing the netting direct to the lines, leaving no aperture or space for the minnows to escape between the netting and the lines as in the old manner of construction. Floats and sinkers are slotted and fit snugly to the lines. Everything first-class in the Netting, workmanship and construction. All four feet wide. Lengths are 6, 8, 10, 12, 15, 20 and 25 feet.

Seine twine and tarred net rope subject to market prices.
PACKED IN ONE-HALF POUND TUBES.

SUGGESTIONS IN ORDERING NETTING.

The above cut illustrates the different styles of selvage and mesh.

Showing 2 in. stitches mesh.

When ordering or writing for estimates, regard the following suggestions as much as possible—

In Ordering, give full description of net in question, stating its length, depth, size of mesh and size of twine. If you are not acquainted with twines, state the kind of fish you want to catch, and the way you propose to fish for them.

How Measured—Always state whether the netting is to hang the dimensions given when on ropes, or is to measure those dimensions when stretched. We measure a mesh on square basis, if you give stretched measure, always say so.

Give Depth in Meshes—When convenient give depth of net in meshes.

Kind of Selvage—State whether you want double mesh, double selvage, or single selvage, as per cut.

Kind and Quality—State whether you want goods tarred, barked or white.

Net or Netting—Always state whether net is wanted complete or netting only.

We cannot consider claims for shortages or imperfections after seines or nets have been used.

REVONOC ROW BOATS, CANOES, ETC.

REVONOC FISHERMEN'S BOATS.

No. 642 REVONOC—Length 12 ft., beam 42 in., depth of sides 15 in., painted two coats of Marine green outside and slate color inside, the planking is of selected cypress, the bottom of ¾ in., running lengthwise and fastened to oak ribs, the sides of ⅝ in., in two pieces, lap strake, and thoroughly fastened gunwales, seat risers and seats of cypress, knees, stem and transom of oak, caulked with cotton, one pair side plate sockets, one pair straight copper tipped and varnished oars with North River locks, three seats, w't each 140 lbs. . . . . each★ **BJJE** $33.40

ANCHORS.

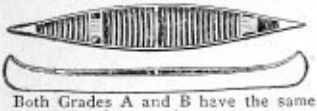
No. 347—Automatic, w't per doz 10½ lbs. ..... per dozen BGJ $4.50

Used for trolley fishing, anchoring small boats when hunting or fishing, also for anchoring decoys. Throwing out this anchor opens it automatically. To haul in pull line tight and let go at once, this will loosen anchor and close it up so it can be hauled in easily. Can be carried in pocket or in tackle box.

ONE DOZEN IN A CARDBOARD BOX.

GLUE.

No. 1G—Jeffery's, special marine canoe, guaranteed to be waterproof, in friction top cans, w't per doz. cans 3 lbs. 15 oz., per dozen cans..... BDJ $4.00



Its particular properties are those of flexibility and durability, and although it becomes soft and pliant under heat, it still retains its adhesion to timber, fiber, etc., and is clean and insoluble in water.

No canoeist should be without a can of this glue; it is invaluable for quick repairs on either canvas or cedar canoes.

Any puncture or leak in boat or canoe can be repaired in five minutes. It is as necessary to a canoeist as a repair kit is to a bicyclist or an automobilist.

ANCHORS.

No. 347—Automatic, w't per doz 10½ lbs. ..... per dozen BGJ $4.50

Used for trolley fishing, anchoring small boats when hunting or fishing, also for anchoring decoys. Throwing out this anchor opens it automatically. To haul in pull line tight and let go at once, this will loosen anchor and close it up so it can be hauled in easily. Can be carried in pocket or in tackle box.

ONE DOZEN IN A CARDBOARD BOX.

GLUE.

No. 1G—Jeffery's, special marine canoe, guaranteed to be waterproof, in friction top cans, w't per doz. cans 3 lbs. 15 oz., per dozen cans.....BDJ $4.00

Its particular properties are those of flexibility and durability, and although it becomes soft and pliant under heat, it still retains its adhesion to timber, fiber, etc., and is clean and insoluble in water.

No canoeist should be without a can of this glue; it is invaluable for quick repairs on either canvas or cedar canoes.

Any puncture or leak in boat or canoe can be repaired in five minutes. It is as necessary to a canoeist as a repair kit is to a bicyclist or an automobilist.

REVONOC DUK-FUT.

The construction of the Duk-Fut Glove is entirely different from the old style fielder gloves.

It has been thoroughly tested and approved by the greatest fielders of the day.

No. D150-P.

Made of the best selected leather in their respective grades as follows.

No. D150-P REVONOC—Duk-Fut, College, finely selected pearl kid leather, wine binding, full leather lined,
per dozen .....ADDJ $24.00

No. D100-T—Champion, good quality brown kid leather, black binding, felt lined, with leather palm and finger,
per dozen .....JIFJ $16.00

No. D100-YT REVONOC—Duk-Fut, League Jr., tan kid leather, black binding, felt lined, with leather palm and fingers, youth's size,
per dozen .....JIFJ $16.00

The entire face or palm and fingers of the REVONOC *Duk-Fut Glove is cut on one piece of leather which forms webs between the fingers rendering it impossible for the glove to tear and prevents split fingers or injury to the hand, thus greatly assisting the player in fielding.*

Requires no breaking in and is ready for use at time of purchase.

Every glove guaranteed perfect or money refunded.

ONE IN A BOX.

TENNIS RACKETS AND BALLS.

WRIGHT AND DITSON'S.

Wright & Ditson rackets weighing 13 oz. and over are guaranteed by the manufacturers for 30 days after date of purchase. Rackets on which claim of defect is made must be forwarded for inspection and all transportation charges paid by the sender.

Pim.

Campbell.

Pim—Plain cedar handle, made in weights 13½ and 14 oz. only, in waterproof case....each **JGBJ** $12.00

The frame is made of lively ash, and is bound with light but strong tape near the throat, which does not interfere with the natural spring in the wood, and is strung with the very best English gut.

Campbell—Made in weights 13 to 14½ oz.....each **DBJ** $7.00

The Campbell racket in its new shape is a great success. It is strung with English gut.

Sears—Made in weights 13, 13½ and 14 oz.....each **DBJ** $7.00

The Sears racket is made in the latest model, and is strung with English gut and contains extra center strings.

Champion—Made in weights 13, 13½ and 14 oz.....each **CCE** $5.60

The Champion racket is made in the new and popular Ward & Wright shape, and is strung with an excellent quality of white gut, and contains the extra center strings.

Longwood—Made in weights 12½, 13, 13½ and 14 oz.....each **BIJ** $4.80

This racket has for a long time been one of the most popular. It is strung with a good quality of gut.

Columbia—Made in weights 13, 13½ and 14 oz.....each **BDJ** $4.00

This racket is made after the latest models, and is strung with good gut, with the extra center strings.

Park—Made in weights 13, 13½ and 14 oz.....each **BAJ** $3.50

Well finished throughout, and is strung with good quality gut.

Country Club—Made in weights 12½, 13 and 13½ oz.....each **BAJ** $3.50

This is a new style racket, strung with good gut, containing extra center strings.

Hub—Made in weights 12½, 13 and 13½ oz.....each **AGJ** $2.80

The shape and finish of the Hub has made it a very popular racket.

Sorosine—Made in light and medium weights.....each **ABJ** $2.00

Strung with good gut, a popular low priced racket. Same shape as the Country Club.

LEE'S SLOTTED THROAT TENNIS RACKETS.

Commonwealth—Full size model, strung with good quality gut, made in 13 and 13½ oz.....each **CEJ** $5.80

Model B—Entirely new model, strung with special three-ply cable gut, made in 14 and 14½ oz...each **JGBJ** $12.00

Each racket has a very narrow slot running clear through the throat extending from 4 to 6 inches down the handle.

The Principle of the Slot.

1. *The slot imparts a very slight "spring" to the racket—not noticeable to the user—but lending a very real extra power to the service, drive and smash.*

2. *The slot greatly lessens the chance of the racket splitting in that old weakness, the shoulder, by absorbing the shock of each stroke.*

3. *The slot enables us to use a heavier, stronger and better grade of ash for the frame, thus increasing its strength without increasing the total weight.*

JUVENILE TENNIS RACKETS.

No. 2—Imported, large juvenile size, medium weight, 25 in. over all, each .....**JGJ** $1.20

TENNIS BALLS.

No. 6—Paruco, high grade, full size, excellent practice ball, regulation weight, guaranteed, an per dozen .....**CJJ** $5.00

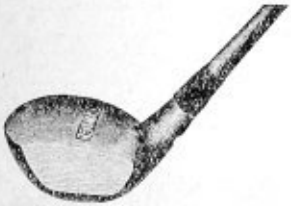
REVONOC GOLF CLUBS.

REVONOC wood golf clubs are hand finished by professional golf club makers. The balance and material of these clubs are perfect. The heads are made of sawed or compressed dogwood and persimmon. The shafts are made of selected second-growth split hickory and Texas ash. No club leaves the factory until it has been carefully examined by an experienced player, and no wood is used until it has been thoroughly seasoned. We guarantee every REVONOC club to be perfect in material, finish and workmanship, and agree to replace all clubs that show defects.



The models for the "irons" were carefully selected by leading golf experts, and are perfect in shape, die and weight. Only the best mild steel is used. Being made in dies, the heads of each pattern are alike. In the heads the lines which give the sight are perfectly kept. The finish of the goods is unsurpassed by any now made. The striking surface of the heads are true.

All REVONOC Golf Clubs have Calf-Skin Grips.

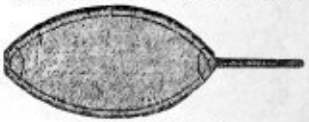
STRIKING BAG PLATFORMS.

"Cycle" Bag.

No. 78—Rim of single circle of laminated hard wood, size 18 in. in diameter, complete with swivel wheel, total w't 7 lbs., without bag, each **EAJ** $8.50

The Cycle-Bag platform makes it possible for anyone to enjoy in a house or apartment, bag punching. The platform can be put in a doorway or any convenient place as it does not take up much space. The swivel wheel is very fast, is light in weight and easily adjusted, can be put up or taken down in 20 seconds. Is practically indestructible and its unique construction reduces the noise and vibration to a minimum.

We recommend the pear shape bag be used to give best results.



The Lightning.

No. 28—36x20x4½ in. frame, when folded, rim 23 in. diameter, w't 7½ lbs., without bag .....each **BDJ** $4.00

The "Lightning" is very strong and light, has rubber cushions between stirrups and frame to absorb shock and deaden noise. Platform is easily attached and is absolutely rigid—can be folded flat for shipment.
